# Grain: World Markets and Trade

## Smaller Crops and Expanding Use Are Reducing Global Wheat Stocks, But Prices Remain Sluggish

Today's prices are not as high as they historically would have been, given the current low global stock to use ratio. But in recent years, the focus has shifted from a global perspective to supplies in major exporting countries. However, this year's price increases have been restrained despite falling supplies among major exporting countries. Non-traditional suppliers in Eastern Europe and the former Soviet Union will export several million tons in the next few months due to good harvests, limited storage capabilities, and the desire for hard currency. Also, India is expected to continue working off burdensome stocks. In coming months, importers are expected to continue buying hand to mouth, unless further deterioration in crop prospects for the major exporter causes a sense of urgency.

# SITUATION AND OUTLOOK: COMMENTARY AND CURRENT DATA

## WORLD WHEAT SITUATION AND OUTLOOK

World wheat trade in 2001/02 is forecast to be 106.2 million tons, up 3.4 million tons from 2000/01. Global production is forecast down as smaller crops in the United States, Canada, EU, China, and South Asia more than offset increases in Eastern Europe, FSU, North Africa, and Argentina. Consumption is expected to remain well above production for the third consecutive year leading global stocks to fall an estimated 27 million tons from last year to their lowest level in 19 years.

In early August, export quotes for #2 HRW FOB Gulf averaged \$125/MT, up only \$1 from last month as indications of tightening exportable supplies in some major countries were countered by prospects for additional exportable supplies from smaller exporters and lagging global import demand. Expected global production is largely unchanged from last month as reduced prospects in China, Canada, and the EU are countered by better prospects in Russia, Kazakhstan, and Eastern Europe. Global consumption is forecast up nearly 2 million tons while ending stocks are estimated down more than 2 million tons. World wheat trade in 2001/02 is forecast 1 million tons lower than last month as lower expected exports from Canada and the EU more than offset more exports from Kazakhstan and Eastern Europe.

### **2001/2002 Trade Changes**

#### **Selected Exporters**

- ◆ **Canada** down 1.5 million tons to 16.5 million due to smaller crop prospects.
- ◆ **EU** down 1 million tons to 12.5 million on prospects for a smaller crop and tighter exportable supplies.
- ◆ **Eastern Europe** up 1 million tons to 4.5 million based on better-than-expected crops in Romania and Hungary.

#### **Selected Importers**

- ◆ **Brazil** down 300,000 tons to 7.0 million with prospects for a larger crop.
- ◆ **Peru** up 200,000 tons to 1.5 million based on higher expected consumption.
- ◆ **EU** up 500,000 tons to 4.5 million because of tighter feed grain supplies, higher domestic prices, and lower import duties on lower quality wheats.
- ◆ **United States** down 200,000 tons to 2.4 million due to a lagging import pace.

---

## **2000/2001 Trade Changes**

### **Selected Exporters**

- ◆ **Argentina** down 500,000 tons to 11.0 million due to slower than expected export shipments to date.

### **Selected Importers**

- ◆ **Brazil** down 300,000 tons to 7.3 million because of fewer imports late in the year.
- ◆ **Peru** up 250,000 tons to 1.5 million because of increased purchases from the United States.
- ◆ **South Korea** down nearly 200,000 tons to 3.1 million due to fewer purchases of feed quality wheat.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

---

## WORLD RICE SITUATION AND OUTLOOK

Bearish market conditions continue as low prices and scant importer demand constrain international trade. Global trade for 2001 is projected at approximately 22.3 million tons, down nearly 600,000 from the previous year, and the third consecutive year-to-year decline. As global production remains flat, global consumption continues to grow and is projected to drawdown global stocks nearly 10 million tons from the previous year.

Given the sluggishness of global imports, prices remain low. Thailand's export price quotes seemed to strengthen through June and early July, but began to fall again in late July. A ten-week average shows that Thai 100B continues to remain around \$176 per ton and has averaged \$183 per ton over the past 12 months. Similar qualities of Viet rice have followed this trend until the past week when export quotes turned up. Over the past ten weeks, Viet 5% has averaged \$156 per ton and \$160 per ton over the past 12 months.

During the past four weeks price quotes adjusted for the slow international market and pulled price quotes for U.S. #2/4 down about \$17 to \$259 per ton (FAS), US Gulf sacked, while medium grain #1/4 California rice fell \$5 to \$185 per ton, ex-spout Sacramento port.

### Trade Changes in 2001 and 2002

#### Selected Importers

- ! **Colombia imports** down 30,000 tons to 100,000 due to a new government policy to limit imports from fellow Andean Community members for the remainder of 2001.

