Black Sea Wheat Replaces U.S. Supplies in North Africa and Middle East

*Black Sea countries here include Russia, Ukraine, and Kazakhstan

■ Middle East ■ North Africa

*2011/12 is exports through January. There are negligible outstanding sales to these markets.

Black Sea countries' wheat exports are estimated to rebound as production jumped 33 million tons, nearly 50 percent, from last year and Russia and Ukraine lifted their export restrictions. The most dramatic recovery is in Russian exports, which are estimated at a record, barring government intervention. Much of these shipments are going to Mediterranean markets where Russia and Ukraine normally have a comparative freight and logistical advantage vis-à-vis the United States.

Last year, U.S. wheat exports to North Africa and the Middle East surged as a result of the aforementioned export restrictions. For example, the United States exported nearly 4 million tons to Egypt, whereas this year U.S. exports are negligible to date. In contrast, this year Russia has already exported 5 million tons to Egypt through December, nearly half of Egypt's estimated import demand. Meanwhile, total U.S. exports are estimated to drop nearly 30 percent, despite expanding global trade.

WHEAT: WORLD MARKETS AND TRADE

OVERVIEW

Global trade for 2011/12 is up marginally this month as a result of strong demand for feed-quality wheat. U.S. exports are raised slightly on the continued strong pace of shipments and recent sales. Russian exports are up primarily due to the government announcement of no export restrictions for the remainder of the year. The forecast U.S. season-average farm price is raised reflecting prices received to date and remains a record.

PRICES:

U.S. Weekly FOB Export Bids

Domestic: Prices for all wheat classes rose in January partly due to unsubstantiated rumors of Russian export curbs and weather concerns over new-crop winter wheat production in Ukraine and the EU. Soft White Wheat (SWW) surged \$34 to \$268/ton and Soft Red Winter (SRW) was up \$19 to \$272 per ton on strong demand. Hard Red Winter (HRW) was \$12 higher at \$304 per ton, and Hard Red Spring (HRS) was up \$14 to \$367 per ton.

TRADE CHANGES IN 2011/12

Selected Importers

- **Saudi Arabia** is raised 300,000 tons to 2.3 million due to purchases of feed-quality wheat.
- **Mexico** is up 200,000 tons to 4.2 million reflecting strong demand for feed-quality wheat from the United States.

Selected Exporters

- **Argentina** is boosted 500,000 tons to 9.7 million with additional export licenses issued.
- **Brazil** is doubled to 1.0 million tons based on January shipments to Africa and reports of sales to the EU.
- **Canada** is lowered 500,000 tons to 17.5 million on account of increased competition with the United States and South America.
- **India** is down 300,000 tons to 700,000 due to the lack of competitiveness with Black Sea countries.
- **Russia** is raised 1.0 million tons to a record 20.5 million, on account of the strong export pace and the government announcement of no export curbs for the remainder of the trade year.
- **Ukraine** is reduced 1.0 million tons to 6.0 million on the slow export pace and missed sales of feed-quality wheat to the EU.
- **United States** is raised 500,000 tons to 25.5 million on recent sales of Soft Red and Soft White Winter wheat to Mexico and South Korea which will likely be used in livestock and poultry feeding.

RICE: WORLD MARKETS AND TRADE

OVERVIEW

Global trade is up from last month on strong and unexpected demand from Egypt. Larger Indian exports are forecast to more than offset reductions in Thailand and Vietnam. Global stocks remain high as production outpaces consumption. U.S. exports were adjusted slightly lower.

FEATURE

A confluence of unusual events gives the three major rice exports similar market share. Thailand's exports are forecast to drop as their paddy pledging scheme is driving up domestic quotes. Conversely, Indian exports surged due to the recent lifting of its export ban on non-basmati rice, huge stocks, and low prices. Vietnam exports remain steady compared to India and Thailand.

SELECTED TRADE CHANGES FOR 2012

Selected Exporters

- **India** is boosted 1.5 million tons to 6.0 million on large exportable supplies.
- **Thailand** is dropped 500,000 tons to 6.5 million on uncompetitive prices and lower demand for Thai exports.
- **Vietnam** is down 200,000 tons to 6.5 million on increased competition from India.

Selected Importers

- **Egypt** is raised 480,000 tons to 500,000 on government purchases of foreign rice in lieu of higher priced domestic supplies.

COARSE GRAINS: WORLD MARKETS AND TRADE

OVERVIEW

Global coarse grains trade for 2011/12 is boosted 1.4 million tons, largely because of higher EU corn imports. World production is lowered on Argentine corn crop prospects. U.S. corn exports are boosted although the U.S. corn season-average farm price is unchanged.

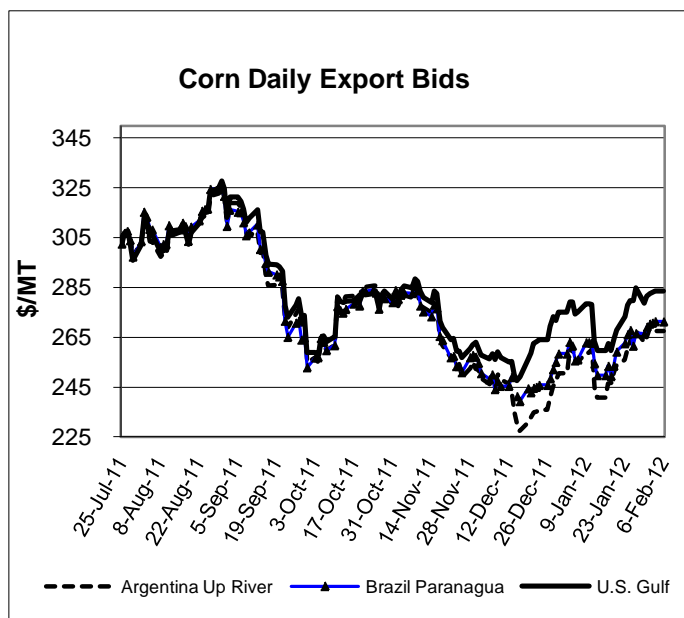

PRICES

U.S. corn export quotes rose slightly throughout the past month based on growing concerns over the Argentine crop. Prices ended at \$283/ton, \$20/ton higher than at the time of the January WASDE release. The discount between U.S. and Argentine prices has narrowed by about \$10/ton throughout the past two months.

TRADE CHANGES IN 2011/12

Selected Exporters

- **U.S. corn** is boosted 1.5 million tons to 43.5 million based on reduced competition from Argentina.
- **Argentine corn** is slashed by 3.5 million tons to 14.0 million because of sharply lower new crop prospects caused by drought and extreme heat.
- **Brazilian corn** is boosted 500,000 tons to 9.0 million because of reduced Argentine competition and better prospects for second-crop (winter) corn.
- **EU corn** is raised 500,000 tons to 2.5 million due to stronger licenses.
- **Russian corn** is raised 200,000 tons to 1.2 million based on strong early-season shipments.
- **South African corn** is lowered 300,000 tons to 3.0 million as old-crop supplies of yellow corn tighten and the country becomes less competitive. (Imports are boosted 200,000 tons to 300,000.)
- **Ukrainian corn** is raised 2.0 million tons to 14.0 million as loadings take priority over wheat and barley (both lowered this month).

-
- **Argentine barley** is boosted 500,000 tons to a record 2.9 million based on record production and reported large shipments of barley to Saudi Arabia.
 - **Canadian barley** is raised 300,000 tons to 1.0 million due to a strong export pace through January.
 - **EU barley** is up 300,000 tons to 2.8 million on export licenses.
 - **Kazakh barley** is up 300,000 tons to 550,000 on reports of large shipments through December.
 - **Russian barley** is up 300,000 tons to 2.3 million based on exports to date.
 - **Ukrainian barley** is cut 1.0 million tons to 3.4 million on sluggish exports and strong competition from Argentina.
 - **Argentine sorghum** is lowered 300,000 tons to 2.0 million on a smaller crop caused by adverse weather conditions.

Selected Importers

- **Brazilian corn** is up 300,000 tons to 800,000 because of strong early-season shipments from Paraguay.
- **Canadian corn** is cut 400,000 tons to 1.0 million based on stocks data that implies weak demand.
- **EU corn** is raised 1.0 million tons to 4.0 million on larger-than-expected licenses.
- **Saudi barley** is up 300,000 tons to 7.5 million based on reported large shipments from Argentina.
- **EU barley** is raised 250,000 tons to 350,000 based on import licenses to date.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period following the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2008/09 starts in 2008); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2008/09 starts in 2009). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled

equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.
