

Grain: World Markets and Trade

FSU Takes Larger Bite of Wheat Export Pie

2000/01 Market Share

2002/03 Market Share

-Other Majors includes Australia, Argentina, Canada, and the EU

Exports from the countries of the Former Soviet Union (FSU) have been surging for the past several months with this year's total shipments forecast at nearly 24 million tons compared to under 5 million tons just 2 years ago. Consequently, the global wheat trade picture has changed dramatically with cheap and abundant FSU wheat taking markets from other exporters, especially those saddled with very tight supplies. Even the EU, with a near-record harvest, has had a difficult time competing with the FSU.

Top destinations for FSU wheat are the EU, North Africa, and the Middle East, partially due to a regional transportation advantage over most other major exporters. However, sales have also spread to Asia and Latin America. Many first-time importers of these supplies may consider switching long-term to the Russian and Ukrainian wheat if quality is satisfactory. Expanding grain handling and storage facilities at ports will also facilitate continued FSU growth potential. However, since production is highly variable, exports could show large year-to-year fluctuations.

Historical Data Series for Selected Regions and Countries (electronic version only)

Notice to readers: The *Grain: World Markets and Trade* circular series no longer includes a printed version of the *Historical Data Series for Selected Regions and Countries*. Beginning with this month's publication, these historical tables will be available only electronically. The historical tables, along with an electronic version of the *Grain: World Markets and Trade* circular, are available via the FAS website (<http://www.fas.usda.gov/grain/>). The printed version of the circular will continue to include the *Summary Tables* and the *Situation and Outlook* reports.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice trade year statistics are for the subsequent calendar year.

SITUATION AND OUTLOOK: COMMENTARY AND CURRENT DATA

WORLD WHEAT SITUATION AND OUTLOOK

World wheat trade in 2002/03 is forecast at 105.6 million tons, down 4.3 million tons from 2001/02. Global production is down 12.0 million tons, while consumption is up 11.1 million tons from the previous year. Global stocks are expected to fall by 28.2 million tons to the lowest level since 1995/96.

Global production is down 1.2 million tons from last month's forecast due to smaller crops in Argentina, Australia, and Brazil. Global consumption is down slightly by 2.1 million tons with ending stocks up 2.1 million tons from last month.

Global wheat trade in 2002/03 is forecast up 1.5 million tons from last month. EU imports are now expected to nearly reach last year's record volume, with bigger than expected shipments from Russia before imposition of the new TRQ. With relatively high internal EU prices, demand for imported feed quality and high quality milling wheat remains strong for the second half of the year. Despite smaller crop prospects, Australia's export estimate remains high because of large shipments of old crop supplies. Increased export estimates by Australia and Russia are partially offset by decreased export estimates by Argentina, the EU, India, and the United States.

Early December export quotes for #2 HRW FOB Gulf averaged \$157/MT, down \$12 from last month.

2002/2003 Trade Changes

Selected Exporters

- **United States** down 500,000 tons to 25.5 million based on pace to date and increased competition.
- **Australia** up 2.0 million tons to 9.0 million based on larger than expected shipments the first half of the year (July/June).
- **India** down 1.0 million tons to 5.0 million due to diminished export prospects.
- **Russia** up 2.0 million tons to 9.5 million based on export pace with continued strong shipments to the EU and North Africa.

-
- **EU** down 500,000 tons to 15.0 million due to strong price competition and the Commission's earlier refusal to grant export subsidies necessary to compete with Russian and Ukrainian wheat prices.

Selected Importers

- **Morocco** up 200,000 tons to 3.0 million based on a higher expected level of consumption.
- **EU** up 1.5 million tons to 9.5 million based on a huge surge of import licenses sought by importers in anticipation of the EU's new import regime implemented on January 1, 2003.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

WORLD RICE SITUATION AND OUTLOOK

Global trade in 2003 is projected at 26.7 million tons, down 400,000 tons from the estimate for the previous year. Global production in 2002/03 is projected at 380.3 million tons (milled basis), down 17.0 million tons from 2001/02. Global ending stocks in 2002/03 are projected at 105.1 million tons, about 28 million tons below revised 2001/02. Global consumption in 2002/03 is forecast at 408 million tons.

Thai 100B jumped \$15 since last month's report and is currently quoted at \$203 per ton (FOB), resulting from higher warehouse demand and increased transportation costs due to a strike in the domestic trucking industry. At the same time, prices for Viet 5% dropped \$4 per ton, which is currently quoted at \$179 (FOB), a result of weak demand in anticipation of the upcoming harvest.

The export price quote for U.S. long grain grade #2/4 also softened this month, sliding \$6 to \$202 per ton (FOB). In contrast, the price quote for California medium grain #1/4 strengthened \$10 to \$275 per ton (bulk, ex-spout Sacramento).

Trade Changes in 2003

Selected Exporters

- **Egypt** down 100,000 tons to 400,000 due to a lack of price competitiveness.

Selected Importers

- **North Korea** up 50,000 tons to 500,000 due to larger food aid shipments from South Korea.

Trade Changes in 2002

Selected Exporters

- **Australia** down 50,000 tons to 350,000 based on slower exports during the fourth quarter.
- **Egypt** down 100,000 tons to 400,000 due to less competitive prices resulting from termination of government export programs.
- **Thailand** up 200,000 tons to 7.2 million based on statistics released by the Government of Thailand.

-
- **Vietnam** up 100,000 tons to 3.2 million based on government statistics.

Selected Importers

- **North Korea** up 100,000 tons to 500,000 based on increased food aid shipments from South Korea.

WORLD COARSE GRAINS SITUATION AND OUTLOOK

World coarse grain trade in 2002/03 is down over 1 million tons from a year earlier to 100 million tons. The gap between global consumption and global production is expected to more than double, lowering carryout stocks 27 million tons to 149 million. U.S. corn, China corn, and EU barley and rye are forecast to comprise two-thirds of world coarse grain stocks. Global stocks-to-use ratio will be 16.8 percent, the lowest since 1975/76.

Compared to last year, global corn trade increases 1 million tons to 75 million in 2002/03. U.S. exports are forecast to increase to 48 million tons, maintaining the same market share of 63 percent as last year.

2002/03 Trade Changes

Selected Exporters

- **U.S. corn** drops 1.0 million tons to 48.0 million based on increased competition from China.
- **Brazil corn** up 300,000 tons to 1.8 million due to higher anticipated production.
- **China corn** increases 1.0 million tons to 11.0 million based on a strong export pace.
- **South Africa corn** is reduced 300,000 tons to 1.2 million as a result of smaller crop prospects.
- **U.S. sorghum** is slashed 1.2 million tons to 5.1 million based on lower production and higher than expected domestic use.
- **Argentina sorghum** is up 100,000 tons to 400,000 due to reduced competition from the United States.

Selected Importers

- **U.S. barley** down 100,000 tons to 400,000 based on a slack import pace, caused in part by tight Canadian supplies.
- **Australia sorghum** is dropped 100,000 tons to 50,000 because of higher U.S. prices and more UK feed quality wheat imports.
- **Japan and Mexico sorghum** are down 300,000 and 600,000 tons, respectively (to 1.1 million and 4.0 million), due to lower U.S. availabilities.
- **Brazil sorghum** down 100,000 tons to 100,000 because of the slow pace of imports.

-
- **EU rye** increases 100,000 tons to 200,000 based on import licenses to date.

2001/02 Trade Changes

Selected Exporters

- **Kazakhstan barley** down 57,000 tons to 393,000 based on final trade data.
- **EU oats** up 50,000 tons to 650,000 based on increased late-season exports to the United States.

Selected Importers

- **Colombia corn** rises 211,000 tons to 1.911 million based on final trade data.
- **Saudi Arabia barley** up 100,000 tons to 5.75 million as a result of a strong late-season import pace.
- **Tunisia barley** down 100,000 tons to 700,000 based on a slow late-season pace.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

- 1) **North America:** Canada, Mexico, the United States.
- 2) **Latin America:** Central America, the Caribbean, South America.
- 3) **Other Western Europe :** Azores, Cyprus, Iceland, Malta & Gozo, Norway, Switzerland.
- 4) **Eastern Europe :** Albania, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Hungary, Macedonia, Poland, Romania, Serbia, Slovakia, Slovenia.
- 5) **Middle East:** Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.
- 6) **North Africa:** Algeria, Egypt, Libya, Morocco, Tunisia.
- 7) **Other Africa:** all other African countries except North Africa.
- 8) **South Asia:** Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka.
- 9) **Other Asia:** all other Asian countries except South Asia.
- 10) **Oceania:** Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

Current and historical data on the European Union in this issue refers to the EU-15 (Austria, Belgium/Luxembourg, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Spain, Sweden, and United Kingdom).

Current and historical data on the Former Soviet Union (FSU-15) includes Armenia, Azerbaijan, Belarus, Georgia, Kazakstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, Estonia, Latvia, and Lithuania. References to the FSU-12 include all of the above except for the Baltics (Estonia, Latvia, and Lithuania).

The Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250 prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 12-02 December 2002. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 01-03 January 2003.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: **<http://www.fas.usda.gov>**

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.