## WORLD COARSE GRAINS SITUATION AND OUTLOOK

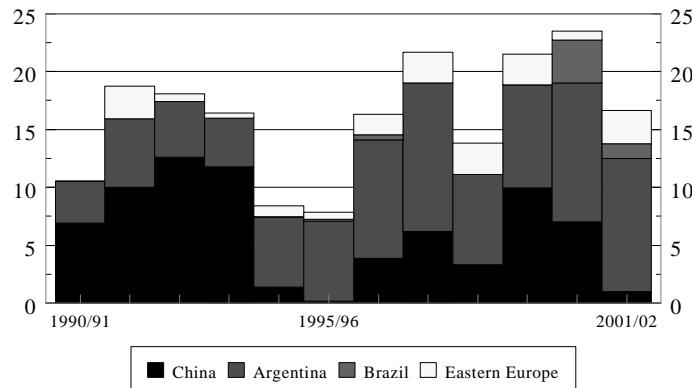

World coarse grain trade for 2001/02 is projected down 2.2 million tons from the previous year to 98.5 million tons. Global consumption is expected to continue to outpace production and carryout stocks are forecast to fall more than 33.5 million tons. US corn, China corn, and EU barley are forecast to comprise nearly two-thirds of world coarse grain stocks.

Global corn trade is projected to be down marginally from a year earlier at 71.6 million tons. US exports are projected to increase 5.5 million tons from 2000/01 levels, mostly because of reduced competition from drought-ridden China. A large drop in US carryout stock levels will result from a smaller crop, larger use, and larger exports. The world barley market is shrinking with falling demand expected from North Africa and Mid Eastern countries.

### The Changing Face of the Global Corn Market

**US Corn Export Competitors**

Million metric tons

The US continues to dominate global corn trade as other suppliers ebb and flow. China's exports continue to shrink, but Brazil has recently emerged as a short-term exporter and Eastern Europe has recovered from drought. Even with competition from these exporters, the US market share is expected to increase nearly 9%.

### 2001/02 Trade Changes

#### Selected Exporters

- ◆ **United States corn** up 500,000 tons to 51.5 million due to expected continued strong demand and reduced competition.
- ◆ **Argentina corn** down 500,000 tons to 11.5 million because of lower area.
- ◆ **China corn** down 50 percent to 1 million tons based on continuing high domestic prices.
- ◆ **Hungary corn** up 1 million tons to 1.5 million and **Romania corn** up 500,000 tons to 1 million with larger exportable supplies.
  
- ◆ **Brazil corn** up 300,000 tons to 1.3 million based on anticipated continued strong sales.

- 
- ◆ **Canada barley** down 300,000 tons to 1.4 million due to prospects for a smaller crop as a result of dryness in key producing areas.
  - ◆ **EU barley** down 1 million tons to 7 million due to tighter supplies of feed grains and strong domestic demand.

### **Selected Importers**

- ◆ **Brazil corn** up 300,000 tons to 500,000 because of a decrease in forecasted harvest area.
- ◆ **Egypt corn** up 200,000 tons to 5 million due to an expected increase in consumption.
- ◆ **Russia corn** up 100,000 tons to 200,000 tons because of anticipated strong demand for feed corn for the poultry sector.
- ◆ **Algeria barley** down 300,000 tons to 500,000 based on the continued shift to corn.
- ◆ **Morocco barley** down 100,000 tons to 700,000 in response to a larger crop.
- ◆ **Saudi Arabia barley** down 300,000 tons to 4.2 million due to continuing weak demand from smaller herds.

### **2000/01 Trade Changes**

### **Selected Exporters**

- ◆ **United States corn** up 1 million tons to 46 million based on recent strong sales and shipment pace to date.
- ◆ **Argentina corn** down 1 million tons to 12 million due to slowing sales.
- ◆ **Brazil corn** up 700,000 tons to 3.7 million because of a continuing strong export pace.
- ◆ **EU barley** down 1 million tons to 7 million due to reduced export licenses.
- ◆ **United States sorghum** up 300,000 tons to 6 million due to continuing strong sales to Mexico.

### **Selected Importers**

- ◆ **Russia corn** up 50,000 tons to 150,000 supported by a strong demand for feed corn.
- ◆ **Algeria barley** down 400,000 tons to 500,000 because of very slow buying.
- ◆ **Saudi Arabia barley** down 300,000 tons to 4.2 million with slow buying, after the reported liquidation of sheep infected with Rift Valley Fever.

Notes:

Trade statistics are on a July/June year for wheat and an October/September year for coarse grains.

Trade year imports and exports exclude Intra-EU trade.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade year statistics since 1979/80 exclude intra-EU trade.

---

## **ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE**

### **REGIONAL TABLES**

- 1) Includes Canada, Mexico, and the United States.
- 2) Includes Central America, the Caribbean, and South America.
- 3) Includes Azores, Cyprus, Iceland, Malta & Gozo, Norway, and Switzerland.
- 4) Includes Albania, Bulgaria, Czech Republic, Hungary, Poland, Romania, Slovakia, and former Yugoslavia.
- 5) Includes Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen.
- 6) Includes Algeria, Egypt, Libya, Morocco, and Tunisia.
- 7) Includes all other African countries except North Africa.
- 8) Includes Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, and Sri Lanka.
- 9) Includes all other Asian countries except South Asia.
- 10) Includes Australia, Fiji, New Zealand, and Papua New Guinea.

### **OTHER NOTES**

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Current and historical data on the European Union in this issue refers to the EU-15.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

This circular was prepared by the Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attaches and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 07-01 July 01. For further details on world grain production see World Agricultural Production, Foreign Agricultural Service Circular WAP 08-01 August 2001.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is:
