

Grain: World Markets and Trade

Despite A Record Global Grain Crop Forecast, Stocks Are Still Expected To Shrink In 2007/08

Grain Consumption Continues to Outstrip Production

World Stocks Fall Again

The global grain market is expected to remain tight in 2007/08, as rapidly expanding consumption once again outstrips production. Consequently, world stocks are expected to be drawn down for the third straight year, falling to the lowest level in more than 25 years. As a result, grain prices are expected to be sustained at relatively high levels. With stocks already expected to come down in some key exporters, any further reduction in crop prospects could raise prices even more.

The global tightness in corn is driven by use in the United States where, despite sharply larger acreage and forecast record production, the rapid expansion of use for ethanol will continue to cause tight stocks. For wheat, global consumption growth is more modest, and production is expected to recover in the United States, Australia, and the Black Sea region. However, smaller exportable supplies in other traditional exporters (Canada, EU-27, Argentina) mean that the international market remains tight. For rice, consumption is forecast to exceed record production, causing global stocks to continue to shrink.

The Foreign Agricultural Service (FAS) updates its production, supply and distribution database for cotton, oilseeds, and grains at 9 a.m. on the day the World Agricultural Supply and Demand Estimates (WASDE) report is released. It is available on the FAS website (<http://www.fas.usda.gov/psdonline/>). This circular is released at 9:30 a.m. on the same day, together with its downloadable data set.

Circular Modifications:

The following changes are incorporated into this May 2007 Circular:

- **EU Consolidation:** The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00. EU-25, Bulgaria, Romania data as of April 2007 can be found at: <http://www.fas.usda.gov/grain/circular/2007/05-07/graintoc.htm>.
- **Other Europe region:** Bulgaria and Romania were moved to the EU region. Serbia and Montenegro are now treated as separate countries (data starts with 2006/07). Montenegro data will be updated as it is available.
- There were historical revisions to several countries and commodities.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports differs from global totals shown elsewhere.

Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug).

