Brazil's Corn Imports Surge as Domestic Prices Rise

Brazil's corn imports for the 2015/16 trade year (Oct-Sep basis) are forecast at 1.7 million tons, the highest total in 16 years. The unusual import level is attributable to a convergence of dynamics. Stimulated by the depreciation of the currency and abundant supplies, Brazil exported at a rapid pace at the end of 2015 and the start of 2016. As a result, inventories were substantially reduced. Then came a shortfall in the second (*safrinha*) crop, which has typically accounted for about two-thirds of Brazil's production in the last few years. With supplies tightening in the last few months, domestic prices surged and remain well above the level of a year ago.

Imports are expected to remain strong through early 2016/17 as supplies are likely to be tight. So far, Brazil's corn imports have been exclusively from Mercosur countries, specifically Argentina and Paraguay. However, in an effort to tame prices, Brazil has removed the Common External Tariff for non-Mercosur countries until November. While U.S. export prices are competitive globally, Brazil has not imported from the United States based on restrictions on genetically modified (GM) corn.* One GM variety has been recently approved, but more approvals will be needed before U.S. corn can be imported.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports and therefore differs from global totals shown elsewhere. Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug). 'Marketing Year' column is germane for U.S. wheat only.

WHEAT: WORLD MARKETS AND TRADE

OVERVIEW

Global production in 2016/17 is raised to a new record. Larger crops in Australia, Brazil, Canada, India, and Kazakhstan more than offset lower production in China and the EU. Global trade is up month-to-month but just slightly lower than last year's record. The upward revision is based primarily upon larger projected imports for the EU and Syria and more than offsets cuts in Brazil, Indonesia, South Africa, and Thailand. Exports are raised for Australia, Brazil, Kazakhstan, Serbia, and Ukraine and lowered for the EU. U.S. imports and exports are unchanged. The U.S. season-average farm price is lowered 10 cents to \$3.60 per bushel.

U.S. PRICES:

Domestic: Prices for Soft Red Winter (SRW) and Hard Red Winter (HRW) classes climbed moderately through mid-August before dropping in the latter half of the month. Global quality concerns and reluctant farmer selling led to the initial strengthening of prices, but ample global supplies pressured prices lower. Overall, HRW slid \$9 to \$168/ton, while SRW ultimately fell \$14 to \$177/ton. Hard Red Spring (HRS) climbed \$13 to \$243/ton as high protein premium supplies tighten. Soft White Winter (SWW) ended the month up \$9 to \$204/ton as quality concerns persist.

TRADE CHANGES IN 2016/17

Selected Exporters

- **Australia** is raised 1.0 million tons to 19.5 million based on a larger crop. Australia has become more competitive in the region and will regain market share in Southeast Asia as supplies tighten in Argentina.
- **Brazil** is up 500,000 tons to 1.5 million on a larger crop.
- **EU** is cut 1.0 million tons to 26.0 million on a significant reduction in the German crop, thus limiting exportable supplies. Germany is the second-largest exporter in the EU.
- **Kazakhstan** is raised 500,000 tons to 8.5 million due to a larger crop.
- **Serbia** is lifted 300,000 tons to 1.3 million on likely additional exports to the EU.
- **Ukraine** is up 500,000 tons to 15.0 million on projected demand from the EU for feed-quality wheat.

Selected Importers

- **EU** is boosted 1.0 million tons to 7.0 million to reflect a smaller crop and likely greater demand for feed-quality wheat imports.
- **Indonesia** is reduced 600,000 tons to 8.5 million as the government stopped issuing import recommendation letters for feed-quality wheat to encourage greater utilization of domestic corn.
- **South Africa** is down 300,000 tons to 1.6 million due to large domestic supplies.
- **Syria** is raised 1.0 million tons to 2.3 million on recent reports of pending large purchases.

