

Grain: World Markets and Trade

Resurgent Global Wheat Production Not Sufficient to Rebuild Stocks

Black Sea: Kazakhstan, Russia, and Ukraine.
Traditional: Argentina, Australia, Canada, EU, and the United States.

Global wheat production is expected to significantly recover from last year, with the Black Sea accounting for nearly 70 percent of that growth. Production is also projected higher in all traditional exporting countries, except the United States.

Contrary to expectations that the production rebound will result in higher stocks and lower prices, the world is not awash in wheat. Exporters' ending stocks are expected to remain tight because of sharp draw-down in 2012/13 and this year's higher domestic feed use. Major exporter supplies are typically available to world markets. However, in the past, some governments (e.g. Russia, Ukraine, and Argentina) have restricted exports, regardless of stock availability. India remains a wild card as an exporter because it still has substantial stocks of low-quality wheat and unpredictable policies.

Despite the abundant global crop and lower import demand, prices are expected to be firmer than they were 2 years ago, when production was at a similar level. Higher global consumption is expected to underpin prices.

The Foreign Agricultural Service (FAS) updates its production, supply and distribution database for cotton, oilseeds, and grains at 12:00 p.m. on the day the World Agricultural Supply and Demand Estimates (WASDE) report is released. It is available on the FAS website (<http://www.fas.usda.gov/psdonline/>). This circular is released at 12:30 p.m. on the same day, together with its downloadable data set.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports and therefore differs from global totals shown elsewhere.

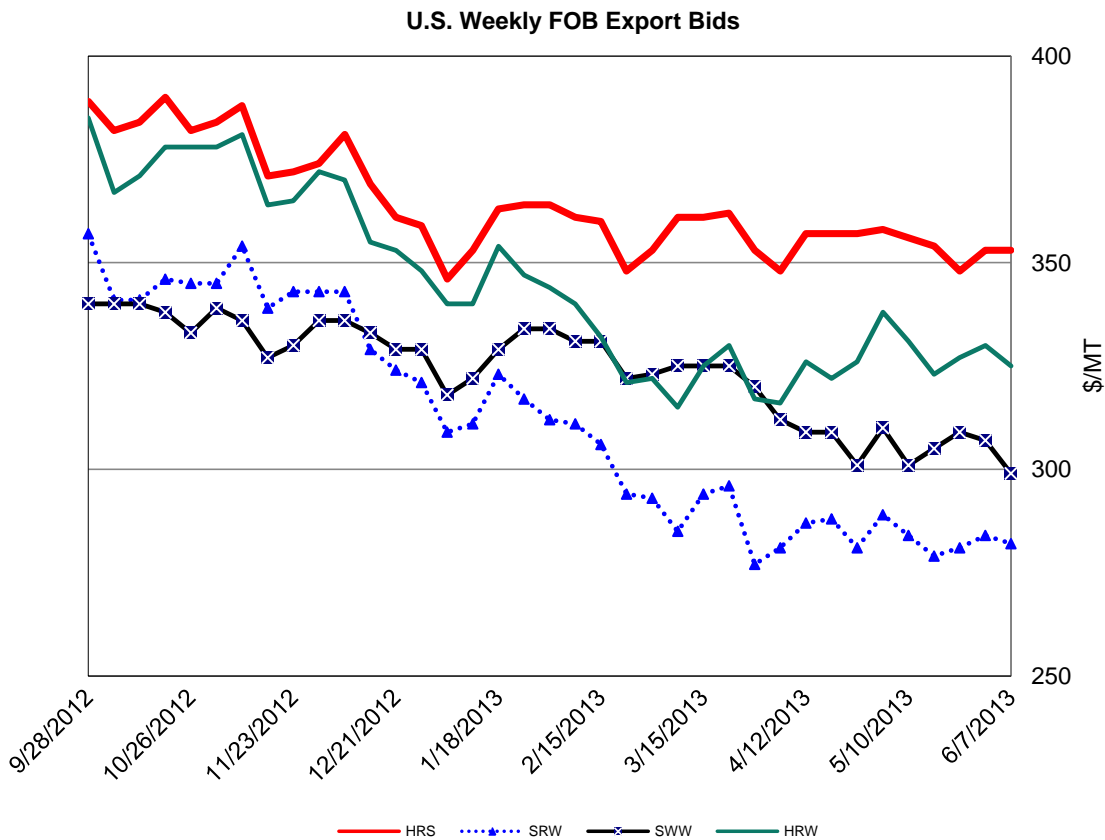

Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug).
'Marketing Year' column is germane for U.S. wheat only.

WHEAT: WORLD MARKETS AND TRADE

OVERVIEW

Global production for 2013/14 is down and trade is up slightly. U.S. exports are raised 1 million tons as strong early-season sales combined with tight pre-harvest supplies in other exporting countries boost opportunities. The season-average U.S. farm price is up from last month because of projected tighter supplies and higher U.S. corn prices. For 2012/13, U.S. exports were lowered.

