Exporter Stocks Decline as Foreign Wheat Consumption Exceeds Production

*Kazakhstan, Russia and Ukraine

**Argentina, Australia, Canada, and the EU

Foreign consumption is currently projected to outpace production as exportable supplies in the EU and Russia fall, and production shortfalls in Turkey and Syria are boosting import demand.

Although global wheat stocks are expected to be relatively unchanged year-to-year, exporter stocks are projected to decline. Black Sea regional stocks are expected to shrink, particularly in Russia. However, the ending stocks in the United States are projected higher and expected to account for nearly 50 percent of traditional exporter stocks. The United States is positioned to take advantage of any future production shortfalls, which would likely translate into higher demand for U.S. wheat exports.

WHEAT: WORLD MARKETS AND TRADE

PRICES:

Domestic prices: Prices of all classes of wheat dropped in the month of May. Hard Red Spring (HRS) plunged \$24/ton to \$238. The beginning of the harvest is pressuring Hard Red Winter (HRW) prices, which declined \$13/ton to \$179. HRW also fell below Soft Red Winter (SRW), an unusual event. SRW declined \$16/ton to \$182. Technical market factors continue to keep SRW prices uncompetitive in world markets. Soft White Wheat (SWW) declined \$10/ton to \$175, just slightly below HRW.

RICE: WORLD MARKETS AND TRADE

Prices Continue Downward Trend but with Fewer Bumps

PRICES

International: Price quotes have dropped by half over the past 2 years but with a lot of bumps along the way. Quotes lurched when governments announced or cancelled plans to buy or sell rice. Over the last 6 months, however, this price volatility has diminished as the frequency of these announcements decreased. Philippines has been out of the market, Thailand has not released large quantities of stocks, India has not come into the market, Iraq's purchases have been relatively predictable, and Vietnam has not announced export restrictions. In addition, although quotes continue to slide, the difference between the origins has become more stable. Quotes for Thai 100B and U.S. #2/4 have converged, and quotes for Vietnamese 5% have held around 20-25 percent lower. Though the volatility has subsided, buyers are still wary, unsure how low prices will go and when governments might intervene.

Domestic: U.S. #2/4 long grain milled rice quotes slid another \$22 this month to \$467 per ton, FOB, as global demand remains quiet. California medium grain #1/4 quotes, on the other hand, jumped \$90 per ton, FOB, to \$700 on strengthened demand and little competition from Egypt, the only other major supplier.

COARSE GRAINS: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHT:

Ukrainian exportable supplies of corn (production plus beginning stocks) have more than tripled over the last 10 years. About half of this growth has gone to exports; during the same period, domestic feed use has tripled. Ukraine is now consistently the fourth largest corn exporter in the world, with over 60 percent of its trade normally going to North Africa and the Middle East. The United States and Argentina will continue to face strong competition from Ukraine in these regions.

PRICES:

Domestic: From May through early June, U.S. corn export prices fell \$15/ton to \$156. Favorable early-season crop conditions in the United States, lack of new China sales, and expectations of large crops in competitor countries pressured prices. U.S. prices still remain at an unusual seasonal discount to Argentina on a FOB-to-FOB basis.

Brazilian quotes were unavailable for the months of April and May.

TRADE CHANGES IN 2010/11

Selected Exporters

- **Argentine corn** is up 500,000 tons to 13.5 million on record-tying production for the crop now being harvested.
- **Ukrainian corn** is up 500,000 tons to 5.5 million on record crop prospects.

Selected Importers

- **Mexican corn** is expanded 500,000 tons to 9.6 million on lower production.
- **Philippine corn** is up 200,000 tons to a record 600,000 because of reduced carryin supplies resulting from a cut in production.
- **Vietnamese corn** is raised 300,000 tons to a record 1.3 million on rapidly expanding feed demand (similarly, imports in 2009/10 are up 400,000 tons to 1.3 million).

TRADE CHANGES IN 2009/10

- **Argentine corn exports** are raised 1.0 million tons to 13.0 million on strong shipments.
- **Chinese corn imports** are raised 700,000 tons to 1.0 million, the highest in 14 years, based on trade data and reported U.S. sales.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period following the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2008/09 starts in 2008); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2008/09 starts in 2009). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	EU-27 (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
EU-27 (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled

equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Field Crops and Livestock Branch, Industry and Sector Analysis Division, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular.
