

Grain: World Markets and Trade

World Rice Exports At A Record Level, Prices Continue to Increase

World rice exports are projected at a record level in 2008. Prices have continued to strengthen, especially in the past 2 months, as commodity prices in general have risen and the value of the dollar has dropped. Since September, price quotes for U.S. #2/4 have jumped \$66 per ton to \$478 per ton, the highest since March 1994. U.S. export commitments are 44 percent higher than a year earlier, mostly due to heavy forward buying by regular customers. In Thailand, the world's largest exporter, 100 B quotes are up \$8 per ton from a month ago to \$340. Global prices are also being supported by export bans imposed by Vietnam (on all rice) and India (on non-basmati and high-value rice only). Until these bans are lifted, Thailand, the United States, Pakistan, and China will be the only major suppliers of rice to global markets.

Global prices will likely remain strong throughout 2008, as global ending stocks in 2007/08 are projected to be the smallest in 25 years. Rising production costs will also continue to push rice prices higher.

WHEAT: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Russian Shipments Propelled on Strong Demand: The Russian export pace exploded in the last 3 months due to demand in the Mediterranean and the Middle East. With lower EU-27 exportable supplies and Ukraine's imposition of a highly restrictive export quota, many buyers in the region have been looking for alternate suppliers. For the last few months, primarily the United States, Canada, and Russia had wheat to offer for sale. However, Russia has a clear logistical and price advantage due to proximity, which translates into lower freight rates, and sells cheaper lower quality wheat. This is relevant since some buyers in the region are price sensitive, such as Egypt, Yemen, and Tunisia. Another reason for part of the escalation in shipments was because Russia announced a 10 percent export tax starting in November. Russian competition has not stopped higher U.S. exports to the region, as buyers have been scrambling for supplies of higher quality wheat such as HRW and durum, as well as lower protein classes such as SRW.

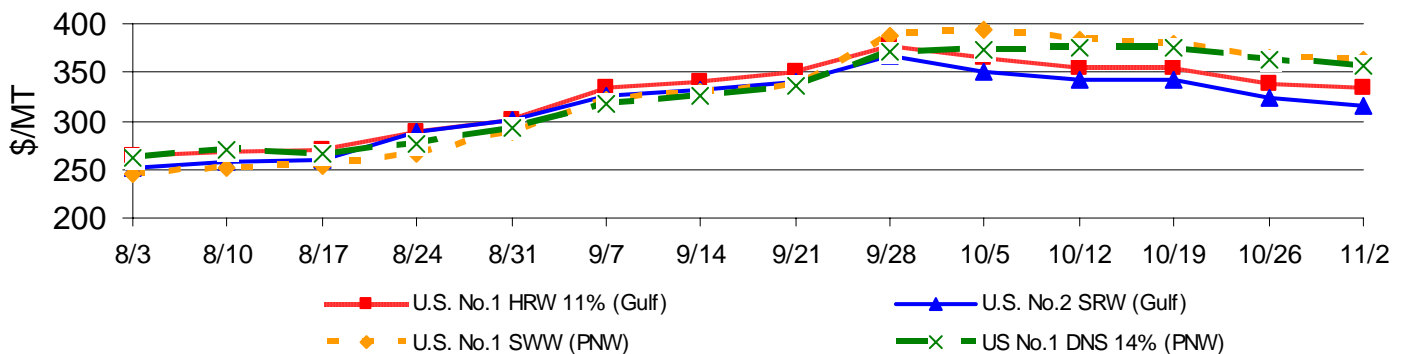

Monthly Russian Exports Surge

PRICES:

Domestic: For October, wheat prices for all classes plunged on slowing export sales and import demand. For the month, Hard Red Winter (HRW) fell \$26 per ton, Hard Red Spring (HRS) fell \$10, Soft Red Winter (SRW) fell \$28, and Soft White (SWW) fell \$29.

TRADE CHANGES IN 2007/2008

Selected Exporters

- **Argentina** is up 1.0 million tons to 11.0 million on higher production.
- **Australia** is down 500,000 tons to 8.0 million, the lowest in 13 years, on lower production due to devastating weather conditions.
- **EU-27** is down 500,000 tons to 9.5 million because of a sluggish export license pace, a 9-year low.

Selected Importers

- **Azerbaijan** is up 300,000 tons to 1.0 million on expected strong demand.
- **China** is down 300,000 tons to 200,000 because of higher production that reduces the need for additional purchases.
- **India** is down 1.0 million tons to 2.0 million due to high international prices and less reliance on the international market by the Public Distribution System (PDS).
- **South Korea** is down 400,000 tons to 3.0 million on expected smaller imports of feed-quality wheat.

