Grain: World Markets and Trade

Asian Corn Markets Scramble As China Retreats

U.S. Sales to Asia Surge

Minor Exporters Emerge

China's retreat from large corn exports has forced its traditional customers to seek alternative suppliers. Malaysia, Indonesia, and South Korea, which together sourced 87 percent of their 13 million ton imports from China in 2002/03, are turning to the United States and minor exporters. U.S. sales to these destinations have soared compared to the same period a year ago.

However, high trans-Pacific freight rates have kept the United States from capturing an even larger market share in Asia, where exporters such as Thailand, Vietnam, and India are expanding sales due to larger-than-expected exportable supplies. An Avian Influenza-induced drop in feed demand in Thailand and Vietnam has allowed more corn to go into export channels. India's record crop has reduced prices, making its exports more attractive in the absence of Chinese offers. All combined, exports from these countries are expected to more than quadruple to 750,000 tons.

INTERNATIONAL MARKET ANALYSIS

Patterns Shift in Global Durum Trade

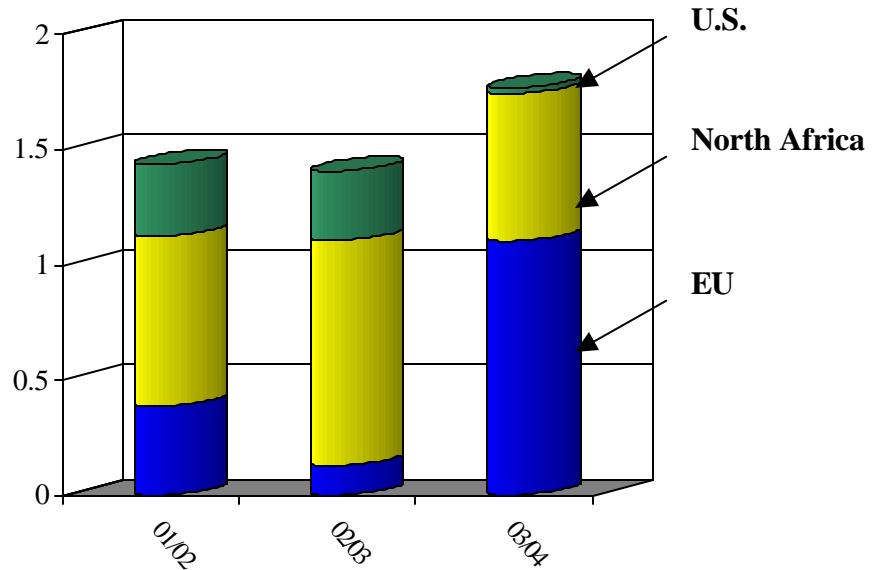

World durum trade patterns have shifted this year due to production fluctuations in key markets.

Importers

North Africa: Import levels in North Africa--the largest durum-importing region in the world--have fallen considerably this year. The region typically accounts for nearly half of the 6+ million ton world durum trade, with very high consumption of durum-based products such as couscous and pasta. The level of import demand, however, fluctuates from year to year depending on the size of the domestic crops. Durum production is substantial in the region, accounting for the majority of wheat area in Algeria and Tunisia, as well as a large percentage of the area in Morocco. Plentiful rains greatly benefited last year's crops, with yields in Algeria even reaching a record level. Subsequently, imports have declined in these markets, with shipments from Canada down more than a third. The contraction of this market has forced some durum exporters to seek other destinations.

EU: The European Union, on the other hand, has emerged as a larger market for imports this year to compensate for the worst wheat harvest in 8 years. Some European analysts estimate that the durum crop fell nearly a million tons as a result of the severe summer drought (down over 10 percent). Consequently, several EU countries, especially Italy, have stepped up imports. Italy typically imports more than a million tons (non-EU) to use in pasta production, much of which is then exported (the United States' being Italy's largest market outside the EU). In order to maintain steady pasta exports, Italy has thus turned to a variety of sources, with purchases primarily from Canada, but also from

Canada's Durum Exports to Select Markets
July/Jan

Australia, Syria, the United States, and even Iraq. Total EU durum import licenses issued by the Commission so far this year have already reached 1.7 million tons--four times greater than last year.

Latin America: Venezuela is increasing imports from last year's depressed level. Domestic turmoil and concerns over the country's monetary situation tempered purchases, but as the situation has stabilized, imports have returned to more normal patterns. The United States has been the primary beneficiary, as shipments from Canada have remained fairly steady. Venezuela has one of the highest pasta consumption rates in the world, which necessitates large-scale imports since no durum is produced domestically.

Exporters

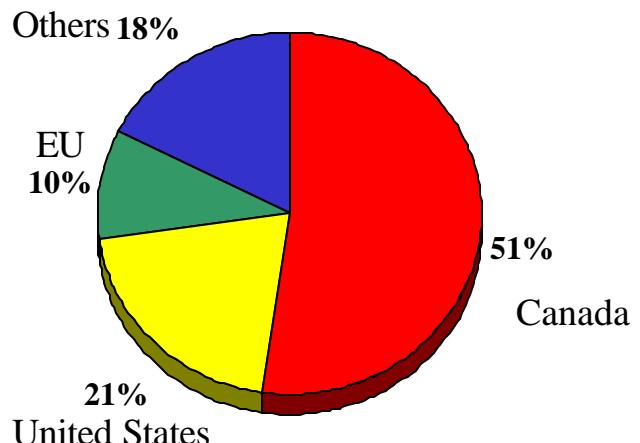

Canada: The world's largest durum exporter by far, Canada is increasing exports from last year's level (a 9-year low). Agriculture and Agri-Food Canada estimates 2003 durum production to be about 10 percent larger than the previous crop. Although exports are up, its two primary markets --North Africa (which last year took nearly 60 percent of Canada's durum exports) and the United States--have imported considerably less. Exports into the United States, in fact, have been extremely low as preliminary duties put in place as a result of an anti-dumping and countervailing duty case, since removed, made importing Canadian durum unattractive. In addition, a better quality U.S. durum crop resulted in millers increasing their dependence on the domestic crop. Canada has, however, benefited from a dramatic rise in EU imports, capturing the lion's share of this enlarged market.

United States: Durum exports from the United States have also recovered, as 2003 production was up from the previous crop--the smallest in nearly a decade. Sales are expanding, with exports currently estimated at more than a million tons--up 25 percent from last year. Exports have expanded this year into a smaller North African market, where there has been reduced EU competition, as well as into Venezuela.

U.S. commitments to the latter have already surpassed 150,000 tons, from less than 50,000 tons at this time last year.

Others: With tightening supplies in the EU--the third largest durum exporter--sales and shipments are down significantly this year. Through the end of March, export licenses awarded by the Commission are only half of last year's volume. **Mexican** exports (which go primarily to Algeria) are also expected to be down, as production has fallen due to reduced planted area, as well as acute water shortages. **Syria**, however, has

World Durum Exports
00/01-02/03 average

Others include Mexico, Australia, and Syria

emerged as a considerable supplier, exporting to North African and even European markets. Syria has built substantial stocks as production has consistently outpaced consumption. In order to maintain stocks at a reasonable level, the government has stepped up exports.

Outlook

World durum demand in 2004/05 could shrink if favorable weather continues in key Mediterranean markets. Expected higher production in the EU is expected to subsequently reduce this import market and raise exportable supply. With crop prospects currently favorable in North Africa, there could be a repeat of reduced demand. Smaller world demand, as well as greater EU exportable supply and a larger Canadian crop, could intensify competition between Canada and the United States.

WORLD MARKETS AND TRADE: COMMENTARY AND CURRENT DATA

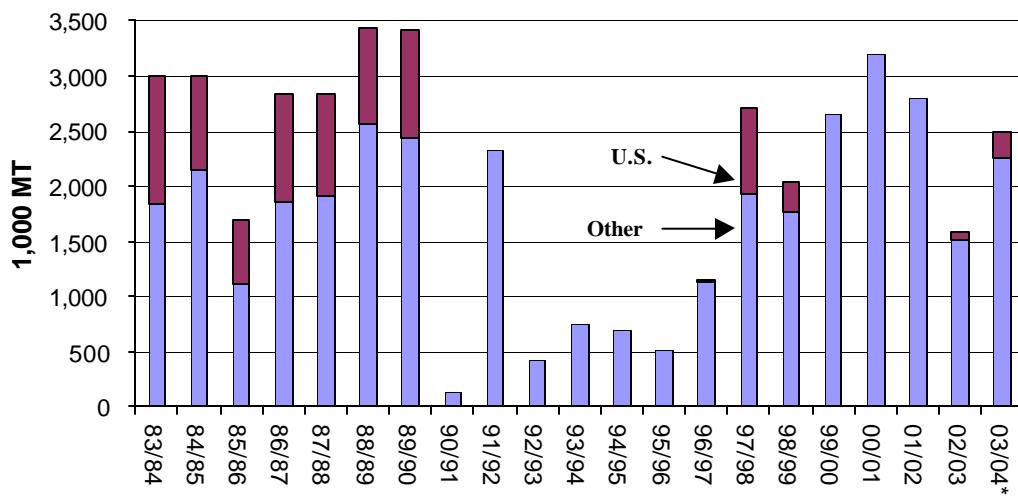

WHEAT: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

United States Sells Wheat to Iraq: For the first time since 1998, U.S. wheat has been exported to Iraq. In early January 2004, 31,600 tons of HRW were shipped, as a Russian firm was unable to fulfill an Oil-for-Food contract. Furthermore, in March 2004, the World Food Program (WFP) accepted two wheat tenders totaling 895,000 tons for April/June shipment. The WFP awarded 325,000 tons to the United States, 460,000 tons to Australia, and 110,000 tons to Argentina. Beginning April 1, the Iraqi Ministry of Trade's Grain Board (IGB) regained full procurement responsibility and recently issued a tender for 200,000 tons of wheat, which will close April 14.

Before the first Gulf War in 1991, the United States was the leading supplier of wheat to Iraq. Afterwards, other suppliers, most notably Australia, expanded their market share, especially when the Government of Iraq barred U.S. wheat in 1998.

**Iraq Wheat Imports
(Jul-Jun)**

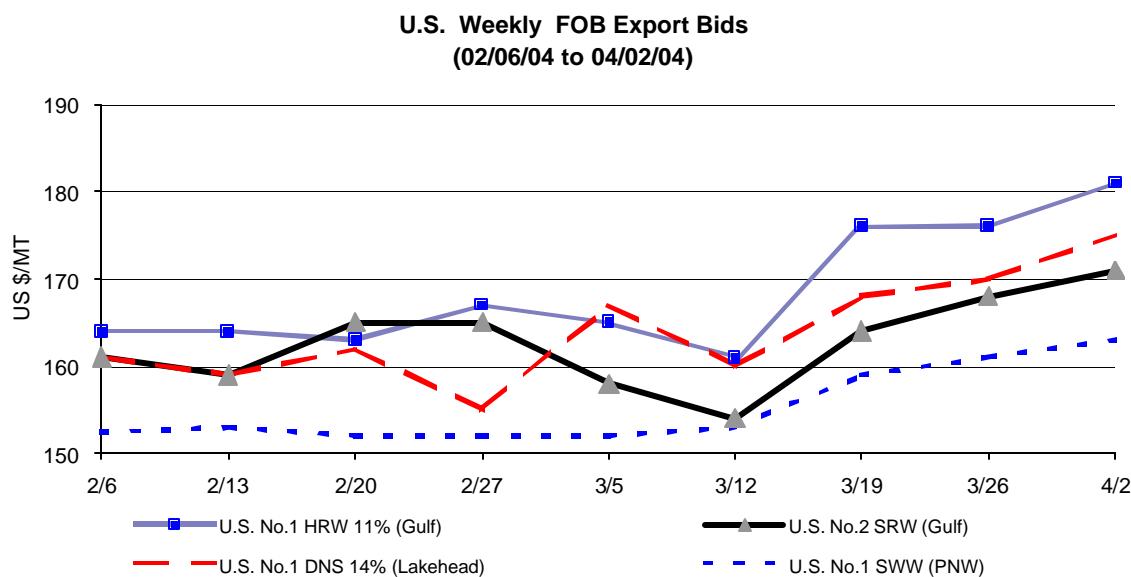

* Estimate based on U.S. 2003/04 Export Commitments

PRICES:

Domestic: Increasing competition, the slowing export pace, and improving weather sent most wheat prices down during the first two weeks of March. By the third week of the month, however, large export sales--combined with concerns over dry weather in the HRW belt--launched prices into a period of recovery. At the end of March, strong demand and tight stocks pushed U.S. prices higher than a month ago.

For the week ending April 2, average HRW and SRW prices were \$16 a ton and \$13 a ton higher, respectively, than those in the first week of March. HRS prices jumped by \$8 a ton while SWW ended the month with a gain of \$11 a ton.

TRADE CHANGES IN 2003/2004

Selected Exporters

- **China** up 300,000 tons to a record 2.5 million with continued flour and feed-quality wheat shipments to nearby markets.
- **Pakistan** down 200,000 tons to 100,000 due to the slow pace of exports.
- **United States** up 500,000 tons to 32.5 million--an 8-year high--with a strong pace of sales and shipments to date.

Selected Importers

-
- **Egypt** up 700,000 tons to 7.0 million--a 5-year high--due to robust imports and purchases to date.
 - **Iran** down 500,000 tons to 500,000--the lowest in nearly three decades--on reduced import demand, as government policy has encouraged greater self-sufficiency. Iran had been the largest import market in the world just 4-years ago. Note: Revisions to the stock and consumption series have been made.
 - **Iraq** up 750,000 tons to 2.5 million due to large, recent purchases that will allow the rebuilding of stocks.
 - **Jordan** down 300,000 tons to 700,000 as a result of the slow pace of imports to date.
 - **Mexico** up 300,000 tons to a record 3.7 million as lower production has necessitated larger import volumes from the United States and Canada.
 - **Morocco** up 400,000 tons to 1.9 million due to a larger than expected pace of imports and purchases to date.
 - **Pakistan** down 100,000 tons to 100,000, as recent cargoes of Australian wheat was rejected.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

RICE: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Peru Rice Shortage: Peru's import demand is estimated to increase fivefold from 40,000 tons to 200,000 due to drought-affected production and insufficient domestic stocks. As the bulk of the crop is harvested June through July, the trade anticipates that imports could be needed as early as August. While Uruguay, Peru's main supplier, will likely maintain its current level of exports, increased demand could potentially open the door to U.S. rice.

