

Oilseeds: World Markets and Trade

Sharp Decline in Vegetable Oil Stocks Leads to Steeply Higher Prices

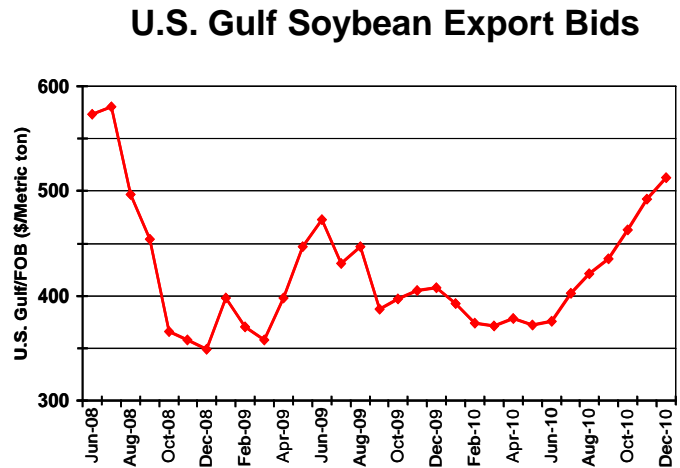

Commodity prices have been on an upward trend since June in response to improving economic conditions and a declining dollar. However, soybean oil has appreciated at more than twice the pace of meal and petroleum, reflecting both stronger world vegetable oil demand from China and shrinking stocks. Global vegetable oil stocks are forecast to drop 30 percent from their peak in 2008/09. As a share of consumption, stocks are expected to fall to levels unseen since the mid 1970s, reflecting an accelerated pace of vegetable oil disappearance in both food and fuel markets.

Sharply higher petroleum prices were an important factor in the 2008 surge in vegetable oil prices. However, this year's relatively modest price rise vis. a vis. vegetable oil is apparently indicative of stronger demand in the food sector and opens the door for the potential reallocation of vegetable oil supplies from fuel to food use.

PRICES

U.S. soybean export bids, FOB Gulf, in December averaged \$513 per ton, the highest since August 2008. Strong demand for exports primarily from China and concerns over South American crops continue to support prices higher.

As of the week-ending December 30, U.S. soybean sales commitments (outstanding sales plus accumulated exports) to China totaled 22.6 million tons, compared to 19.8 million a year ago. Total commitments to the world are 35.4 million tons compared to 32.2 million for the same period last year.

TRADE CHANGES IN 2010/11

- U.S. soybean exports are unchanged at 43.3 million tons.
- Argentina's soybean exports are down 0.5 million tons to 12.5 million on a reduced crop.
- Paraguay's soybean exports are up 0.5 million tons to 5.1 million on a larger crop.
- Turkey's soybean imports are cut 0.3 million tons to 1.1 million to reflect much smaller sales commitments from the United States, the top supplier.
