

Grain: World Markets and Trade

Brazil Forecast to be a Net Corn Exporter in 2000/01

Million metric tons

Brazil is forecast to export 800,000 tons in the October-September 2000/01 year, making it a net exporter for the first time since 1982/83. An expected surge in production of nearly 18% has created a short term exportable surplus. However, bottlenecks at major ports could limit corn shipments over the next month as soybeans are really the priority export crop. Brazil recently made a large sale to the EU because it could supply approved varieties at a discounted price when Argentina was sold out. In addition, it has won a small share of other markets in which varieties approved for all uses are preferred.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice trade year statistics are for the subsequent calendar year.

SITUATION AND OUTLOOK: COMMENTARY AND CURRENT DATA

WORLD WHEAT SITUATION AND OUTLOOK

World wheat trade in 2000/01 is forecast down 5.9 million tons from last year to 106.6 million. Global production is down for the third consecutive year while consumption is presently estimated to ease from last year. Global stocks are forecast to fall 16.8 million tons thereby maintaining a low stocks to use ratio.

Over the past month, export quotes for #2 HRW FOB Gulf have increased about \$4 per ton to \$135 in early March. World wheat trade in 2000/01 is forecast nearly identical to last month.

2000/01 Trade Changes

Selected Exporters

- ◆ **India** up 300,000 tons to 1.5 million based on sales resulting from the government's decision to subsidize exports from their large stocks beyond the end of their April/March marketing year.
- ◆ **Kazakhstan** down 500,000 tons to 4 million due to a lagging export pace.

Selected Importers

- ◆ **Azerbaijan** down 200,000 tons to 600,000 based on lower projected imports resulting from a larger crop.
- ◆ **Iraq** up 300,000 tons to 3 million based on purchases from Australia, Argentina, and India.
- ◆ **Nigeria** up 225,000 tons to 1.5 million based on a strong import pace.
- ◆ **Poland** down 250,000 tons to 750,000 due to delays in the government's decision to import.
- ◆ **Russia** down 500,000 tons to 2 million based on the pace of shipments to date.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

WORLD RICE SITUATION AND OUTLOOK

Global rice trade for 2001 is projected at 22.4 million tons, down marginally from the previous year. Global ending stocks in 2000/01 are forecast to decline 4.4 million tons as nearly flat world consumption oversteps declining world production (on a milled basis.)

As world exportable supply remains in excess of import demand, global stocks weigh heavy on the market. Price quotes for Thai 100B and Viet 5%, as well as other Asian qualities, have declined in the past few weeks due to increased price competition as the Philippines tenders to buy 400,000 MT of milled rice.

Similarly, export price quotes for U.S. long grain grade #2/4 percent have declined slightly over the past four weeks to \$276 (FAS) per ton while medium grain #1/4 California rice quotes are holding at \$220 per ton, unchanged in 8 weeks.

Trade Changes in 2001

Selected Exporters

- ◆ **Guyana** down 100,000 tons to 175,000 because of increased price competition in the global market.
- ◆ **India** down 200,000 tons to 1.1 million based on lower expected production and lower projected imports by Bangladesh.

Selected Importers

- ◆ **Bangladesh** down 400,000 tons to 250,000 as a result of an increased production estimate.
- ◆ **Brazil** down 200,000 tons to 500,000 based on lower consumption.
- ◆ **Colombia** up 45,000 tons to 110,000 due to imports declared by Ministry of Agriculture government resolution #47 of March 1, 2001.
- ◆ **Costa Rica** down 40,000 tons to 55,000 based on smaller than expected demand in the previous year.
- ◆ **Ghana** down 30,000 tons to 200,000 tons as a result of decreased import demand.
- ◆ **United Arab Emirates** down 200,000 tons to 75,000 tons with the reallocation of transshipment trade to third country destinations.

Trade Changes in 2000

Selected Exporters

- ◆ **Burma** down 23,000 tons to 277,000 tons based on year end data.
- ◆ **Guyana** down 133,000 tons to 167,000 tons as a result of year end data from Guyana Rice Development Board.
- ◆ **Pakistan** up 150,000 tons to 2 million tons based on stronger than expected exports through the end of the year.

Selected Importers

- ◆ **Costa Rica** down 45,000 tons to 50,000 tons due to declining imports.
- ◆ **Ghana** down 30,000 tons to 200,000 tons as a result of decreased import demand.
- ◆ **South Africa** down 100,000 tons to 475,000 tons based on trade data from the South African Revenue Service.
- ◆ **United Arab Emirates** down 200,000 tons to 75,000 tons with the reallocation of transshipment trade to third country destinations.

WORLD COARSE GRAINS SITUATION AND OUTLOOK

World coarse grain trade for 2000/01 is projected down over 3 million tons to 101 million tons, due to larger crops in several major importing countries, especially Brazil and Russia. World production is expected to drop sharply as reductions in Eastern Europe and China are only partially offset by bigger crops in the United States, Brazil, and the EU. Global consumption is expected to remain at near record levels and global carryout stocks are forecast down over 22 million tons.

Global corn trade is projected to be down marginally from last year at 72.4 million tons. US exports are projected to increase over 1 million tons from 1999/00 levels, largely because of reduced competition from China and Eastern Europe. World barley trade is forecast to remain robust as Mid Eastern and North African demand continues strong. The EU will remain the largest supplier, although Australia and Canada are forecast to increase exports.

US Gulf FOB prices for corn have fluctuated over the last month, but are now only slightly above last month's \$94 a ton.

2000/01 Trade Changes

Selected Exporters

- ◆ **United States corn** down 1.5 million tons to 50.5 million, in response to intensifying competition.
- ◆ **Argentina corn** up 1.3 million tons to 12 million because of growing demand by countries who seek to avoid importing non approved varieties.
- ◆ **South Africa corn** down 200,000 tons to 1.1 million because of sharply higher prices resulting from an expected smaller crop.
- ◆ **Brazil corn** up 300,000 tons to 800,000 tons with the prospects of a record crop and a strong short-term export program
- ◆ **Canada barley down** 200,000 tons to 2 million based on a weaker than expected export pace.
- ◆ **EU barley down** 500,000 tons to 9.5 million due to the slow pace of export licenses.
- ◆ **EU oats up** 100,000 tons to 700,000 based on a recent surge of export licenses.

Selected Importers

- ◆ **Mexico corn** up 200,000 tons to 6 million, substantiated by a strong pace of purchases.
- ◆ **Egypt corn** up 100,000 tons to 4.6 million, credited to a strong pace of imports and purchases to date.

-
- ◆ **Saudi Arabia barley** down 400,000 tons to 5 million because of an expected reduction in imports in response to lower livestock (sheep) numbers.
 - ◆ **United States oats** up 100,000 tons to 1.8 million due to a strong import pace to date.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade year statistics since 1979/80 exclude intra-EU trade.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

- 1) Includes Canada, Mexico, and the United States.
- 2) Includes Central America, the Caribbean, and South America.

- 9) Includes all other Asian countries except South Asia.
- 10) Includes Australia, Fiji, New Zealand, and Papua New Guinea.

OTHER NOTES

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Current and historical data on the European Union in this issue refers to the EU-15.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

This circular was prepared by the Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attaches and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 02-01 February 2001. For further details on world grain production see World Agricultural Production, Foreign Agricultural Service Circular WAP 03-01 March 2001.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is:
