

# Oilseeds: World Markets and Trade

## Soybean Meal Faces Stiff Competition in the EU and North America.

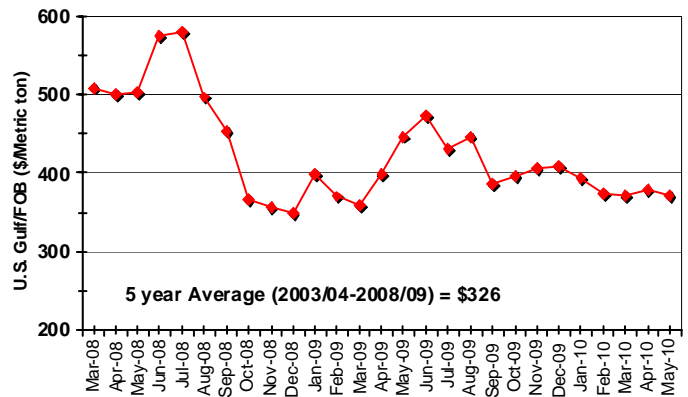

Soybean meal consumption in the EU and North America remains below levels of 5 years ago, sharply contrasting the more than 30 percent growth in Asia and elsewhere over the same period. Stronger growth in pork and poultry production outside of the EU and North America accounts for most of the difference. Increased availability of alternative feed ingredients in the EU and North America has pushed soybean meal consumption lower. Growing biodiesel production in the EU has increased supplies of rapeseed meal, which is substituting for soybean meal in feed rations. Growing ethanol production in the United States has increased supplies of corn by-products, such as distillers dried grains, which is substituting for soybean meal in the US and Mexico. In addition, expanded rapeseed production in Canada has increased the supply and use of rapeseed meal in North American feed rations, further reducing demand for soybean meal.

## PRICES

U.S. soybean export bids, FOB Gulf, in May averaged \$372 per ton, sustaining the same level for the past three months. Tight old crop supplies have supported export prices.

As of the week-ending May 27, 2010, U.S. soybean sales commitments (outstanding sales plus accumulated exports) to China totaled 22.1 million tons, compared to 18.5 million a year ago. Total commitments to the world amounted to 38.4 million tons compared to 33.7 million for the same period last year.

## **U.S. Gulf Soybean Export Bids**

## TRADE CHANGES IN 2009/10

- Brazil's soybean exports are up 1.0 million tons to 29.4 million in response to strong overseas' demand, mainly from China.
- China's soybean imports are boosted 1.0 million tons to a record 47.0 million in response to reportedly large shipments from South America.
- Canada's rapeseed exports are raised 0.5 million tons to 7.2 million supported by strong demand, mainly from Japan and Pakistan.
- Malaysia's palm oil imports are raised 0.4 million tons to 1.1 million supported by strong demand in the refinery sector.
- China's soy oil imports are cut 0.3 million tons to 1.6 million as imports from Argentina continue to be restricted. Rape oil and palm oil imports are boosted to offset the losses in availability of soy oil.
- The Philippines' coconut oil exports are boosted 0.2 million tons to 1.2 million spurred by a stronger export pace.
