

# Grain: World Markets and Trade

## Southeast Asian Wheat and Corn Imports Double in Past Decade As U.S. Market Share Slides

Since 2006/07, combined imports of wheat and corn by Southeast Asian countries\* more than doubled, fueled by growing populations and stable economic growth. Consumption is up for both food and feed as regional diets increasingly incorporate animal protein and western-style foods. Wheat food consumption has increased nearly 50 percent in the last decade, while feed use of wheat has more than tripled, with wheat being a preferred feed for aquaculture. With negligible production of wheat, the region is entirely reliant on imports. Indonesia, the Philippines, and Thailand are the primary wheat importers. Corn feed consumption is up 70 percent during the last decade. For much of the region, corn production largely satisfies demand. Malaysia is the only major importer that is largely dependent on imports, while Indonesia and Vietnam both produce and import large amounts of corn.

The U.S. market share is trending downward for both commodities. The United States struggles to compete with Canadian and Australian milling wheat on price and proximity, respectively. Ukraine and Argentina primarily meet the demand for feed wheat. Brazil and Argentina dominate the Southeast Asian corn market, supplying over 90 percent of imports. However, Malaysia and Vietnam, the largest importers of corn, are signatories of the Trans-Pacific Partnership. Once implemented, the agreement could boost U.S. competitiveness in those countries for both commodities as tariffs are gradually reduced or eliminated.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports and therefore differs from global totals shown elsewhere. Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug). 'Marketing Year' column is germane for U.S. wheat only.

---

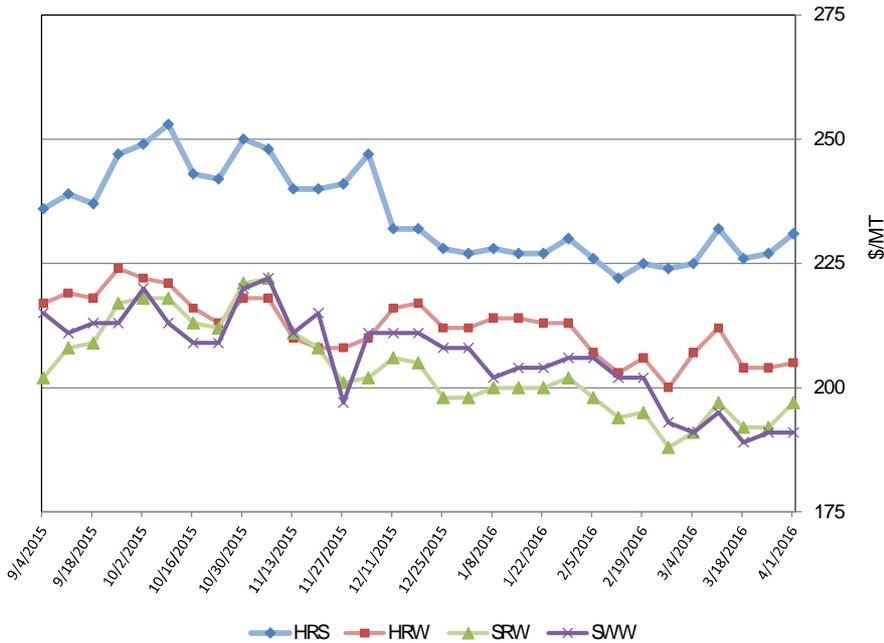

## WHEAT: WORLD MARKETS AND TRADE

### OVERVIEW

World wheat production for 2015/16 is up as larger crops in Argentina and the EU more than offset reductions in Ethiopia and Pakistan. Global trade is up fractionally this month, with upward revisions for Algeria, China, and others offset by diminished imports for Brazil, Iran, and Sudan. Exports for Argentina and Kazakhstan are raised, while the EU is revised downward. U.S. exports are also trimmed, and the season-average farm price is lowered from last month.

### U.S. PRICES:

U.S. Weekly FOB Export Bids

**Domestic:** Prices across most U.S. wheat classes rose through early March on weather concerns in the southern U.S. plains. Smaller-than-anticipated U.S. plantings at month's end preserved the upward trend for most classes. While Hard Red Winter (HRW) slipped fractionally \$2/ton to \$205, both Hard Red Spring (HRS) and Soft Red Winter (SRW) ended \$6/ton up at \$231 and \$197, respectively. Soft White Wheat (SWS) ended the month unchanged at \$191.

