

Grain: World Markets and Trade

Stocks Drop Among Major Wheat Exporters But Smaller Players' Exports Soar

Smaller aggregate wheat production among the major exporters (United States, Canada, Australia, Argentina, and EU) is forecast to cause their ending stocks to fall to the lowest level in five years. Historically there has been a strong inverse relationship between stocks held by these exporters and global prices. However, this relationship has been muted by the unusually abundant supplies of cheap wheat available from countries that have not been traditional large exporters. These countries are led by Russia, Ukraine, Kazakhstan, and Hungary, which have bigger crops and India, which has large carryin stocks.

Foreign Countries' Policies and Programs

India Fails to Reconcile Mountains of Rice with Starving People

India has been unsuccessful in marketing its rice on the domestic and international markets due to uncompetitive price schemes and a gradual decline in crop quality. Consequently, stocks now far exceed the desired, or comfortable, buffer level of 10-12 million tons.

The Government of India (GOI) provides direct domestic support for agricultural products through its price support programs. Essentially, there is a standing offer to buy, or *procure*, rice from producers at a fixed support price, which has typically been lower than the world price. Support prices are currently above record low international prices and, thus, the government has become the buyer of choice. However, due to the degradation in quality, the government has reduced purchases.

The GOI changed domestic policy to stir demand but seemingly avoided important facts: (1) spoiled and unattractive stockpiled rice and (2) infrastructure problems that make product delivery very difficult. On the international front, it seems that the GOI simply did not consider the same difficulties other exporting countries are coping with: (1) record low world prices and (2) lack of significant import demand. The following table is a synopsis of pricing changes.

Procurement Prices	<i>Before price change:</i> Discounted for Poor Quality <i>After price change:</i> \$113-119/ton
Export Prices * white rice 25% broken	<i>Before price change:</i> \$215/ton <i>After price change:</i> \$135-140/ton
Domestic Prices	<i>Before price change:</i> \$240/ton <i>After price change:</i> \$177/ton

Following is a chronology of the policy changes and their impact on rice stocks that have occurred over the past 12 months.

October 1, 2000 - GOI estimated stocks at 13.4 million tons.

October 15, 2000 - Policy Change: Procurement Prices

Due to the deterioration in crops, the industry lobbied the GOI to relax rice procurement quality standards so that government buyers could increase purchases. The GOI countered with a proposal to pay a discounted procurement price. The industry rejected the proposal and continued to lobby for the full procurement price. The government agreed, retroactively, and stocks continued to build.

April 1, 2001 - GOI estimated stocks at 23.2 million tons.

May 1, 2001 - Policy Change: Export Prices, Export Subsidy.

The GOI approved the export of 3 million tons via private traders and government parastatals. The GOI set the FOB price for poor quality 25% broken at \$135 per ton, nearly \$100 lower than prevailing quotes. That price was not as low as what impoverished Indian consumers would pay, but still above the world price for similar varieties of better quality.

June 1, 2001 - GOI estimated stocks at 22.2 million tons.

July 1, 2001 - Policy Change: Domestic Prices.

In order to stimulate domestic consumption and absorb some stocks into the domestic market, the GOI lowered the price to Indian citizens living above the poverty line, but stipulated that each family increase consumption by 5 kg.

August 1, 2001 - GOI estimated stocks at 22.2 million tons.

September 11, 2001 - Policy Change: Procurement Prices.

Recognizing the need to support the fragile farm sector, the GOI revisited the support/procurement price and raised it above the previous high established on October 15, 2000. But, again, the inflated procurement price proved counterproductive as it trickled down from the government to the millers, then to traders, and translated into high export prices, diminishing India's competitiveness in the global market.

Conclusion

This series of price changes have been ineffective in achieving the goal of reducing stocks. While the GOI tried to mitigate the situation by adjusting prices, the magnitude of these adjustments has been insufficient and, more importantly, exacerbated the stocks problem via record procurements and lost export market share.

For more information, contact Michelle Thomas at (202) 720-9523 or thomasm@fas.usda.gov.

SITUATION AND OUTLOOK: COMMENTARY AND CURRENT DATA

WORLD WHEAT SITUATION AND OUTLOOK

World wheat trade in 2001/02 is forecast to be 106.7 million tons, up 3.8 million tons from 2000/01. Global production is forecast down 8 million tons and is expected to remain below consumption for the third consecutive year. Global stocks are forecast to fall an estimated 23 million tons from last year to their lowest level in 13 years.

In early October export quotes for #2 HRW FOB Gulf averaged \$121/MT, down \$6 from last month. Expected global production is largely unchanged from last month as increases in Russia and Ukraine more than offset smaller crops in Argentina, Canada, the EU, and the United States. Global consumption is forecast down slightly while ending stocks are estimated up 2 million tons. World wheat trade in 2001/02 is forecast 500,000 tons lower than last month.

Exports by the EU are forecast to fall to 12 million tons which would be the lowest level in 25 years. Internal EU market prices are well above world market prices because of crop shortfalls and producers holding supplies off the market. Consequently, the Commission has been unwilling to grant export subsidies for fear of further boosting domestic prices. However, without subsidies and with a stronger Euro, EU wheat cannot compete with the cheap supplies from Eastern Europe and the FSU.

2001/2002 Trade Changes

Selected Exporters

- ◆ **Argentina** down 500,000 tons to 12.5 million based on reduced crop prospects.
- ◆ **Canada** down 500,000 tons to 15.5 million due to a smaller crop.
- ◆ **EU** down 500,000 tons to 12.0 million based on a very slow sales pace, intensified competition, and the absence of export subsidies.
- ◆ **Pakistan** up 500,000 tons to 1 million due to increased sales prospects as well as shipments to Afghanistan.
- ◆ **Russia** up 500,000 tons to 2 million due to a larger crop.
- ◆ **Ukraine** up 500,000 tons to 4 million based on increased sales prospects.
- ◆ **United States** down 500,000 to 28.5 million based on low sales to date.

Selected Importers

-
- ◆ **Afghanistan** up 300,000 tons to 1.0 million based on greater humanitarian donations.
 - ◆ **Iran** down 500,000 to 6.5 million resulting from a slow buying pace.

2000/2001 Trade Changes

Selected Exporters

- ◆ **India** down 300,000 tons to 2.2 million based on final export figures.
- ◆ **Kazakhstan** up 150,000 tons to 3.65 million based on higher-than-expected exports.

Selected Importers

- ◆ **China** down 200,000 tons to 300,000 tons due to a slow import pace.
- ◆ **Philippines** up 300,000 tons to 3.1 million due to higher-than-expected purchases from the United States and India.
- ◆ **Iran** down 500,000 tons to 6.5 million based on a slow import pace.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

WORLD RICE SITUATION AND OUTLOOK

Global trade for 2001 is up slightly from last month's estimate nearing 22.4 million tons; year-to-year, trade is expected to be flat. While consumption continues to outpace production, ending stocks are expected to fall approximately 12 million tons in 2002.

Price quotes out of Thailand and Vietnam are stable. Over the past four weeks, Thai export price quotes for 100B have averaged \$177 per ton, with a high of \$178 and a low of \$175; Viet 5% export price quotes have averaged \$172.5 per ton, with a high of \$174 and a low of \$170. Quotes for Paki 15/20% have fallen from a previous month's high of \$157.5 per ton to \$150.25 per ton.

Export price quotes for U.S. #2/4 have fallen again this month and are currently at \$226 per ton (FAS), US Gulf sacked. Price quotes for high quality medium grain have increased this month \$235 per ton ex-spout Sacramento port.

Trade Changes in 2002

Selected Importers

! **Senegal imports** down 125,000 tons to 600,000 because of a higher production.

Trade Changes in 2001

Selected Exporters

! **Australia exports** down 75,000 tons to 600,000 due to slow pace to date.

! **India** up 200,000 tons to 1 million based on increased pace to date.

! **Pakistan** down 250,000 tons to 2 million based on rising transportation costs and shrinking exportable supplies.

Selected Importers

! **Senegal imports** down 80,000 tons to 650,000 because of a higher production.

WORLD COARSE GRAINS SITUATION AND OUTLOOK

World coarse grain trade for 2001/02 is projected down 2.6 million tons from the previous year to nearly 100.5 million tons. Global consumption is expected to continue to outpace production and carryout stocks are forecast to fall 29 million tons. US corn, China corn, and EU barley are forecast to comprise nearly two-thirds of world coarse grain stocks.

Global corn trade is projected to be down marginally from a year earlier at 74 million tons. US exports are projected to increase 4 million tons from 2000/01 levels, mostly because of reduced competition. A large drop in US carryout stock levels will result from a smaller crop and larger exports. World barley trade has shifted from traditional major exporters (EU and Canada) to FSU and Eastern European countries with unusually abundant and cheap supplies.

2001/02 Trade Changes

Selected Exporters

- ◆ **United States corn** up 1 million tons to 52 million due to reduced competition and increased global trade.
- ◆ **Argentina corn** down 500,000 tons to 11 million because of a reduction in expected production.
- ◆ **Russia and Ukraine barley** up 700,000 tons and 500,000 tons respectively because of larger crops.
- ◆ **EU barley** down 1 million tons in the face of strong competition and the Commission's unwillingness to grant export subsidies for fear of boosting internal grain market prices.
- ◆ **Canada oats and barley** down 200,000 tons each to 900,000 and 1 million tons respectively due to prospects for sharply smaller crops.
- ◆ **Ukraine rye** up 200,000 tons to 350,000 based on an increase in production.

Selected Importers

- ◆ **Canada corn** up 500,000 tons to 3 million due to smaller corn and barley crops.
- ◆ **Taiwan corn** down 300,000 tons to 4.8 million because of falling consumption patterns.
- ◆ **United States oats** down 200,000 tons to 1.3 million based on tighter exportable supplies from Canada.

2000/01 Trade Changes

Selected Exporters

- ◆ **United States corn** up 500,000 tons to 48 million based on continuing strong sales and shipment pace to date.
- ◆ **Brazil corn** up 300,000 tons to 4 million based on strong shipment pace.

Selected Importers

- ◆ **Israel corn** up 150,000 tons to 850,000 due to a strong purchase pace to date.
- ◆ **Morocco corn** up 150,000 tons to 900,000 due to a brisk purchase pace.
- ◆ **Romania corn** up 225,000 tons to 375,000 due to an active purchase tempo.
- ◆ **Taiwan corn** down 300,000 tons to 4.8 million as a result of a sluggish purchase pace to date.
- ◆ **Thailand corn** down 150,000 tons to 50,000 due to higher production and slower purchase pace.

Notes:

Trade statistics are on a July/June year for wheat and an October/September year for coarse grains.

Trade year imports and exports exclude Intra-EU trade.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade year statistics since 1979/80 exclude intra-EU trade.

REGIONAL TABLES

- 1) Includes Canada, Mexico, and the United States.
- 2) Includes Central America, the Caribbean, and South America.
- 3) Includes Azores, Cyprus, Iceland, Malta & Gozo, Norway, and Switzerland.
- 4) Includes Albania, Bulgaria, Czech Republic, Hungary, Poland, Romania, Slovakia, and former Yugoslavia.
- 5) Includes Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen.
- 6) Includes Algeria, Egypt, Libya, Morocco, and Tunisia.
- 7) Includes all other African countries except North Africa.
- 8) Includes Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, and Sri Lanka.
- 9) Includes all other Asian countries except South Asia.
- 10) Includes Australia, Fiji, New Zealand, and Papua New Guinea.

OTHER NOTES

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Current and historical data on the European Union in this issue refers to the EU-15.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

This circular was prepared by the Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attaches and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 09-01 September 2001. For further details on world grain production see World Agricultural Production, Foreign Agricultural Service Circular WAP 10-01 October 2001.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is:
