# Grain: World Markets and Trade

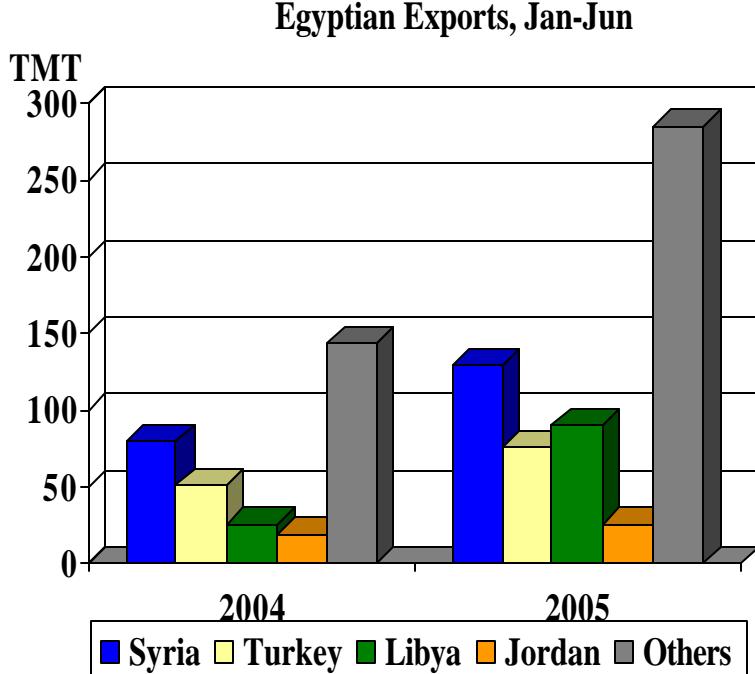

## Rice: Shake-up in Medium Grain Market Share

The medium grain market is experiencing unusual shifts in market share due to tight global supplies and moderate growth in import demand.

Australia's rice crop – virtually all medium grain – is now estimated to be the smallest in over 30 years as severe drought and limited irrigation continue to plague production and limit exportable supplies. Meanwhile, global medium grain trade is up slightly year-to-year. Although the vast majority of the trade is a direct result of World Trade Organization (WTO) import commitments (i.e., Japan, South Korea, and Taiwan) there is a small, yet significant, increase in import demand in some Middle East markets, such as Libya and Jordan. Consequently, while Australia is expected to try to maintain market share in the large WTO markets, its competitors – China, Egypt, and the United States – are picking up additional business in the smaller growth markets. In 2005, Egypt's exports are estimated to increase approximately 18 percent from 2004 and 50 percent from just a few years ago (2002) with more sales to the Middle East. The United States has also benefited from Australia's loss with larger exports to a handful of relatively small markets in the Middle East.

\* Medium grain trade is defined as medium grain exports to significant medium grain markets (i.e., Japan, South Korea, Taiwan, Libya, Syria, Jordan, and Turkey.)