COARSE GRAINS: WORLD MARKETS AND TRADE

PRICES:

Domestic: U.S corn export prices averaged \$172 per ton in October, up over \$5 from September prices. Strong export demand and indications of a smaller crop have kept prices firm. Sorghum prices remain high (although down \$12) at \$201 per ton because of solid foreign demand.

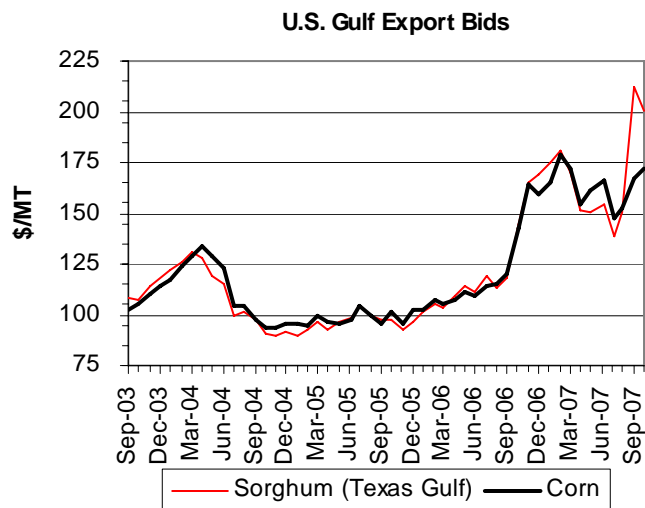

TRADE CHANGES IN 2007/2008

Selected Exporters

- **India corn** is doubled to 500,000 tons because of improved crop prospects.
- **South Africa corn** is boosted by 200,000 tons to 1.0 million. New crop supplies will find strong regional demand.
- **Australia barley** is slashed 300,000 tons to 2.0 million due to a cut in production.
- **EU-27 barley** is up 200,000 tons to 4.2 million because of steady demand from North Africa and limited competition.
- **United States barley** is up 500,000 tons to 1.0 million, the highest in 7 years, because of strong sales to Japan.
- **Argentina sorghum** is boosted by 200,000 tons to 1.0 million due to strong demand from EU- 27 as evidenced by new-crop export registrations.
- **United States sorghum** is raised 400,000 tons to 7.0 million, the highest in 16 years, due to strong demand from EU-27.

Selected Importers

- **Canada corn** is boosted by 300,000 tons to 2.3 million because of strong purchases. Corn is very competitive against other grains, which have attractive international prices and are being exported.
- **Japan corn** is raised 200,000 tons to 16.3 million reflecting a more gradual slowdown in meat production.

-
- **South Korea corn** is cut by 300,000 tons to 8.8 million (following a similar cut with final trade data for 2006/07). Although corn is continuing to substitute for scarce feed-quality wheat, other nongrain feed ingredients (e.g., distiller's grains and tapioca) are reducing the need for corn.
 - **Venezuela corn** is boosted by 200,000 tons to 500,000 in light of strong poultry production.
 - **Saudi Arabia barley** is boosted 200,000 tons to 6.0 million as imports are not expected to be effected by high prices (2006/07 was increased 300,000 tons based on updated trade data).
 - **United States barley** is raised 150,000 tons to 300,000 because of tight stocks resulting in an increased need for Canadian malting barley supplies.
 - **EU-27 sorghum** soars by 700,000 tons to a record 3.7 million. Import licenses and outstanding purchases of U.S. sorghum reflect the shortage of feed grains.
 - **Mexico sorghum** is cut by 500,000 tons to 2.0 million, the lowest in over a decade, due to a higher crop estimate, the slow pace of sales, and availability of U.S. corn.

TRADE CHANGES IN 2006/2007

Selected Exporters

- **Argentina corn** is up 500,000 tons to 15.5 million as shipments continue at a record pace.
- **Paraguay corn** is raised nearly 250,000 tons to 2.0 million, a record, with final trade data. The country has expanded trade with Brazil. (Brazil's imports are raised 150,000 tons to 1.2 million, the highest in 7 years.)

Selected Importers

- **Egypt corn** is raised 200,000 tons to 4.8 million based on near-final trade data.
- **South Africa corn** is raised 200,000 tons to 1.0 million, the highest in over a decade, amid reports of tightening supplies.
- **China barley** is dropped 173,000 tons to 1.1 million based on final trade data and reflects tightness in the global malting barley trade because of reduced Australian exportable supplies.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA

database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.