RICE: WORLD MARKETS AND TRADE

OVERVIEW

For 2016/17, global production is up, primarily on improved prospects for the Indian crop. The U.S. crop is adjusted down but is forecast up 23 percent from the previous year. The global trade forecast is raised marginally this month with stronger exports for India, but is the lowest in 4 years. The U.S. season-average farm price is lowered 20 cents to \$10.70.

FEATURE

India is poised to eclipse Thailand in rice exports for the sixth consecutive year. After over 30 years of dominance as the top exporter, Thailand abdicated this position to India in 2012. Both countries have core markets for their respective fragrant varieties, basmati and jasmine; however, they have been in fierce competition for the non-fragrant markets.

A historical analysis of key features of the countries' policies and stock situations illuminates core factors leading to current prospects. In late 2007, India imposed an export ban on all non-basmati exports in an effort to ensure sufficient supplies for their population amid rising global prices. Thailand filled this void with additional exports. The Indian Government removed the export ban in 2011 but stocks had already doubled. Supplies in India multiplied as production and stocks expanded.

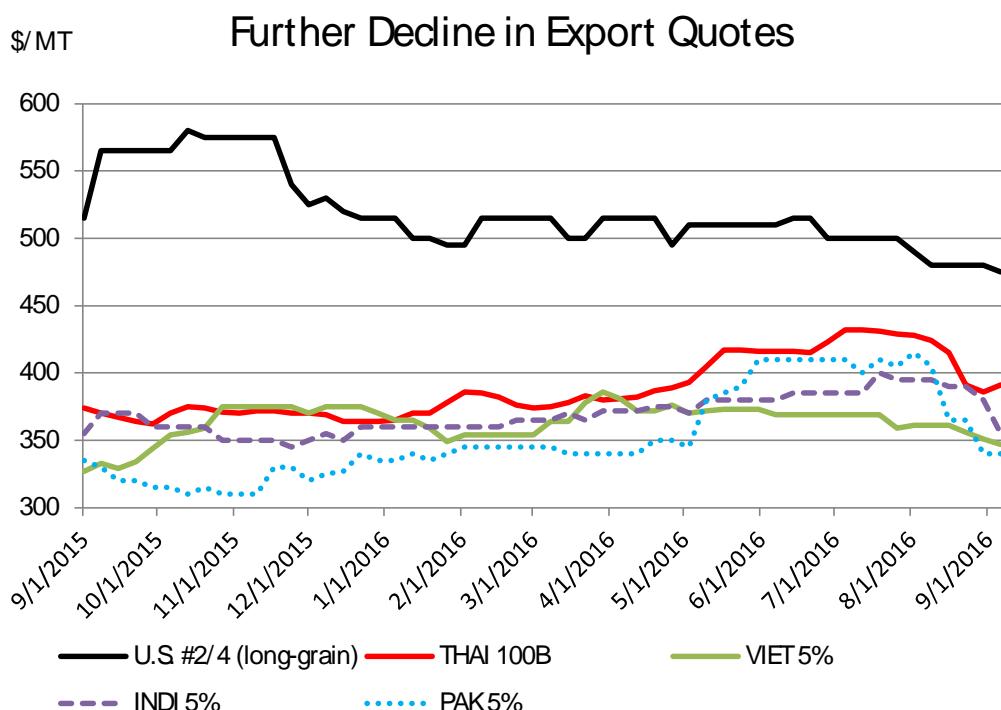

On the other hand, Thai domestic policies to support farmers caused the government to acquire large volumes of rice and a build-up in stocks. As global prices tumbled in 2012, Thai rice was no longer competitive, and their stocks increased throughout 2013. In 2014, the new Thai

government allowed prices to drift lower, enabling the country to regain some but not all of lost market share.

Since 2014, the stocks in both countries have been declining. During 2016, Thai stocks have been auctioned at a rapid pace to compensate for lower domestic production. Meanwhile, Indian stocks have been higher than anticipated, indicating weaker domestic use for rice.

