

Oilseeds: World Markets and Trade

South American Soybean Stocks (Argentina and Brazil) Expected to Increase in 2001/02 to Record Level Despite Record Exports

South American (Argentina & Brazil) soybean exports are forecast to reach a record 26.1 million tons in 2001/02, up 3.1 million tons from last year yet down 700,000 tons from the January forecast. Despite record soybean exports, South American soybean stocks are also expected to reach record levels in 2001/02. Uncertainty concerning China's new biotech regulations for imported soybeans is expected to slow exports from South America in the next few months and push soybean exports to later in the year. Beginning March 20th, a Chinese Government-issued safety certificate must accompany all commodity and food shipments entering China. Paradoxically, Chinese officials have indicated that they will not accept applications for safety certificates from traders until March 20th. The regulations allow China 270 days to grant approval which may result in long delays before shipments resume. The U.S. soybean export forecast was increased in February based on the continued strong export pace. U.S. exports for 2001/02 are forecast at 27.8 million tons, up 272,000 tons from January and 554,000 from the 2000/01 marketing year due to continued strong pace in world trade for soybeans. Soybean import demand was increased this month for EU, Turkey and Taiwan among others.

Situation and Outlook

World oilseed production for 2001/02 is estimated at 323.8 million tons this month, up 440,000 tons from last month. This increase is mostly due to higher copra and soybean production estimates. Philippine copra production increased to 2.5 million tons, from 2.1 million tons last month, due to greater than expected rainfall which resulted in improved yields. Chinese soybean production for 2001/02 increased by 150,000 tons to reach 15.5 million tons. Adjustments to the 2000/01 estimates include an increase of 554,000 tons in Chinese sunflowerseed production and an increase of 300,000 tons in Argentine soybean production.

Despite the increase in U.S. soybean exports of 272,000 tons, to 27.8 million tons this month, forecasted world soybean exports in 2001/02 are 350,000 tons lower, at 58.9 million tons. South American exports for 2001/02 were reduced by 800,000 tons. Argentina accounted for 400,000 tons of that reduction, while Brazil's exports were reduced by 300,000 tons and Paraguay's by 100,000 tons. Soybean imports by China in 2001/02 are reduced by 500,000 tons to 13.5 million tons this month, mainly due to the uncertainty surrounding the new biotech regulations and their implementation. Indonesian soybean imports for 2001/02 were reduced by 150,000 tons to 1.7 million tons due to financial difficulties and a slower import pace than last year. Forecasted soybean imports by the European Union rose 260,000 tons to 19.9 million tons for 2001/02. Forecasted E.U. imports, and Philippine exports, of copra meal and coconut oil were also increased. Estimated 2000/01 soybean exports from Paraguay were increased by 100,000 tons.

U.S. soybean ending stocks for 2001/02 are forecast at 7.5 million tons this month, down 290,000 tons from last month due to higher demand for exports and crush. Soybean stocks for Argentina and Brazil are expected to reach 7.9 and 7.3 million tons respectively, up 700,000 and 300,000 tons from last month, as delays related to new import regulations reduce Chinese soybean imports.