WHEAT: WORLD MARKETS AND TRADE

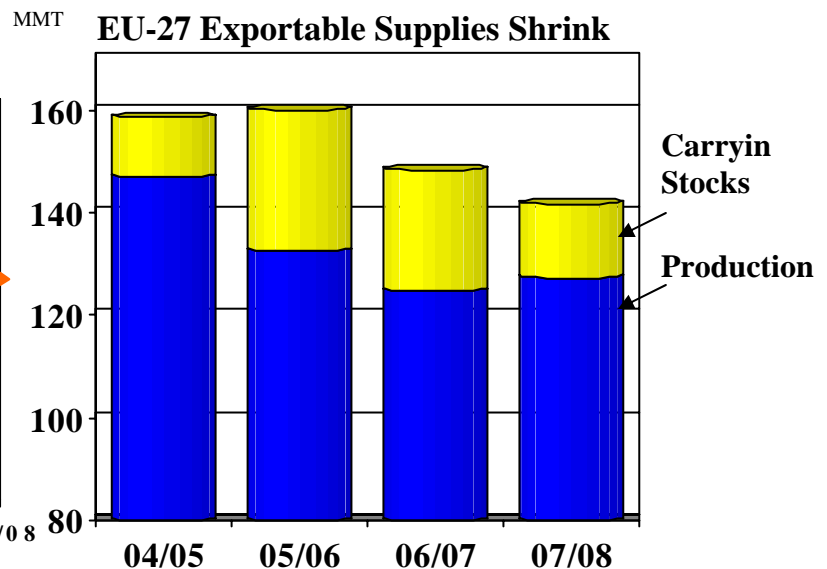

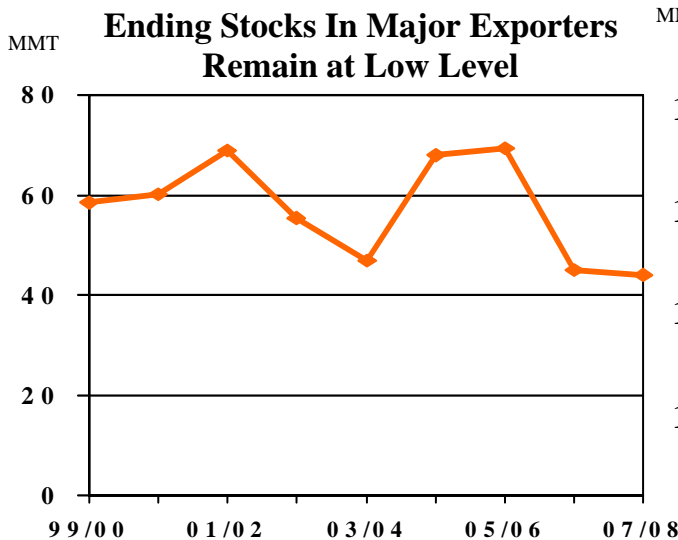

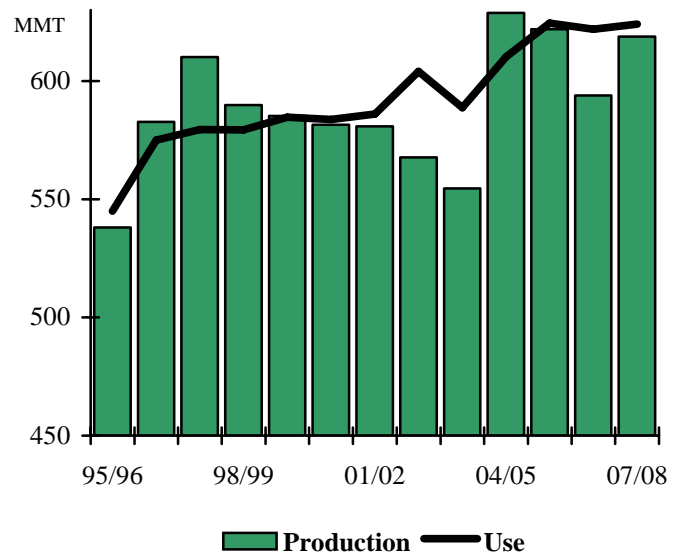

The world wheat market is forecast to remain tight in 2007/08 despite a substantial boost in production. Global consumption is projected to rebound slightly, with high prices expected to restrain growth and import demand. Global trade is thus forecast nearly unchanged year to year. With consumption expected to outstrip production, global ending stocks are forecast to fall to their lowest levels in 25 years.

