

Oilseeds: World Markets and Trade

China's Vegetable Oil Imports Forecast to Reach a Record in 2004/05

Million Tons

For 2004/05, China's total vegetable oil imports are forecast at 7.0 million tons, a slight increase from last year. Although oil consumption should continue to rise supported by income growth, vegetable oil import growth is expected to slow down due partly to larger production in the country. Vegetable oil production is forecast at 13 million tons, up 11 percent from the previous year, due mainly to larger forecast production of soybean oil, cottonseed oil, and rapeseed oil. Vegetable oil imports are expected to account for nearly 35 percent of total vegetable oil consumption. China is estimated to account for 19 percent of global oil consumption in 2004/05.

China's vegetable oil imports in 2003/04 are estimated to reach 6.8 million tons, up nearly 27 percent from the previous year. The sharp increase in imports is primarily attributed to high soybean prices in the spring that made oil crushing unprofitable and encouraged imports of oil. Anticipation of the implementation of new standards for crude soybean oil has also accelerated imports before the new standards go into effect on October 1, 2004. Total vegetable oil imports, mainly from Argentina (soy) and Malaysia (palm), are expected to account for nearly 37 percent of consumption.

SUMMARY

The world oilseed production forecast for 2004/05 was increased 1.8 million tons in September to 380.5 million tons. An increase in the EU rapeseed crop, up 1.2 million tons to 14.2 million tons, and an increase in India's soybean crop, accounted for most of the increase. Other production increases this month include cottonseed, and sunflowerseed. The 2004/05-soybean production increase was limited to 144,000 tons this month as a lower U.S. production forecast, down 1.1 million tons to 77.2 million tons, nearly offset a 1.3 million ton increase in India's production forecast.

A reduction in forecast soybean imports for 2004/05 helped push world oilseed trade lower in September. Total oilseed imports were lowered to 74.5 million tons as soybean imports fell 987,000 tons to 63.5 million tons. This mirrors a similar decline in soybean imports for 2003/04 and reflects the weaker demand for soybean imports observed in recent weeks. Reductions in soybean imports were noted for the EU, Egypt, Israel, and others in 2003/04, and in China, Egypt, Malaysia and South Africa for 2004/05.

Soybean exports for 2003/04 were reduced nearly 1.0 million tons to 55.5 million tons this month. A slower year-to-date export pace by Argentina accounted for much of the decline, with additional shortfalls noted for the U.S. and Uruguay. Similarly, soybean exports were reduced 1.2 million tons to 63.6 million tons in 2004/05. Nearly all-major exporters were impacted with particular attention focused on the U.S., Argentina, and Uruguay. The exception was Canada where the soybean export forecast for both 2003/04 and 2004/05 was increased. Specializing in identity preserved soybeans, year-to-date trade showed exports reaching 880,000 tons in 2003/04, which in turn prompted an increase in the 2004/05 export forecast to 950,000 tons.

Forecast world oilseed crush for 2004/05 was increased 1.2 million tons to 301.0 million tons, bolstered by crush increases for India and the EU following increases in soybean and rapeseed production respectively. This contrasts with a 700,000-ton drop in 2003/04 oilseed crush that followed this month's reduced soybean and sunflowerseed production estimates for China. Lower world crush volume led to declines in 2003/04-protein meal and vegetable oil production. For 2004/05, the increase in crush volume led to higher production of protein meals and vegetable oils. Forecast world protein meal production rose 403,000 tons to 206.6 million tons while vegetable oil production increased 410,000 tons to 105.9 million tons.

India's soybean meal export forecast for 2004/05 increased 400,000 tons to 2.5 million tons this month. This more than offset lower soybean meal exports from the U.S. However, reduced sunflowerseed meal and fishmeal export forecasts pushed the total 2004/05 meal export forecast lower. World vegetable oil imports for 2004/05 were lowered this month with reductions in the soybean, palm, and rapeseed oil forecasts. Total imports declined 370,000 tons to 38.1 million tons with palm oil down 191,000 tons to 20.9 million tons and soybean oil down 174,000 tons to 9.7 million tons. Forecast world consumption of vegetable oil for 2004/05 was higher despite the cut in the import forecast due to the larger rapeseed crush. Total 2004/05 vegetable oil consumption is forecast to reach 105.1 million tons, up 238,000 tons from last month and 6-percent above the 2003/04 forecast.

Notes on World Supply/Demand Tables

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Asia	Africa, North	FSU-12	Latin America	Europe (EU)*
Bangladesh	Algeria	Armenia	Argentina	Austria
Burma	Egypt	Azerbaijan	Barbados	Belgium
China	Libya	Byelarus	Bolivia	Cyprus
Cambodia	Morocco	Georgia	Brazil	Czech Republic