# WORLD MARKETS AND TRADE: COMMENTARY AND CURRENT DATA

## WHEAT: WORLD MARKETS AND TRADE

### MONTHLY HIGHLIGHTS:

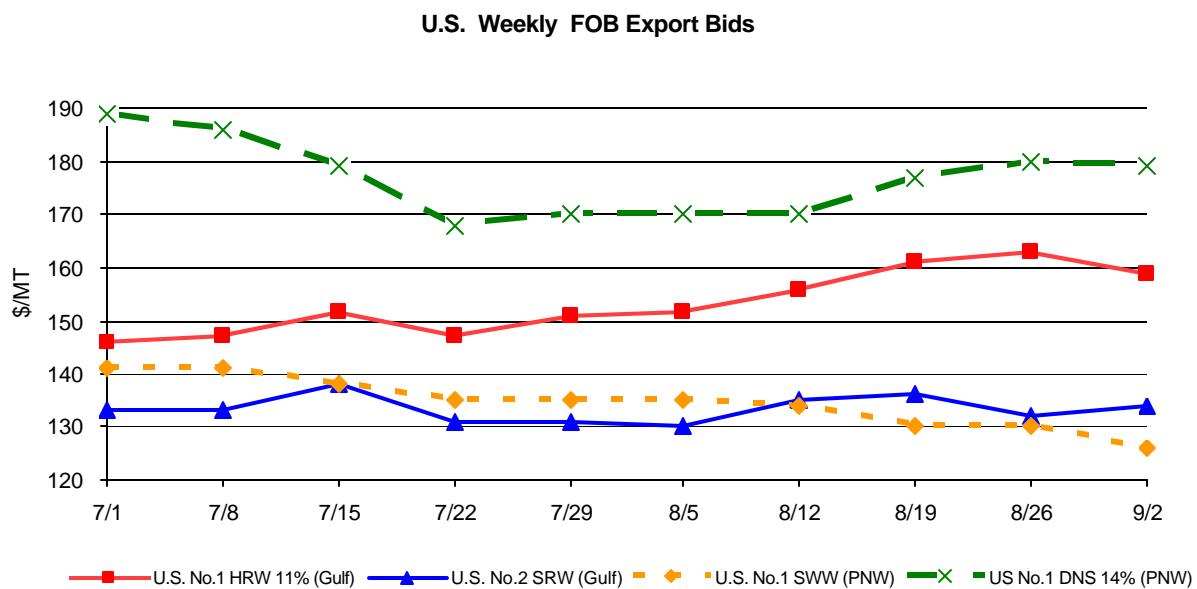

**Iraq Bright Spot for U.S. Exports in Middle East:** The recent emergence of Iraq as a key U.S. market has helped to offset the trend of smaller sales to other Middle East markets. U.S. exports to the region had been waning as the result of strong competition from low-priced supplies out of the Black Sea region and, in 2002/03, exports to the Middle East fell to a 30-year low. This marketing year, commitments to Iraq have surged to over 800,000 tons, the highest level since 1989/90, making it the second largest buyer of Hard Red Winter (HRW) wheat in the world.

**Effect of Hurricane Katrina on Wheat Exports Small Compared to Other Grains:** The aftermath of the hurricane temporarily shut down grain exports out of Mississippi River Gulf ports, which handle the majority of U.S. grain shipments. While these ports typically ship over two-thirds of corn and soybean exports, last year they accounted for less than a quarter of wheat exports. Soft Red Winter (SRW) is the primary class shipped out of this area, but SRW exports this year are expected at a 30-year low. For the week after the hurricane, revised USDA inspections data showed total U.S. corn shipments (from all ports) down 60 percent week to week, soybeans down 42 percent, but wheat shipments were actually up 15 percent.

## **PRICES:**

**Domestic:** Wheat prices were up sharply for hard wheat in August on strong demand for exports, especially for HRW. HRW prices were up \$8 a ton with Hard Red Spring up \$9 a ton and SRW prices up \$3 a ton. Soft White wheat prices, however, dropped \$9 a ton due to large supplies and prospects for a substantial stock buildup.

## **TRADE CHANGES IN 2005/2006**

### **Selected Exporters**

- **Argentina** is down 1.0 million tons to 7.0 million, less than half of last year's level. Production is expected to be sharply reduced with area at the lowest level in a decade.
- **Russia** is up 1.0 million tons to 10.0 million with very strong early-season sales and a larger crop. Production is forecast at the second highest level in 15 years.
- **Turkey** is raised by 400,000 tons to 1.6 million with strong flour demand in nearby markets.
- **Ukraine** is up 500,000 tons to 6.0 million with greater exportable supplies.

### **Selected Importers**

- **Nigeria** is increased by 400,000 tons to a record 3.4 million with rapidly expanding consumption and strong early-season purchases from the United States.

- 
- **United States** is up 300,000 tons to 2.2 million due to the expectation of stronger Hard White wheat grain and flour imports from Canada.

