

# Oilseeds: World Markets and Trade

## World Palm Oil Imports

Total world palm oil imports for 2003/04 are forecast to rise 2 percent to 19.54 million tons. India is expected to remain the dominant world importer of palm oil, importing a forecast 3.68 million tons in 2003/04, followed by the EU, China and Pakistan. China's imports of palm oil have grown sizably and may already be nearly 100,000 tons over their tariff rate quota (TRQ) of 2.60 million tons for calendar year 2003. As of the end of September, Chinese imports totaled 2.51 million tons with Malaysia reporting additional shipments of 200,000 tons. China's in-quota tariff rate for palm oil is 9 percent compared to a 60 percent out-of-quota rate. Palm oil imports are favored in China due to its relatively low price, as shipping costs of palm oil from Southeast Asia are much less than soybean oil shipping rates from South America and the U.S. However, the 60 percent tariff may shift China's buying to soybean oil for the remainder of the quota year, November and December. The tariff for soybean oil is 9 percent for the first 2.82 million tons and 52.4 percent above this level. China has only imported 1.75 million tons of soybean oil this year, which allows for another 1.07 million tons to be imported under the 9 percent tariff rate. U.S. exports of soybean oil to China in 2000/01 totaled 5,596 tons, down from about 29,500 tons in 1999/00 and 217,000 tons in 1998/99.

## Situation and Outlook

---

World oilseed production is projected at 347.5 million tons this month, an increase of about 800 thousand tons from October's projections. Increases in soybean, peanut, and rapeseed production were partly offset by lower projected cottonseed and sunflowerseed production. Dry conditions in Argentina shifted projected crop area into soybeans from sunflower and corn production, and increased forecasted Argentine soybean production by one million tons, to a total of 38 million. Projected U.S. soybean production fell by 450 thousand tons, while good weather in India boosted the projected 2003/04 soybean harvest by 400 thousand tons. Projected soybean production also rose by 250 thousand tons in Paraguay and 135 thousand tons in Ukraine. Peanut production in China and rapeseed production in India also rose by 600 and 300 thousand tons, respectively. The 941 thousand ton reduction in global cottonseed production was mostly due to a 1.2 million ton fall in Chinese production. Projected Brazilian and U.S. cottonseed production rose while projected Pakistani cottonseed production fell. Sunseed production fell by 500 thousand tons in Argentina, due to the dry conditions, and declined by 200 and 100 thousand tons in Ukraine and Romania, respectively.

Global soybean exports are expected to reach 67.2 million tons in 2003/04, an increase of 824 thousand tons from October. Unexpectedly strong U.S. exports, and additional soybean supplies in Argentina, lead to a slight reduction in projected Brazilian soybean exports. China's 2003/04 soybean imports were increased to 22 million tons from 20.5 last month supported by the increase of 1.1 million tons in estimated 2002/03 Chinese soybean imports. Projected Mexican soybean imports for 2003/04 were cut by 400 thousand tons to 4.4 million due to reduced U.S. supply and weaker than expected 2002/03 imports.

China's soymeal imports are projected at 200 thousand tons, up from 25 thousand in 2002/03, reflecting shipments from India. Crush and soybean meal production forecasts for India, Argentina, and China rose, along with meal export projections for Argentina and India. U.S. soybean meal exports fell by 452 thousand tons as strong soybean exports reduce supplies for crushing in the U.S.

Projected global vegetable oil production decreased marginally to 100.9 million tons. Soybean and rapeseed oil production rose due to increased crush, but projected sunflowerseed and cottonseed oil production fell due to crop reductions. Strong 2002/03 Chinese vegetable oil imports led to increases in China's projected 2003/04 imports of soybean and palm oil.

and SEEDS DIVISION

**Notes on World Supply/Demand Tables**

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Asia	Africa, North	Baltic States	Latin America	FSU-12
Bangladesh	Algeria	Estonia	Argentina	Armenia
Burma	Egypt	Latvia	Barbados	Azerbaijan
China	Libya	Lithuania	Bolivia	Byelarus
Cambodia	Morocco		Brazil	Georgia