---

## **TRADE CHANGES IN 2015/16**

### **Selected Exporters**

- **Argentina** is raised 500,000 tons to 7.5 million on a larger crop and a continuing strong pace of shipments, particularly to Southeast Asian markets.
- The **European Union** is cut 500,000 tons to 32.0 million on account of lagging export licenses and greater domestic usage.
- **Iran** is slashed 300,000 tons to 200,000 due to weak demand and increased regional competition.
- **Kazakhstan** is lifted 500,000 tons to 7.0 million on a steady pace of shipments and a competitive advantage over other regional exporters due to a weak currency.
- **Turkey** is elevated 300,000 tons to 5.0 million, a quarter-century high, based on the robust pace of flour and products trade.
- **United States** is trimmed 200,000 tons to 21.3 million owing to the slow pace of new crop sales. (The marketing year estimate is unchanged)

### **Selected Importers**

- **Algeria** is boosted 400,000 tons to 8.1 million due to a strong import pace. The country is taking advantage of low world prices to build its stocks of milling wheat.
- **Brazil** is down 500,000 tons to 5.8 million on account of slow pace to date and static domestic consumption.
- **China** is raised 500,000 tons to 3.0 million due to persistent demand for premium quality milling wheat.
- **Iran** is lowered 700,000 tons to 3.3 million based on a significantly weaker pace of imports resulting from a good domestic crop and government policy. The policy restricts imports of wheat effective in the new Iranian calendar year, which began March 20.
- **Sudan** is reduced 500,000 tons to 2.3 million on a very sluggish pace to date as the country grapples with low growth and high inflation.
- **Syria** is elevated 300,000 tons to 1.3 million due to greater-than-expected trade to date.
- **Thailand** is boosted 300,000 tons to 3.8 million on account of strong shipments to date, particularly from Ukraine and Argentina.

## RICE: WORLD MARKETS AND TRADE

### OVERVIEW

Global production for 2015/16 is cut from last month, mostly on crop reductions for Brazil, Pakistan, and the Philippines. Trade is revised down slightly, as higher exports for India are more than offset by declines for Pakistan and Egypt, and smaller imports for Turkey. Global stocks are revised lower this month largely on a reduction for Japan (primarily due to higher consumption). The U.S. season-average farm price is lowered.

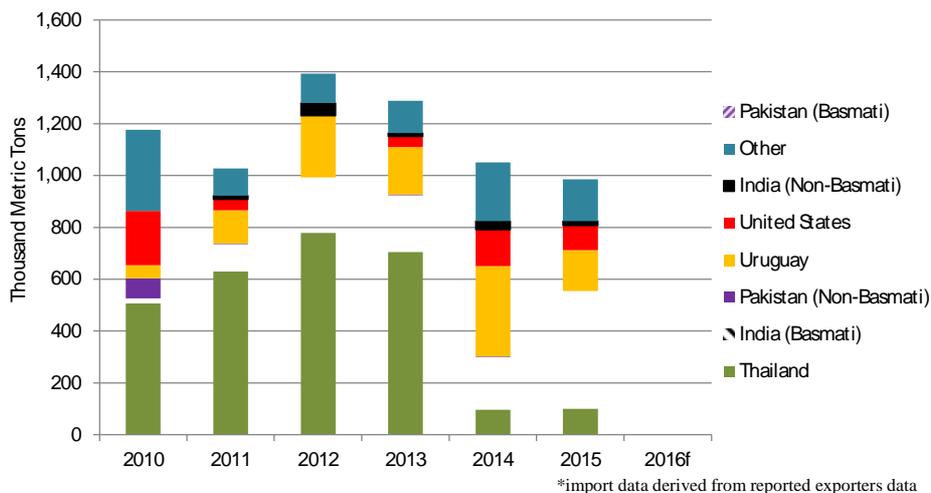

EU Imports from Cambodia, Burma and Guyana  
Rise Substantially

From 2012 to 2015, rice consumption in the European Union (EU) rose marginally and steadily alongside population growth. Because the region does not produce rice in large quantities, the EU relies on imports to meet domestic demand. Recently, Thailand, India, and Pakistan have accounted for the largest share of imports.

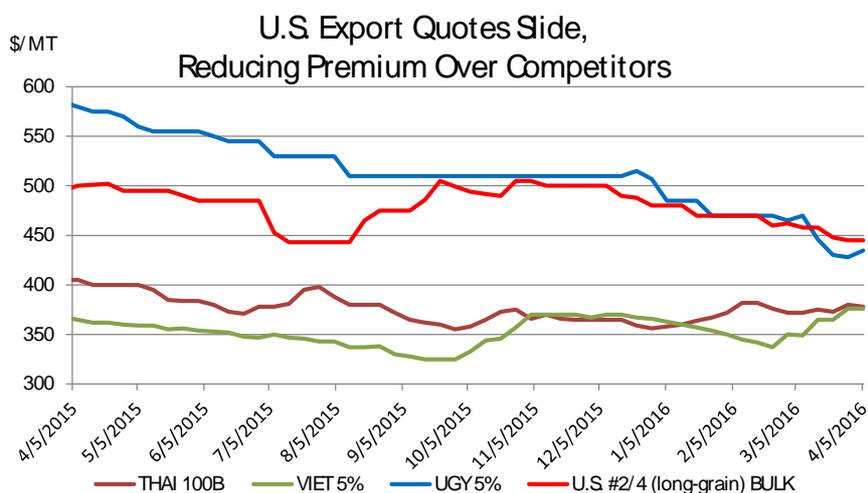

Over the past 4 years, however, an increasing proportion of imports have come from other origins. Under the Everything-But-Arms arrangement, rice imports from Cambodia and Burma gained duty free access, which expanded in 2009 due to the expiration of the quantitative limits on imported rice. Imports from Guyana doubled last year, as exporters diverted more shipments away from Venezuela and to EU. In all, EU imported a record 1.8 million tons in 2015, nearly 40 percent of which arrived from Cambodia, Burma, and Guyana. Long grain rice shipments from these sources are expected to remain strong and to account for a significant portion of the EU's imports this year.

## Iraq Importing\* Less Long-Grain, More Basmati Rice

Although total imports have declined since 2012, basmati (fragrant) rice has accounted for an increasing share of Iraqi imports over the past 4 years. In 2015, Iraq imported 450,000 tons of basmati rice from India. Combined basmati imports from India and Pakistan comprised a mere 2 percent of Iraq's total rice imports in 2010; however, last year, Indian basmati rice alone accounted for nearly half of total imports. The majority of these basmati imports are of the sharbati variety, which is quoted at lower prices than other premium quality varieties, although higher than non-fragrant long-grain. The increase in basmati rice imports may suggest a shift in consumer preferences in Iraq, although a demand for non-fragrant rice imports remains.

Iraq was a significant market for U.S. rice, routinely receiving more than 100,000 tons annually in prior decades. Along with a small amount of private trading, Iraq administers open tenders and invites selected countries to bid for rice imports. In 2015, a U.S. supplier won a share of a tender and shipped slightly more than 60,000 tons.

This month, U.S. export quotes for bulk shipments continued to slide on weak fresh demand, falling below \$450/ton for the first time since August 2015. However, U.S. quotes maintain a premium over South American and Asian sources. Uruguayan quotes slid 4 percent from the prior month with additional supplies from the new crop harvest. Thai quotes increased a marginal 2 percent to \$373/ton and Vietnamese quotes climbed 5 percent to \$381/ton on expected regional demand.

**SELECTED TRADE CHANGES for 2016**

- Brazil's imports are raised 100,000 tons to 800,000 on higher import demand resulting from smaller crop.
- Egypt's exports are slashed 150,000 tons to 250,000 on a newly-implemented rice export ban.
- European Union's imports are revised up 100,000 tons to 1.6 million on stronger imports to date.
- India's exports are raised 400,000 tons to 9.0 million on higher levels of trade to the Middle East.
- Pakistan's exports are reduced 200,000 tons to 4.4 million on smaller exportable supplies.
- Senegal's imports are cut 115,000 tons to 985,000 due to higher production.
- Turkey's imports are trimmed 130,000 tons to 200,000 on lower consumption.

## COARSE GRAINS: WORLD MARKETS AND TRADE

### OVERVIEW

World corn production for 2015/16 is up with larger crops for Argentina and Mexico. Global corn trade is raised to a record level with larger imports for Vietnam and Mexico more than offsetting a cut to EU. Exports are boosted for Argentina, EU, Russia, and Ukraine. Global consumption is higher and ending stocks are projected at record levels. The U.S. season-average farm price is lowered slightly from last month.

### PRICES

Throughout March, U.S. export quotes strengthened based on robust sales and shipments, but dropped at the end of the month in response to larger-than-expected planting intentions for 2016 in the *Prospective Plantings* report. U.S. quotes have since recovered, ending at \$163/ton, up \$4 from last month. U.S. quotes remain competitive against all major exporters. Argentine and Black Sea quotes also moved higher this month (now \$165/ton and \$166/ton, respectively) with strong exports. Brazilian prices are seasonally unavailable.