## **TRADE CHANGES IN 2004/2005**

### **Selected Exporters**

- **Canada** is up over 100,000 tons to 15.142 million in light of complete year-end trade data.
- **Russia** is up over 350,000 tons to 7.951 million, given complete year-end trade data.
- **Turkey** is up over 100,000 tons to 2.217 million due to complete year-end trade data.

### **Selected Importers**

- **China** is down nearly 250,000 tons to 6.747 million, reflecting year-end data.
- **Egypt** is up 100,000 tons to a record 8.1 million, given near-complete data.
- **Iraq** is up more than 200,000 tons to 3.01 million in light of year-end data.
- **Kenya** is cut by 150,000 tons to 500,000 with more complete data. A similar change was made to the 05/06 estimate.
- **Nigeria** is up 100,000 tons to a record 3.0 million, reflecting near-complete year-end trade data.
- **Yemen** is raised by 100,000 tons to 1.9 million, given near-complete data. A similar change was made to the 05/06 estimate.

## RICE: WORLD MARKETS AND TRADE

### MONTHLY HIGHLIGHTS:

**Thailand Plans to Sell Intervention Stocks:** The Commerce Ministry will issue a tender on September 13 to sell over 900,000 tons of stocks from the 2004/05 crop year. This will be the second tranche of stocks sold in the last couple of months. In mid-August the government sold 181,000 tons at near-market prices. These stocks must be exported on the international market.

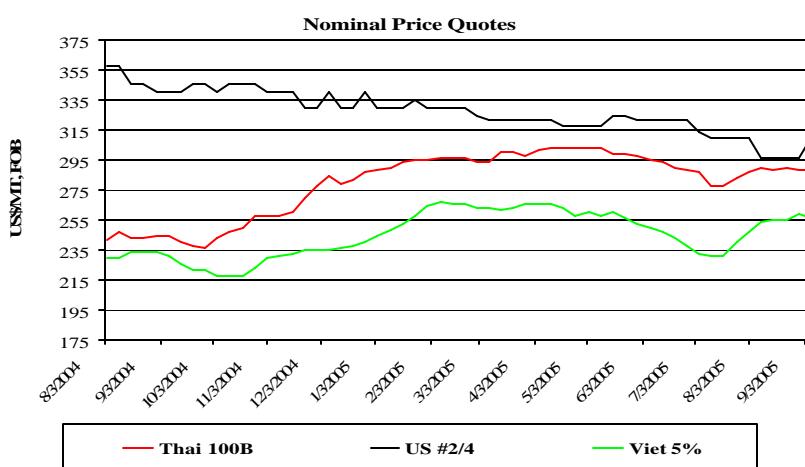

**Has Indonesia Decided to Lift the Import Ban?** Following weeks of speculation that BULOG (the government import entity) had been negotiating with Vietnam to import rice, the government confirmed that it will authorize up to 250,000 tons of imports. It has not specified origination of these imports, but they will likely be from Vietnam. Government officials have stated that imports will occur if domestic prices reach 3,500 rp/kg and stocks fall below 1.6 million tons. Currently, reports indicate that prices are on the rise but stocks are not yet near the critical trigger level. The trade believes that there are significant on-farm stocks as producers wait for further price increases during the Ramadan holiday.

**Katrina's Impact on Gulf Rice Shipments:** Nearly all U.S. long grain rice is exported via Gulf ports, which account for about 85% of total U.S. rice exports. Long grain rice exports are projected at 98 million cwt for 2005/06. Approximately 50 percent of U.S. rice exports are to the Western Hemisphere. Trade sources indicate that some rice shipments could be delayed a few weeks, but they do not expect a major impact to sales. The gulf rice harvest is virtually complete; however, heavy export shipments will likely not occur for several weeks yet.

Note: FGIS inspections are voluntary for rice shipments.

### PRICES:

**International:** Thai prices, after jumping \$11 last month, have stagnated. Price quotes for Thai 100B are down \$1 at \$288 per ton, FOB. Prices in Vietnam have also leveled off. Viet 5% quotes are currently up \$2 at \$256 per ton, FOB. India 5% is currently quoted at \$252 per ton, FOB, down \$5 from last month.