HIGHLIGHTS FOR 2007/08

Selected Exporters

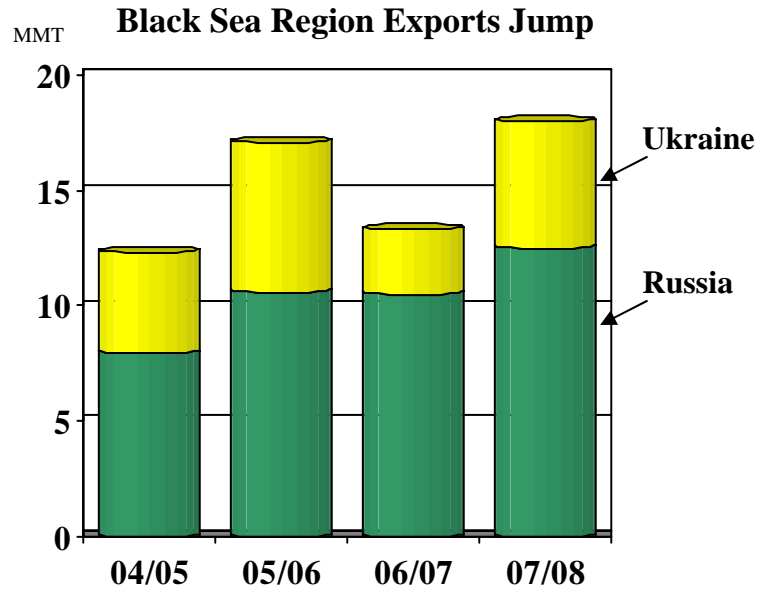

A key factor for the world wheat market is reduced exportable supplies in several major exporters. In the **EU-27**, dryness has hit wheat crops, with total production only expected to be slightly above last year's below-average harvest. Sharply reduced carryin stocks, however, including depleted intervention stocks, could mean less exportable supplies, especially if the Commission finds it necessary to restrict exports in order to dampen high domestic prices. **Argentine** exports are also forecast to fall as production shrinks because acreage is shifted to more profitable crops. **Canada** is expected to reduce shipments as stocks were drawn down significantly this past year and new crop production is expected smaller. Wheat area is likely to shrink in favor of canola.

Production Remains Below Consumption

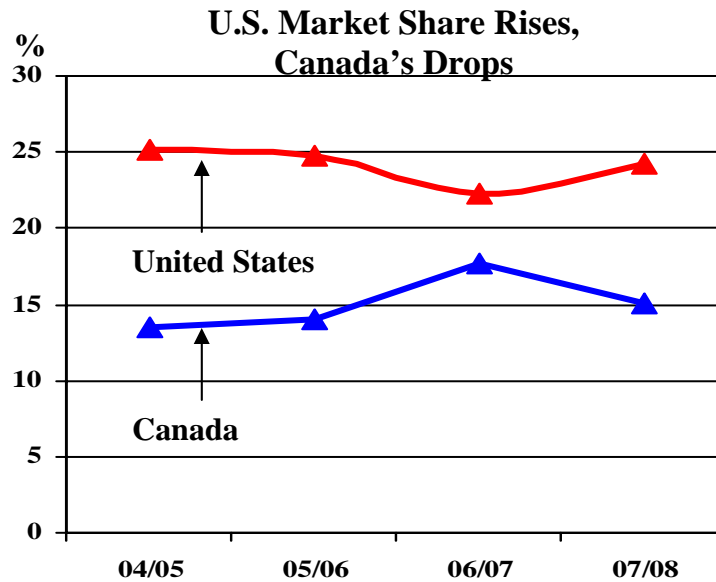

Grain: World Markets and Trade, May 2007

Less exportable supplies from those countries, however, will be partially offset by expected big wheat crops in **Russia** and **Ukraine**. Russian exports are forecast at near record volumes, and will likely displace reduced EU shipments into key Mediterranean markets. Russia has become the largest supplier to Egypt during the past two years, and that will likely continue. While Ukrainian exports in 2006/07 were curtailed by government export quotas to protect tight domestic supplies, a bumper harvest should alleviate that concern and provide much more grain to be exported, especially to the European Union.

Australian exports are forecast to jump on a recovery in production from last year's drought ravaged crop. However, that supply will not be available for another 6 months when the new crop is harvested. As always there is a lot of uncertainty regarding the size of this crop and it will likely be a major factor for the global market.

United States production, especially for hard wheats, is expected to be more abundant, and exports of these wheats will benefit from reduced competition from high-protein Canadian and European supplies. U.S. soft wheat, however, will face intensified competition from the large Black Sea region crops. Overall, exports are forecast higher and U.S. market share is expected to rise.