---

## **TRADE CHANGES IN 2015/16**

### **Selected Exporters**

- **U.S. sorghum** is cut 200,000 tons to 7.4 million on the slowing pace of sales, especially to China.
- **Argentine corn** is increased 1.0 million tons to 20.5 million on larger supplies.
- **EU corn** is up 300,000 tons to 1.4 million on the pace of licenses issued.
- **Russian corn** is raised 300,000 tons to 4.1 million with larger shipments to South Korea and Middle Eastern countries. **Barley** is boosted 300,000 tons to 3.3 million reflecting large shipments to Saudi Arabia.
- **South African corn** is trimmed 100,000 tons to 700,000 on tighter supplies and the current pace of trade.
- **Ukrainian corn** is raised 200,000 tons to 15.7 million on a continued strong pace.
- **Argentine barley** is boosted 400,000 tons to 2.6 million on a larger crop and the fast pace of shipments.
- **Australian barley** is cut 500,000 tons to 5.5 million on slower pace of trade to China.
- **Kazakh barley** is up 200,000 tons to 800,000 reflecting strong shipments to Iran.

### **Selected Importers**

- **Egyptian corn** is lifted 250,000 tons to 8.3 million as stronger demand for feed is reflected by a faster pace of imports.
- **EU corn** is cut 1.0 million tons to 15.0 million on expectations that a greater use of wheat in feed rations curbs demand for corn. In addition, the pace of issuing import licenses has slowed in recent months.
- **Indian corn** is down 150,000 tons to 250,000 on the recent cancellation of a tender.
- **Mexican corn** is raised 500,000 tons to 12.0 million on the fast pace of imports from the United States. **Sorghum** is up 200,000 tons to 700,000 on a smaller crop. Even with larger imports, sorghum feeding is expected to be lower based on tight domestic supplies and competitively-priced corn imports.

- 
- **Turkish corn** is lowered 300,000 tons to 900,000 on a slower-than-expected pace of trade.
  - **Vietnamese corn** is up 2.0 million tons to a record 5.0 million reflecting strong shipments from Brazil and Argentina.
  - **Iranian barley** is boosted 400,000 tons to 1.9 million on strong shipments from Kazakhstan.
  - **Japanese barley** is down 200,000 tons to 1.1 million and **sorghum** is cut 100,000 tons to 850,000, both on trade to date. Increased use of domestic rice in feed rations continues to erode demand for imported barley and sorghum.
  - **Saudi barley** is up 500,000 tons to 8.5 million on larger-than-expected shipments from Argentina.
  - **Chinese sorghum** is trimmed 200,000 tons to 6.8 million with the slowing pace in recent months.

## **ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE**

### **REGIONAL TABLES**

**North America:** Canada, Mexico, the United States.

**Central America:** Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama.

**Caribbean:** Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Cuba, Dominica, Dominican Republic, French West Indies, Grenada, Guadeloupe, Haiti, Jamaica and Dep, Leeward-Windward Islands, Martinique, Montserrat, Netherlands Antilles, Puerto Rico, Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands, Virgin Islands of the U.S.

**South America:** Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands (Islas Malvinas), French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela.

**EU:** Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

**Other Europe:** Albania, Azores, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, Macedonia, Montenegro, Norway, Serbia, Switzerland.

**Former Soviet Union:** Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

**Middle East:** Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

**North Africa:** Algeria, Egypt, Libya, Morocco, Tunisia.

**Sub-Saharan Africa:** all African countries except North Africa.

**East Asia:** China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

**South Asia:** Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

**Southeast Asia:** Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

**Oceania:** Australia, Fiji, New Zealand, Papua New Guinea.

---

## **OTHER NOTES**

**Local Marketing Years (LMY):** LMY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2015/16 starts in 2015); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2015/16 starts in 2016). **Key exporter LMY's are:**

<b>Wheat</b>	<b>Corn</b>	<b>Barley</b>	<b>Sorghum</b>
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	European Union (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
European Union (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

**Stocks:** Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

**Consumption:** World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

**Trade:** All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

**EU Consolidation:** The trade figures starting from 1999/00 represent the European Union (Croatia plus the former EU-27) and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria, Romania, and Croatia, exists only prior to 1999/00.

**Statistics:** (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

---

**Unaccounted:** This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Global Commodity Analysis Division, Office of Global Analysis, Foreign Agricultural Service, USDA, Washington, DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-3448.

**Note:** The previous report in this series was Grain: World Markets and Trade March 2016. For further details on world grain production, please see World Agricultural Production April 2016.

This circular is available in its entirety on the Internet via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