---

**Domestic:** U.S. prices increased by \$14 over the month, with #2/4 currently quoted at \$310 per ton, FOB. The medium grain market in California is in a state of flux. Prices for U.S. #1/4 milled rice have jumped up to \$100 per ton since last month, with quotes as high as \$450 per ton, FOB.

## **TRADE CHANGES IN 2006**

### **Selected Importers**

- **Nicaragua** is up 20,000 to 120,000 based on consumption growth.
- **Sri Lanka** is reduced 50,000 to 100,000 tons based on production increases in the 2005/06 crop.

## **TRADE CHANGES IN 2005**

### **Selected Exporters**

- **China** is raised 100,000 to 750,000 tons based on increased sales to Africa.
- With strong shipments to its Middle East markets, such as Libya, Syria, and Turkey, **Egypt** is up 150,000 to a record 1.0 million tons.
- Due to finalized food aid donations to North Korea, **South Korea** is increased to 400,000 tons.

### **Selected Importers**

- Once again, **Bangladesh** is raised 50,000 to 800,000 tons due to continued movement overland from India.
- **Costa Rica** is up 40,000 to 140,000 tons based on pace of exports from the United States.
- **Jordan** and **Libya** are both raised 25,000 tons due to larger shipments from Egypt.
- **North Korea** is boosted 100,000 to 600,000 tons due to increased food aid donations.
- **Sri Lanka** is reduced 50,000 to 100,000 tons due to weaker import demand in light of a larger crop.
- Sub-Saharan Africa is raised 375,000 to nearly 7.2 million tons due to increased import demand from several markets including **Cote d'Ivoire**, **Ghana**, and **Senegal**.

## COARSE GRAINS: WORLD MARKETS AND TRADE

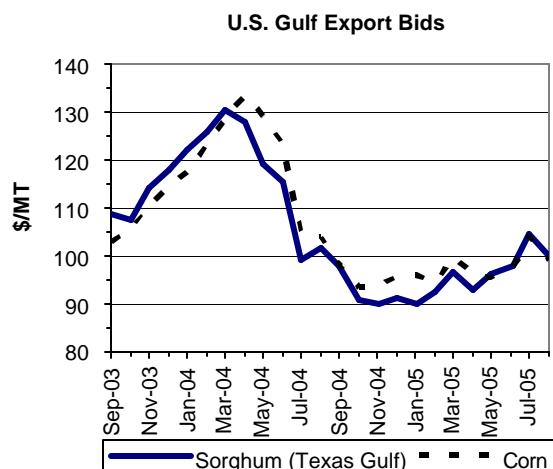

### MONTHLY HIGHLIGHTS:

**Katrina's Impact on Gulf Corn Shipments:** Hurricane Katrina's damage to the lower Mississippi River and Gulf export facilities is causing a significant setback to U.S. corn shipments in the short run. About 70 percent of U.S. corn exports are shipped through the Mississippi River Gulf ports. Japan, the world's largest importer, imports on average 950,000 metric tons a month from that area. According to some industry sources, however, the impact may be tempered by the diversion of some shipments to the West Coast. If most of the loading capacity can be restored in the next few weeks, the impact on U.S. exports should be fairly modest. Although the 2004/05 U.S. export estimate is cut by 1.5 million tons this month, largely on account of Katrina, the 2005/06 forecast is raised by 1.5 million tons. This is partly in anticipation of a compensatory surge over the next few months, as well as increased shipments to Mexico and Egypt.

### PRICES:

**Domestic:** August export bids for #2 yellow corn averaged just over \$99/MT, down more than \$5 from July. Improved crop prospects, together with late-month disruptions caused by the hurricane, have affected prices.

August export bids for #2 yellow sorghum (Texas Gulf) dropped nearly \$5 to average nearly \$100/MT. Sorghum export values have slumped as new crop bids are in the market and disruptions are anticipated from the hurricane. Sorghum and corn remain at similar values.