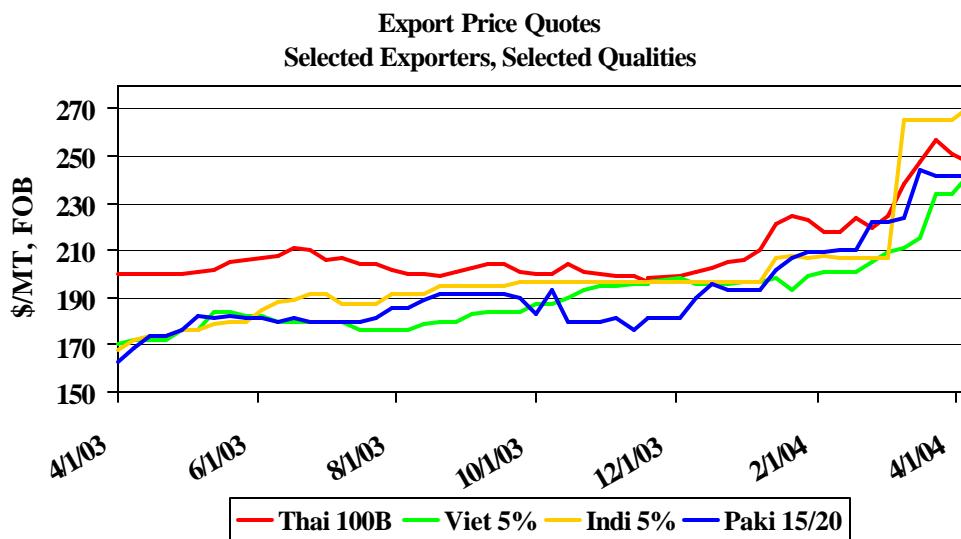

Peru Rice Imports

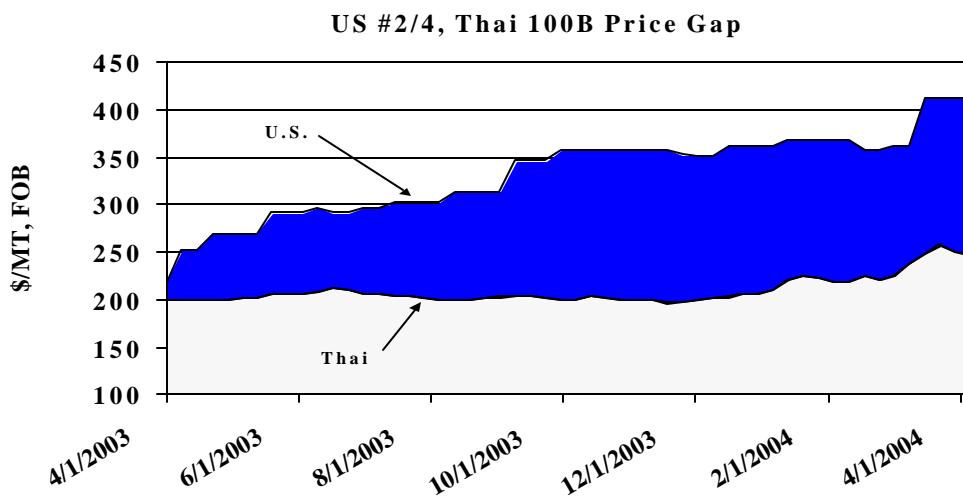

China Rice Import Update: In an effort to stem imports, China released about 1.0 million tons of japonica rice stocks in the northern province of Heilongjiang. This seems to have had the desired effect, as traders reported that some import contracts have been cancelled. Still, China's imports are now estimated to reach 1.0 million tons. Additionally, its exports are expected to drop by an additional 300,000 tons to 1.2 million.

PRICES:

International: Asian prices remain strong in the wake of China's entry into the market. In Thailand, 100B jumped to a 5-year high of \$257 per ton, FOB, in mid-March. Prices have since declined \$10 as China's demand seemingly waned with the release of government stocks, ending the month at \$247 per ton, FOB. In Vietnam, however, quotes continued to climb as tight exportable supplies, strong loadings, and insufficient inland freight seemingly eclipsed China's market presence. Viet 5% is up \$30 and currently quoted at \$241 per ton, FOB. In India, 5% is up \$5 to \$270 as traders compete to secure supplies for export.

Domestic: U.S. #2/4 long grain milled rice is currently quoted at \$412 per ton, FOB, flat month-to-month, maintaining a \$165 per ton spread between U.S. and Thai rice. Price quotes for U.S. #1/4 medium grain milled rice from California are at \$510 per ton, bulk, ex-spout Sacramento, also flat month-to-month.

TRADE CHANGES IN 2004

Selected Exporters

- The **United States** up 100,000 tons to 3.3 million based on anticipated greater demand from Latin America, specifically Peru and the Dominican Republic.
- Burma** down 200,000 tons to 300,000 based on the continuation of the government-imposed export ban.

-
- **China** down 300,000 tons to 1.2 million based on tight domestic supplies and internal distribution problems.
 - **Vietnam** down 500,000 tons to 3.75 million based on relatively tight exportable supplies.

Selected Importers

- **Bangladesh** down 100,000 tons to 400,000 due to smaller exports from neighboring India and Burma.
- **China** up 250,000 tons to 1.0 million based on continued purchases and imports of non-fragrant white rice from Thailand and Vietnam.
- **Dominican Republic** up 40,000 tons to 75,000 based on lower domestic supplies due to drought conditions.
- **Indonesia** down 750,000 tons to 1.25 million as a result of the temporary government ban on imports, ample domestic supplies, and relatively high world prices, which will likely deter demand.
- **Peru** up 160,000 tons to 200,000 based on lower domestic supplies due to drought conditions.
- **Philippines** down 100,000 tons to 900,000 due to sufficient domestic supplies, government purchases to date, scheduled government tenders, available private licenses, and food aid.
- **Senegal** down 75,000 tons to 750,000 based on sufficient domestic supplies and limited availability of fragrant brokens.
- **Turkey** down 150,000 tons to 200,000 due to a continuation of the government import ban.

TRADE CHANGES IN 2003

Selected Exporters

- **Argentina and Egypt** changes are based on year-end statistics.

