

Oilseeds: World Markets and Trade

Malaysia's Industrial Use of Palm Oil Strengthens in 2005/06

Malaysia's industrial use of palm oil in 2005/06 is forecast at 1.9 million tons, up 8 percent from the previous year, supported by the country's ongoing efforts to promote palm oil as an alternative fuel source. In its National Biofuel Policy, released in March, Malaysia sets the platform for development of the biodiesel industry ensuring greater use of palm oil for the transport and industrial sector in the country. Traditionally, most industrial uses of palm oil are for soaps and cosmetics.

A recent report indicates that the Malaysian Palm Oil Board (MPOB) announced that will build the country's first biofuel plant in partnership with a private plantation company. The plant, scheduled to open in October 2006, would have an annual capacity of 60,000 tons refined palm olein processed into biodiesel. MPOB expects that at least 5 more plants will be established within the next two years.

In addition, Malaysia sees export opportunities for its biodiesel to the EU due to the existing strong demand and the mandated requirements for biofuel use. The European Commission has set a goal of 5.75 percent of the fuel used for transportation to be biofuels by 2010.

Notes on World Supply/Demand Tables

1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.

2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.

3) Stocks data are not estimated for all countries.

4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Africa, North

Algeria
Egypt
Libya
Morocco
Tunisia

TOTAL 5/	1,436	14,800	13,100	2,736	1,000

1/Totals are based on an October-September basis.

2/ Utilization includes exports of further processed products and refining losses and therefore is higher than the actual level.

3/ Quarterly export data may not add to year total because quarterly import data is not available.

4/ Preliminary

5/ Forecast

6/ Net exports: excluding palm and fatty acid distillates.