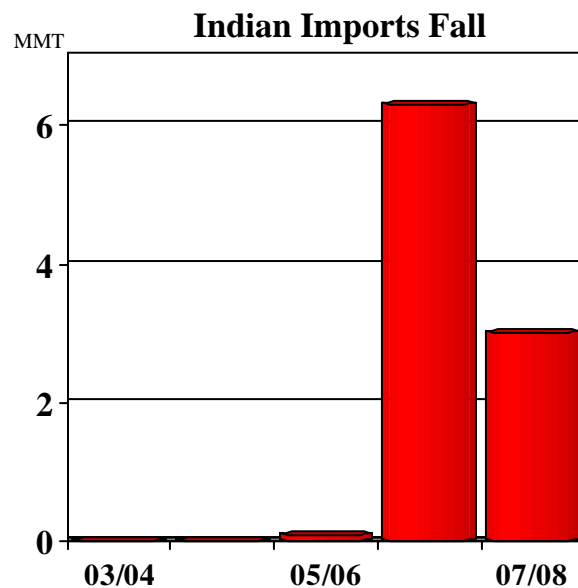

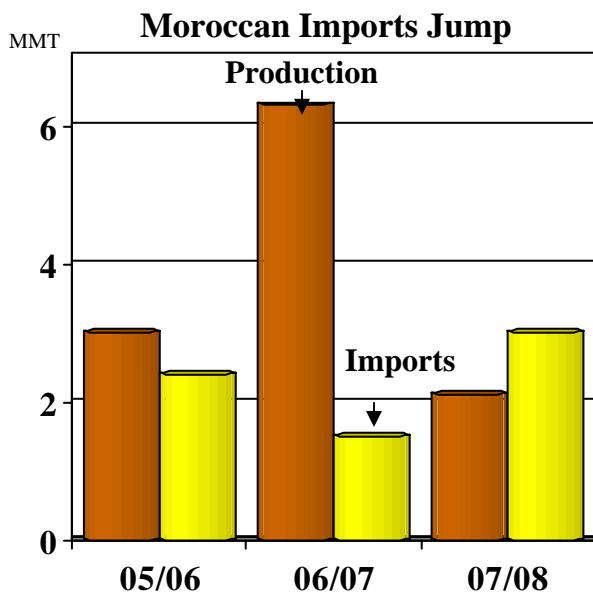

Selected Importers

India is expected to continue to be an important importer this coming year, although volumes are likely to be smaller as a result of a larger domestic harvest. However, government procurement is down as farmers reportedly hold supplies for higher prices. The government has consequently already taken the unusual step of opening a million ton import tender even though the domestic harvest has only recently been completed. Elsewhere in Asia, imports by **China** and **Pakistan** are expected to be relatively unchanged at fairly low levels and both of countries will continue to be net exporters.

With greater supplies of feed-quality wheat from the Black Sea region available, markets such as **EU-27** and **Israel** are expected to boost imports. European Union import quotas for low and medium quality wheat could be completely filled this coming year, as opposed to 2006/07 when there was a dearth of Ukrainian supplies during the second half of the season.

North African imports are expected to rise, driven by a much smaller crop in **Morocco** where conditions have been dry. **Egypt** is expected to purchase slightly more wheat, and regain its spot from Brazil as the world's largest wheat import market.

In the Western Hemisphere, less import demand is expected for **Brazil** as high domestic prices stimulate acreage expansion and production. Imports, however, will still remain at the second highest level in 6 years and will likely account for the vast majority of Argentina's exports. **Mexican** imports are forecast largely unchanged, although with a larger Hard Red Winter crop U.S. sales could replace some Canadian sales. **United States** imports are estimated down from last year, primarily as a result of smaller soft wheat imports expected from a short crop in Ontario.

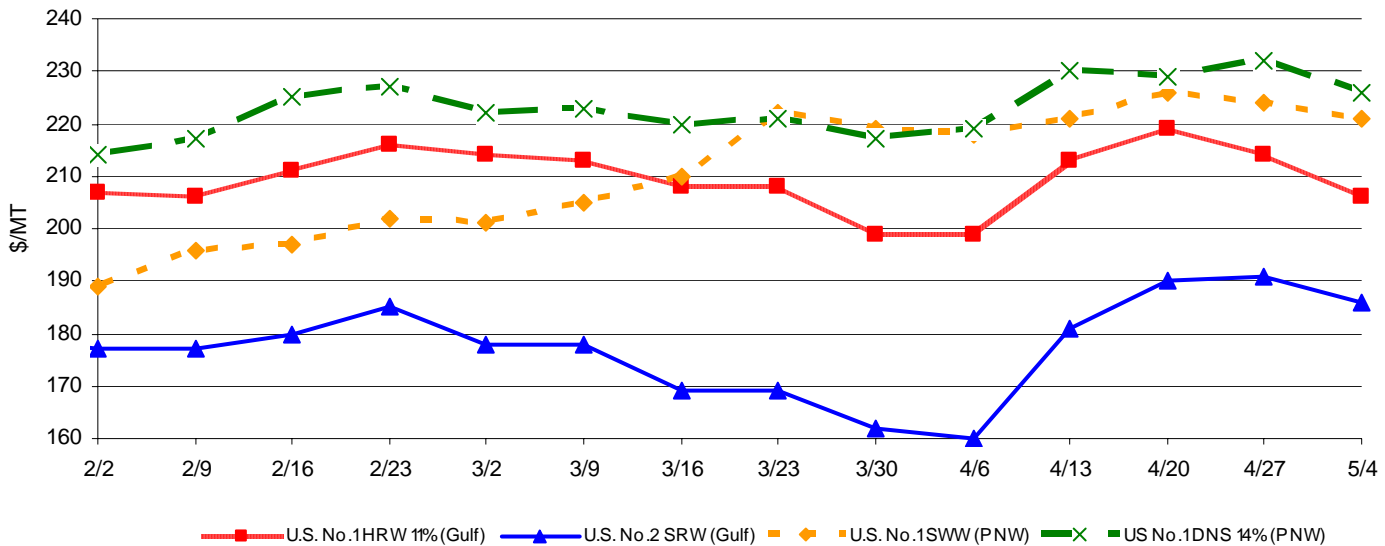

Grain: World Markets and Trade, May 2007

PRICES:

Domestic: For April, Hard Red Winter (HRW) and Soft Red Winter (SRW) prices jumped on the recent US Easter freeze, but eased on reports of improved crop prospects. For the month, HRW rose \$7 per MT, with Hard Red Spring (HRS) up \$7, SRW up \$26, and Soft White (SWW) up \$3.

U.S. Weekly FOB Export Bids

TRADE CHANGES IN 2006/2007

Selected Exporters

- **Argentina** is up 500,000 tons to 10.5 million on continued strong shipments.

Selected Importers

- **Bangladesh** is down 200,000 tons to 1.9 million on slow import pace.
- **Sudan** is down 200,000 tons to 1.2 million on sluggish imports.

Note: Japan's stock and consumption series has been revised from 1996/97-2006/07.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

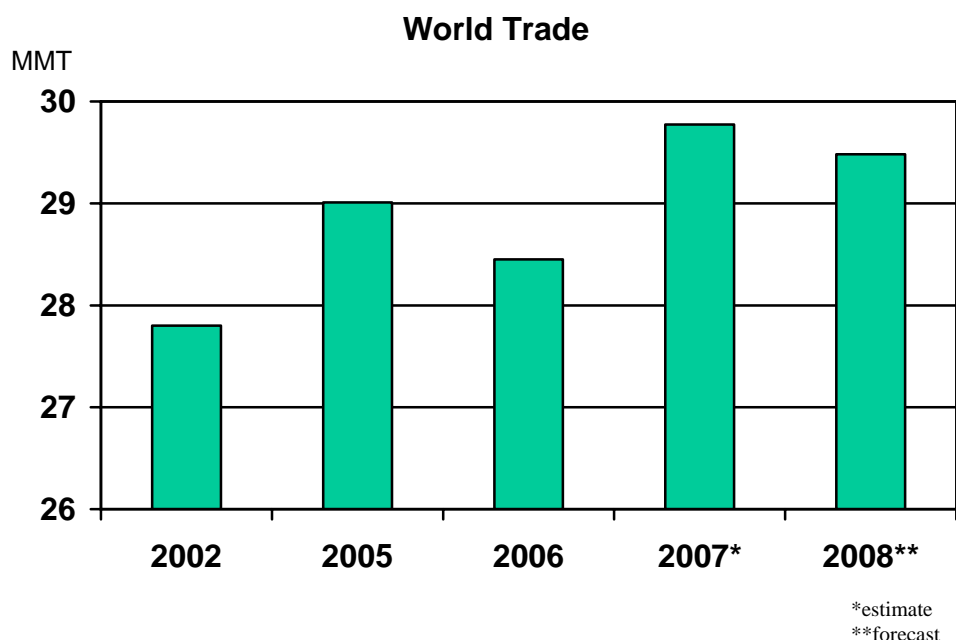

RICE: WORLD MARKETS AND TRADE

Global production in 2007/08 is projected at 421 million tons (milled basis), up fractionally, with larger crops forecasted for Pakistan, China, Bangladesh, and Thailand. Global consumption continues to outpace production and is expected to grow 5.5 million tons to 424 million. Consequently, ending stocks are expected to continue their downward trajectory, dropping almost 4 million tons to 72 million. Although India is the main reason, stocks in the rest of the world are also forecast to decline, albeit at a slower rate.

Global trade is projected to be virtually unchanged. Indonesia is expected to drive world imports again as a result of strong demand and low stocks. In other markets, less import demand from Bangladesh and Malaysia is offset by higher imports by the Philippines, Brazil, and China.

On the supplier side, India's exports are expected to be down as a result of tighter supplies and high domestic food grain prices. Vietnam's exports are also expected to be down. However, larger exports by Thailand, Egypt, Pakistan, and Uruguay are supported by increased production and strong world prices. The United States is expected to lose ground in export markets due to tight supplies and reduced price competitiveness.

MONTHLY HIGHLIGHTS 2007

PRICES:

International: Thai 100B is currently quoted at \$324 per ton, FOB, unchanged from last month as good production offsets strong demand and a relatively strong currency. Nominal prices in Vietnam are down \$4 from last month. Viet 5% is currently quoted at \$300 per ton, FOB. Prices for India and Pakistan for lower grades remain strong. In the case of India, strong demand, both domestically and for export, have helped support prices.

Domestic: U.S. prices continue to soften month to month, with U.S. #2/4 long grain milled rice quoted at \$412 per ton, FOB, down \$5. The spread between comparable qualities of Thai and U.S. rice continues to narrow and is now at \$88 per ton. Prices for U.S. #1/4 medium grain milled rice from California are currently quoted at \$525 per ton, FOB, down \$10 from last month.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

COARSE GRAINS: WORLD MARKETS AND TRADE

**Coarse Grain Production
Narrowly Below Use**

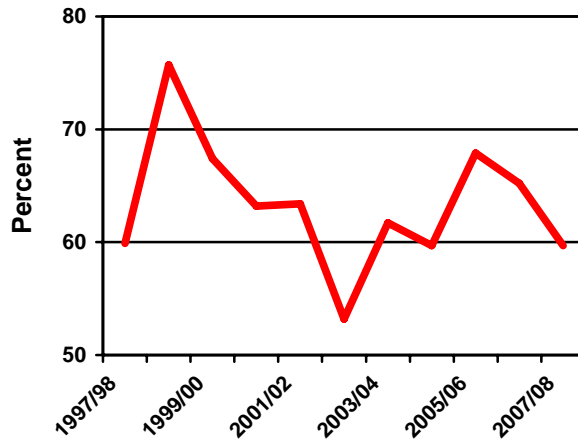

**Coarse Grain Trade
Little Changed but Remains High**

World **coarse grain** production in 2007/08 is forecast to be sharply higher than last year and a new record. With global consumption expanding by over 40 million tons, ending stocks are forecast to drop to their lowest levels in over 30 years. World trade is little changed, although it remains at a higher plane.

Global **corn** production is forecast at a record 767 million tons, up sharply from 2006/07. Similarly, consumption is projected to climb to a record 769 million tons. This gain is led by growth in corn used for ethanol in the United States, although foreign consumption continues to expand at an average of nearly 15 million tons annually. World corn trade is expected to be virtually unchanged from last year's record. However, U.S. exports and market share are forecast to drop because of renewed competition from the Southern Hemisphere. China is expected to remain a net exporter but at diminished levels. Mexico's imports will rise sharply. (Note that the forecast for 2007/08 assumes that cracked corn imports cease and that all imports are bulk corn. This reflects expected changes with the final phase-in of NAFTA in January 2008.)

**U.S. Corn Market Down Amidst
Renewed Competition**

Global **barley** trade is projected to rebound as a result of higher production and consequently lower prices in most key exporters. Australian production is forecast to recover from last year's drought ravaged crop, and regain its spot as a primary supplier. In addition, Black Sea region crops are expected to be large again this year, with Ukraine forecast to remain the world's largest

exporter. These ample exportable supplies are expected to boost global imports, especially as key Australian markets such as China and Saudi Arabia can return to more normal buying patterns. Imports by Morocco are also expected to jump, as dryness has cut domestic production by more than half.

Global **sorghum** trade is forecast at 5 million tons, up 10 percent year to year, although still within the long term downward trend. Mexico's imports are forecast at 3 million tons, up sharply year to year, as a result of much larger U.S. exportable supplies. Larger crops in the United States and Australia are expected to be offset by smaller ones in the Sub-Saharan Africa.

Global **oat** trade continues to be dominated by U.S. demand. Canadian supplies are forecast to be the largest in nearly 30 years as a result of sharply higher plantings, but much of this increased supply will likely go into feed channels. Scandinavian oat production is forecast higher, and EU exports are expected to be up slightly.

Global **rye** trade is expected to continue to shrivel and largely disappear. With EU-27 intervention stocks now largely nonexistent, the primary source of global exports has vanished, leaving primarily only small quantities of cross-border trade.

HIGHLIGHTS FOR 2006/07

Selected Exporters

United States corn is lowered 1.0 million tons to 55.0 million based on a slowdown in the pace of sales and shipments.

Argentina corn is down 500,000 tons to 13.0 million because of slow new-crop sales in light of government actions.

Brazil corn is up 250,000 tons to 5.8 million based on updated trade data.

China corn is raised 1.0 million tons to 4.5 million amid indications of additional corn export quotas.

Paraguay corn is raised 300,000 tons to a record 1.4 million because of a bigger crop.

Selected Importers

Japan corn is lowered 300,000 tons to 16.2 million, the lowest in 7 years. Despite an early-season surge, recent U.S. sales and shipments have slowed markedly.

Mexico corn is raised 500,000 tons to a record 8.5 million because of higher feed demand.

South Africa corn is reduced by 250,000 to 800,000 tons because of a higher production forecast.

South Korea corn is raised 400,000 tons to a record 9.2 million as the country continues to seek corn in place of scarce feed-quality wheat and because of increasing meat consumption.

Vietnam corn is raised by 300,000 tons to a record 650,000 because of continued growth in the feed sector and trade with surrounding countries.

China barley is lowered 200,000 tons to 1.8 million as shipments have slowed resulting from sharply reduced malting barley supplies in Australia.

Notes: Stocks, exports and consumption are expressed on a milled basis in marketing years. "Stocks as a Pe represents the ratio of marketing year ending stocks to total consumption.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama.

Caribbean: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Cuba, Dominica, Dominican Republic, French West Indies, Grenada, Guadeloupe, Haiti, Jamaica and Dep, Leeward-Windward Islands, Martinique, Montserrat, Netherlands Antilles, Puerto Rico, Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands, Virgin Islands of the U.S.

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands (Islas Malvinas), French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela.

EU: Austria, Belgium/Luxembourg, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Croatia, Former Yugoslavia, Gibraltar, Iceland, Macedonia, Montenegro, Norway, Serbia, Switzerland.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Sub-Saharan Africa: all African countries except North Africa.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA

database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Field Crops and Livestock Branch, Industry and Sector Analysis Division, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-6590.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 04-07 April 2007. For further details on world grain production, please see World Agricultural Production Foreign Agricultural Service Circular WAP 05-07 May 2007.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