PRICES:

Domestic: Wheat prices for all classes were down over the past month. Hard Red Winter (HRW) dropped the most, \$13/ton to \$325, as the crop nears harvest. Despite tight supplies, Soft White Wheat (SWW) fell \$11/ton to \$299 reportedly over concerns about potential trade disruptions from the discovery of genetically engineered wheat in Oregon. Soft Red Winter (SRW) was \$2/ton lower to \$282, as harvest delays caused by cool temperatures and excessive rainfall in the Midwest support prices. Hard Red Spring (HRS) dropped \$5/ton to \$353.

TRADE CHANGES IN 2013/14

Selected Exporters

- **Canada** is raised 500,000 tons to 19.0 million on increased competitiveness, particularly in the Middle East as a result of tightening Black Sea supplies.
- **EU** is boosted 1.5 million tons to 18.5 million as a result of tightening Black Sea supplies.
- **Russia** is cut 1.0 million tons to 17.0 million on expectations of a smaller crop.
- **Ukraine** is lowered 1.5 million tons to 8.0 million on a smaller crop projection.
- The **United States** is up 1.0 million tons to 26.5 million as large early-season sales boost expectations of strong shipments over the next few months.

Selected Importers

- **EU** is cut 500,000 tons to 6.0 million due to lower projected imports of feed-quality wheat because of tighter Black Sea supplies.
- **Iran** is doubled to 2.0 million tons as recent purchases of EU wheat indicate higher demand.

TRADE CHANGES IN 2012/13

Selected Exporters- based on trade data

- **Australia** is up 1.5 million tons to 20.5 million.
- **Brazil** is up 300,000 tons to 2.0 million.
- **Canada** is up 300,000 tons to 18.8 million.
- **Russia** is up 350,000 tons to 11.1 million.
- **EU** is up 500,000 tons to 22.0 million.
- **India** is cut 500,000 tons to 8.0 million.
- **United States** is cut 700,000 tons to 27.3 millions.

Selected Importers

- **Egypt** is raised 500,000 tons to 8.5 million as a result of larger-than-expected imports by the private sector.

RICE: WORLD MARKETS AND TRADE

OVERVIEW

Record global production in 2013/14 is forecast to outpace consumption, leading to a build-up of stocks. Trade is adjusted lower for 2013 and 2014, on the basis of both reduced exports from Thailand and imports by Nigeria. U.S. production, consumption, stocks, and trade all remain lower for 2013/14, compared to 2012/13 levels.

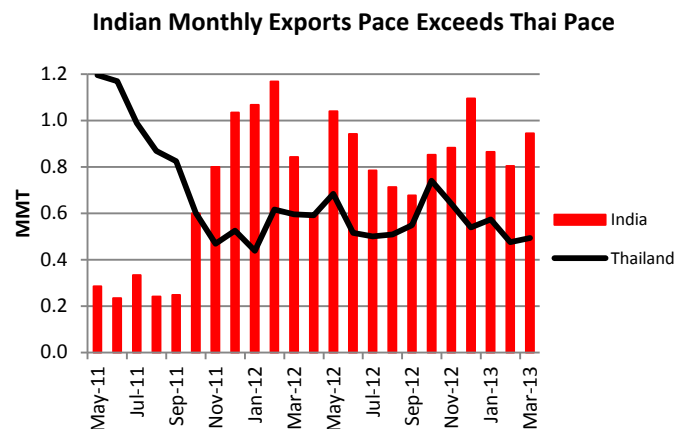

PRICES

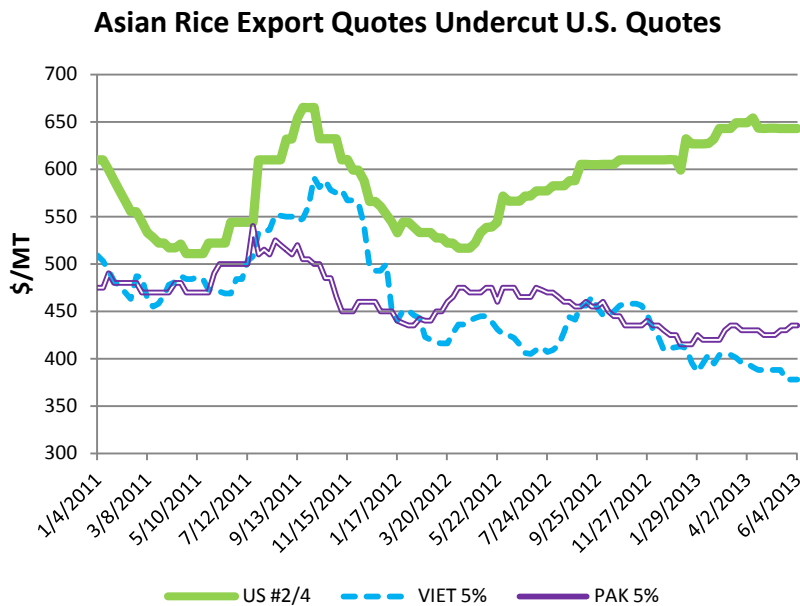

A year ago, U.S. and Thai export quotes approximated each other, while Indian and Vietnamese quotes followed each other at a much lower level. Recently, each tier of price quotes has diverged, resulting in four distinct price levels with an even larger spread. The U.S. quotes have risen on strong demand and diminishing supplies, while Thai quotes have fallen with expanding supplies. Indian quotes have strengthened, in part due to domestic policies, while Vietnamese quotes have declined on a large harvest and weaker demand from traditional markets.