Indian exports in 2016 have remained strong and thus far have exceeded Thai exports. Looking forward, India is now forecast to have a near-record 2016/17 crop to supplement their still ample stocks, further pressuring prices and improving competitiveness.

PRICES

Export quotes continued to decline over the past month for suppliers in both the Eastern and Western hemispheres. The United States quotes were pressured down \$5 to \$475/ton on record supplies, despite concerns about flooding in the Southern region. Thai quotes dropped \$33 to \$391/ton as auctions of old crop stocks continued, though quotes recently rose in response to the Philippines' tender requesting new crop rice. Indian quotes slid \$40 to \$355/ton as crop prospects improved. Pakistani quotes are down \$65 to \$340/ton as the new crop is forecast to be ample.

SELECTED TRADE CHANGES for 2016

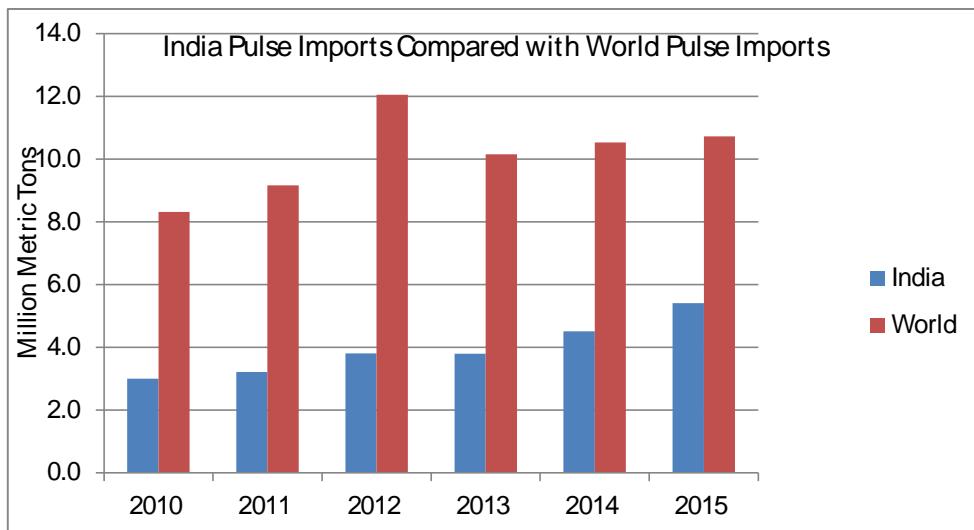

- **Burma's** exports are lowered 250,000 tons to 1.4 million on sluggish sales, particularly as border trade has declined..
- **India's** exports are raised 700,000 tons to 10.0 million on the strong pace of trade to date amid lower than expected domestic consumption.
- **Thailand's** exports are cut 100,000 tons to 9.7 million on slow recent shipments, despite recent auctions from stocks.
- **Vietnam's** exports are reduced 400,000 tons to 6.0 million as sales to East and Southeast Asia have been slower than usual.
- **Guinea's** imports are up 100,000 tons to 450,000 on strong trade to date.

SELECTED TRADE CHANGES for 2017

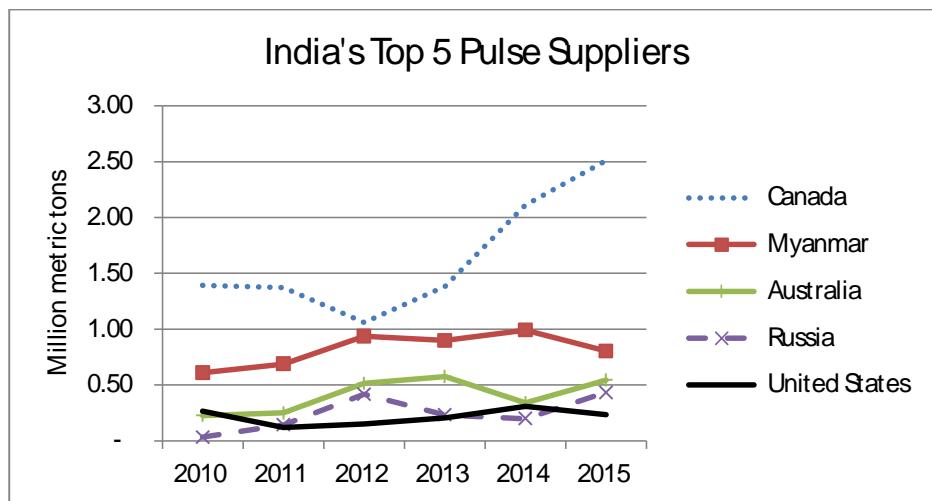

- **India's** exports are boosted 700,000 tons to 9.5 million for 2017 on the larger crop and improved competitiveness.
- **Vietnam's** exports are down 400,000 tons to 6.4 million on reduced competitiveness.

PULSES: WORLD MARKETS AND TRADE

India has been the largest world importer of pulses (HS 0713), including dry peas, chickpeas, lentils, and dry beans for the past 6 years, increasing from 35 to over 50 percent of global trade. Pulses are an important part of India's diet. Despite declining per capita consumption, population growth has driven overall consumption. Imports have filled the gap as producers favor other crops with higher returns.

Canadian exports have a competitive advantage in transportation over U.S. exports to India. Nevertheless in 2015, U.S. exports to India of dry peas, chickpeas, and lentils combined were about 260,000 tons. Since 2010, India has accounted for one-third of U.S. exports of these three commodities, and has been the largest single destination.

COARSE GRAINS: WORLD MARKETS AND TRADE

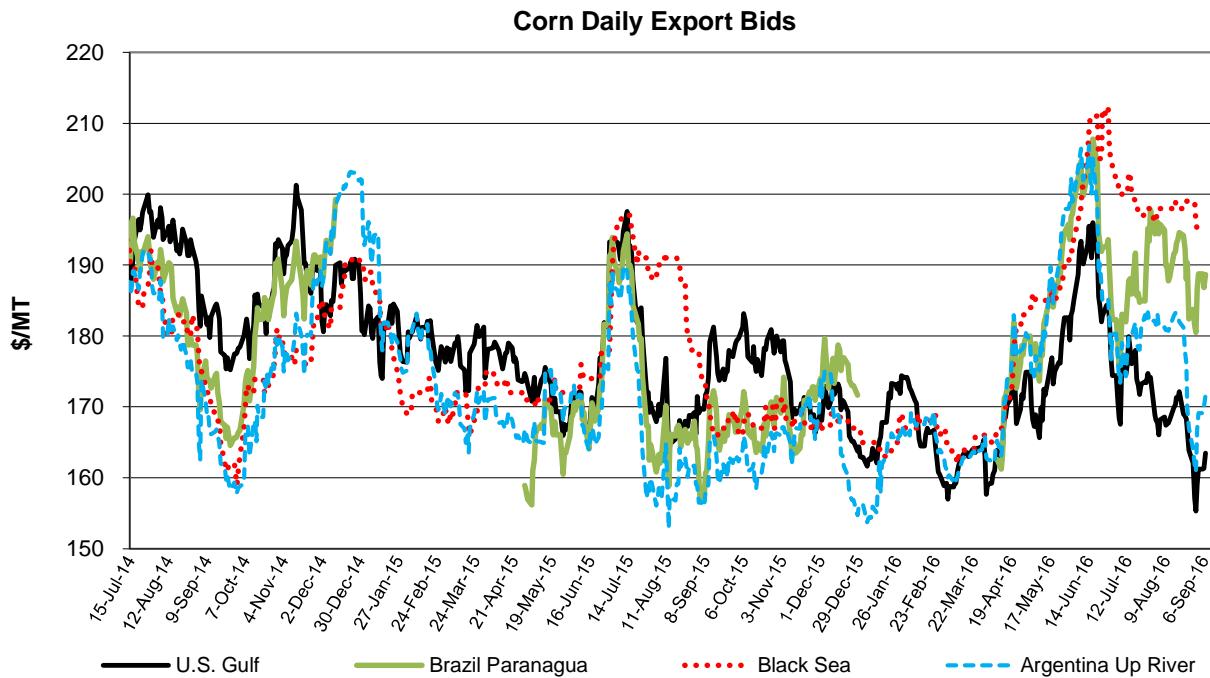

OVERVIEW

For **2016/17**, global corn production is lowered from last month with reductions for China, the EU, and the United States more than offsetting gains for Brazil and Canada. U.S. production is forecast down with lower yield. Global trade is projected higher with larger imports primarily for China. Forecast exports are raised for Argentina and Brazil. The U.S. season-average farm price is forecast 5 cents higher to \$3.20 per bushel at the midpoint.

For **2015/16**, global corn production is lower as a reduction for Brazil more than offsets an increase for Mexico. Trade is up with larger imports for Iran, Vietnam, and Canada. Exports are raised for Argentina, Brazil, and Thailand. The U.S. season-average farm price is unchanged at \$3.60 per bushel.

PRICES

Since the release of the August WASDE report, FOB quotes for Brazil are up \$2 to \$192 per ton. However, quotes for other major exporters have dropped, influenced by prospects for large supplies. Argentina's quotes are down \$9 to \$172 per ton, while Black Sea quotes are down \$3 to \$195 per ton. U.S. quotes fell \$3 to \$165 per ton with a record yield forecast in August. On an FOB basis, U.S. corn is the most competitive relative to other exporters.

TRADE CHANGES IN 2016/17

Selected Exporters

- **Argentine corn** is up 1.5 million tons to 25.0 million with the expectation of rising global demand and competitive prices. **Barley** is up 200,000 tons to 2.1 million on larger projected supplies.
- **Brazilian corn** is up 500,000 tons to 20.0 million based on a larger forecast crop.
- **Canadian corn** is up 100,000 tons to 600,000 on larger production. **Barley** is also up 200,000 tons to 1.6 million on a larger crop. **Oats** are down 200,000 tons to 1.5 million on a smaller crop.
- **Australian barley** is boosted 500,000 tons to 6.7 million with a larger projected crop and reduced competition.
- **EU barley** is cut 1.5 million tons to 6.5 million on a reduced crop.
- **Kazakhstani barley** is cut 200,000 tons to 700,000 on a smaller crop.
- **Russian barley** is down 400,000 tons to 4.4 million on a smaller crop.
- **Ukrainian barley** is raised 500,000 tons to 5.0 million on reduced competition.

Selected Importers

- **Chinese corn** is boosted 2.0 million tons to 3.0 million to offset a smaller projected crop. Trade by non-state importers is expected higher. **Barley**, however, is cut 1.0 million tons to 5.0 million reflecting a slowdown in demand.
- **Lebanese corn** is raised 100,000 tons to 800,000 on expected steady demand.
- **Jordanian barley** is cut 100,000 tons to 900,000 reflecting reduced supplies in key supplying countries.
- **Saudi Arabian barley** is up 500,000 tons to 10.5 million on expected steady demand.
- **U.S. oats** are reduced 100,000 tons to 1.5 million reflecting smaller supplies in Canada, the major supplier.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2015/16 starts in 2015); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2015/16 starts in 2016). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	European Union (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
European Union (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia(Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent the European Union (Croatia plus the former EU-27) and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria, Romania, and Croatia, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Global Commodity Analysis Division, Office of Global Analysis, Foreign Agricultural Service, USDA, Washington, DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-3448.

Note: The previous report in this series was Grain: World Markets and Trade August 2016. For further details on world grain production, please see World Agricultural Production September 2016.