COARSE GRAINS: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Egyptian Corn Imports Soften:

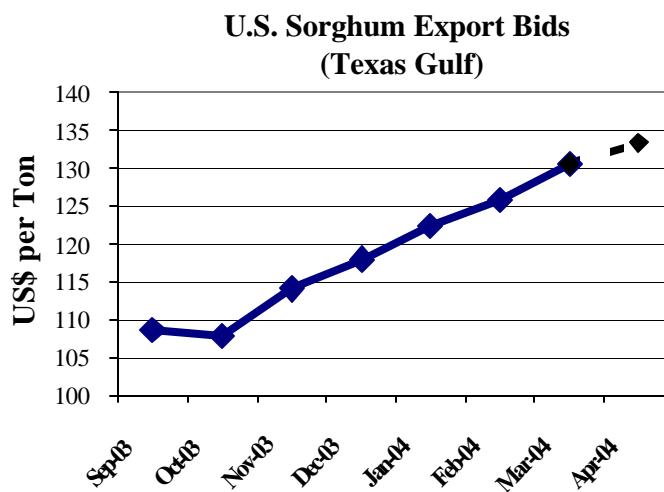

Devaluation of the Egyptian pound, combined with high world prices of corn, has made imports prohibitively expensive for some feed users in Egypt. As a result, some poultry farms have been forced to close down and feed consumption is expected to contract by 2 percent from 2002/03 to 8.9 million tons. Imports are also hampered by foreign exchange limitations for private companies, a chronic problem that has constrained trade over the past few years. Imports in 2003/04 are forecast to shrink by 7 percent to 4.5 million tons, a 5-year low. U.S. commitments to date, however, are at a record high, largely due to reduced competition from Argentina.

PRICES:

Domestic: Early April Gulf export bids for #2 yellow corn averaged \$136/MT, up \$7 from March and \$12 from February. These are the highest since September 1996. While prices are buoyed by continued strong domestic and export demand, the latest spike results from the less-than-expected 2004/05 acreage as indicated in the NASS Prospective Plantings report.

Early April export bids for #2 yellow sorghum (Texas Gulf) averaged about \$133/MT, up \$3 from March and \$25 from September. Sorghum remains at a \$4 premium to corn, down from \$6 in March but gaining \$2 since February. Shipments to the EU tapered off after February, but exports to Mexico were surprisingly strong in March.

The EU import duty on sorghum spiked in mid-January and new export sales dropped dramatically. However, the duty has now dropped nearly \$22 per ton since its high, mostly since April 1.

Import licenses under the *abatimento* for Spain and by other EU countries totaled 355,000 tons for February through April 1. It is likely that U.S. sorghum had already been shipped and that these licenses were for grain held in bonded warehouses in the southern EU.

TRADE CHANGES IN 2003/2004

Selected Exporters

- **Brazil corn** drops by 500,000 tons to 5.0 million, as logistical constraints from surging soybean exports are expected to slow down corn shipments in the coming months.
- **EU barley** is reduced by 500,000 tons to 1.5 million based on the tight domestic supply situation and the hiatus on most export tenders.

Selected Importers

- **Brazil corn** is up 200,000 tons to 600,000 based on shipments to date.
- **Egypt corn** is lowered by 200,000 tons to 4.5 million because high prices are constraining domestic feed demand.
- **China barley** decreases by 300,000 tons to 1.7 million as a result of a larger crop estimate for last year and a sluggish pace in recent months.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units cause some discrepancies with World Board Supply and Demand Estimates.

Notes:

Coarse grains trade data are on July/June years through 1975/76. From 1976/77 to the present, coarse grains data are on an Oct/Sept trade year. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade statistics exclude intra-EU15 trade.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade statistics exclude intra-EU15 trade.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Latin America: Central America, the Caribbean, South America.

EU: Austria, Belgium/Luxembourg, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Spain, Sweden, United Kingdom.

Other Western Europe : Azores, Cyprus, Iceland, Malta & Gozo, Norway, Switzerland.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, Estonia, Latvia, Lithuania. References to the FSU-12 include all of the above except for the Baltics (Estonia, Latvia, Lithuania).

Eastern Europe : Albania, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Hungary, Macedonia, Poland, Romania, Serbia and Montenegro, Slovakia, Slovenia.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Other Africa: all other African countries except North Africa.

South Asia: Afghanistan, Bangladesh, India, Nepal, Pakistan, Sri Lanka.

Other Asia: all other Asian countries except South Asia.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

The Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 03-04 March 2004. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 04-04 April 2004.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