FEATURE

Since India removed its ban on non-basmati exports in late 2011, the pace of monthly shipments has remained at a high level of about 800,000 tons/month. India is expected to continue to be the largest exporter through 2013 and 2014. In contrast, Thai exports fell sharply and have remained lower. Both countries hold large stocks overhanging the market.

The difference between U.S. and some Asian exporter quotes continues to widen over the past year, amid strengthened U.S. prices and weakening Vietnamese and Pakistani quotes. The spread of \$200-\$250/ton, which has not occurred since 2008, has prompted some traditional importers of U.S. rice to shift to lower-priced suppliers.

SELECTED TRADE CHANGES

- **Angola's imports** are raised by 150,000 tons to 500,000 in 2013 and 525,000 in 2014 on the pace of shipments to this rapidly growing market.
- **Iran's imports** are lowered 150,000 tons to 1.6 million in 2012 on final trade data.
- **Nigeria's imports** are cut by 500,000 tons to 2.4 million in both 2013 and 2014 as high tariffs substantially curtail trade.
- **Thailand's exports** are down 500,000 tons to 7.5 million in 2013 and to 8.0 million in 2014 on uncompetitive prices and lower global import demand.

COARSE GRAINS: WORLD MARKETS AND TRADE

OVERVIEW

World corn production in 2013/14 is down because of a smaller forecast U.S. crop. Global trade is slightly higher with greater exports from India, but U.S. exports are unchanged. The U.S. season-average farm price is raised slightly because of tighter supplies. For 2012/13, U.S. exports are lowered and the season-average farm price is boosted slightly, because of strong late-season cash prices.

PRICES

Immediately after the release of the May WASDE report, U.S. corn quotes dropped over \$10/ton. However, continued wet weather and concerns over delayed planting in the U.S. Corn Belt spurred prices higher, closing on June 7 nearly unchanged at \$305/ton. South American quotes were also up; Brazil remains less competitive as Argentina's harvest and export program advances. Meanwhile, Ukrainian quotes were up \$15 to \$290/ton, narrowing the gap with U.S. prices, as old-crop supplies tightened.

TRADE CHANGES IN 2013/14

Selected Exporters

- **Indian corn** is up 500,000 tons to 3.5 million on expectations for continued weak domestic demand (2012/13 exports are raised 800,000 tons to 4.8 million).

Selected Importers

- **Indonesian corn** is up 300,000 tons to 2.2 million on greater exportable supplies from India and indications of strong feed demand (2012/13 imports are boosted 200,000 tons to 1.9 million).

TRADE CHANGES IN 2012/13

Selected Exporters

- **U.S. corn** is cut 1.0 million tons to 18.5 million on continued sluggish sales and shipments.
- **EU corn** is up 500,000 tons to 1.5 million based on a surge in export licenses during April and May.
- **Russian corn** is cut 300,000 tons to 2.0 million due to slowing shipments.
- **South African corn** is raised 200,000 tons to 1.9 million on the pace of shipments and larger old-crop supplies.

Selected Importers

- **U.S. corn** is up 800,000 tons to a record 3.8 million as the pace of shipments from South America is expected to continue until new-crop domestic supplies become available in the fall.
- **Japanese corn** is down 500,000 tons to 14.5 million, the lowest in more than 25 years, due to high corn prices.
- **Mexican corn** is cut 500,000 tons to 7.0 million on a sluggish import pace from the United States.
- **Turkish corn** is boosted 600,000 tons to 1.3 million, the highest in a decade, on larger-than-expected imports (principally from Russia).

North America: Canada, Mexico, the United States.

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama.

Caribbean: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Cuba, Dominica, Dominican Republic, French West Indies, Grenada, Guadeloupe, Haiti, Jamaica and Dep, Leeward-Windward Islands, Martinique, Montserrat, Netherlands Antilles, Puerto Rico, Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands, Virgin Islands of the U.S.

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands (Islas Malvinas), French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela.

EU: Austria, Belgium/Luxembourg, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Croatia, Former Yugoslavia, Gibraltar, Iceland, Macedonia, Montenegro, Norway, Serbia, Switzerland.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Sub-Saharan Africa: all African countries except North Africa.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2011/12 starts in 2011); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2011/12 starts in 2012). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	EU-27 (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
EU-27 (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Field Crops and Livestock Branch, Industry and Sector Analysis Division, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-6590.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 05-13 May 2013. For further details on world grain production, please see World Agricultural Production Foreign Agricultural Service Circular WAP 06-13 June 2013.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