### TRADE CHANGES IN 2005/2006

#### Selected Exporters

- **United States corn** is up 1.5 million tons to 51.5 million due to larger demand from Mexico and Egypt and an expected compensatory surge in exports after the Gulf facilities are restored.
- **United States sorghum** is raised by 200,000 tons to 4.7 million based on prospects for increased trade with Mexico.
- **Australia barley** is increased by 500,000 tons to 4.3 million based on higher-than-expected production and strong China demand.

- 
- **Turkey barley** is up from zero to 100,000 tons due to recent sales.

### **Selected Importers**

- **Egypt corn** is raised by 500,000 tons to 5.3 million because of increasing feed demand.
- **Iran corn** is up 300,000 tons to 2.3 million based on a burgeoning demand as indicated by rapid purchases.
- **Mexico corn** is raised by 500,000 tons to 6.7 million on account of reduced domestic production.
- **China barley** is increased by 300,000 tons to 2.1 million, the highest in 5 years, due to strong growth in malting barley consumption.
- **Mexico sorghum** is up 200,000 tons to 3.7 million, the highest in 4 years, due to tight feed grain supplies.

### **TRADE CHANGES IN 2004/2005**

#### **Selected Exporters**

- **United States corn** is cut by 1.5 million tons to 44.5 million because of Hurricane Katrina and a sluggish pace in the past 2 months.
- **Ukraine corn** is up 200,000 tons to 2.3 million based on accumulated shipments.
- **Australia sorghum** is down 100,000 tons to 400,000 because of a slow export pace.
- **United States sorghum** is down 100,000 tons to 4.6 million as a result of the slowdown in shipments caused by Hurricane Katrina.

#### **Selected Importers**

- **Iran corn** is up 200,000 tons to 2.5 million on the basis of strong demand from the poultry sector.
- **Japan corn** is lowered by 300,000 tons to 16.5 million due to Hurricane Katrina's impact on U.S. Gulf exports.
- **Taiwan corn** is lowered by 200,000 tons to 4.5 million based on a slower-than-expected pace in recent months.
- **Mexico sorghum** is down by 300,000 tons to 3.1 million. A slow import pace is exacerbated by expected disruption from the hurricane.

Notes:

Trade year statistics are on a July/June year for wheat and an Oct/Sep year for coarse grains.

The Coarse Grains category includes barley, corn, millet, oats, rye, and sorghum.

Production estimates are on a clean-weight basis.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units cause some discrepancies with World Board Supply and Demand Estimates.

Notes:

Coarse grains trade data are on July/June years through 1975/76. From 1976/77 to the present, coarse grains data are on an Oct/Sept trade year. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

---

## **ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE**

### **REGIONAL TABLES**

**North America:** Canada, Mexico, the United States.

**Latin America:** Central America, the Caribbean, South America.

**EU:** Austria, Belgium/Luxembourg, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

**Former Soviet Union:** Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

**Other Europe:** Albania, Azores, Bosnia and Herzegovina, Bulgaria, Croatia, Gibraltar, Iceland, Macedonia, Norway, Romania, Serbia and Montenegro, Switzerland, Yugoslavia.

**Middle East:** Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen

**North Africa:** Algeria, Egypt, Libya, Morocco, Tunisia.

**Other Africa:** all African countries except North Africa.

**South Asia:** Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

**Southeast Asia:** Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

**East Asia:** China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

**Oceania:** Australia, Fiji, New Zealand, Papua New Guinea.

### **OTHER NOTES**

**Stocks:** Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

**Consumption:** World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

**EU Consolidation:** The trade figures for the EU-25 for the years 1999/00 through 2002/03 are inflated by the two-way trade between the two groups (EU-15 and acceding 10). Over the past 6 years, this “intra-trade” has averaged about 700,000 tons for wheat, 350,000 tons each for corn and barley, and 150,000 tons for rye. The trade figures also include intra-trade between members of the acceding 10. From 2003/04 onward, all intra-trade has been removed.

**Statistics:** (1) Wheat trade statistics include wheat, flour, and selected products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

---

**Unaccounted:** This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

**Note:** The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 08-05 August 2005. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 09-05 September 2005.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
