

Oilseeds: World Markets and Trade

Tight EU Rapeseed Supplies to Stimulate Imports of Other Vegetable Oils and Protein Meals

EU supplies of rapeseed, their most common oilseed, are expected to decline due to low carry-in stocks and an estimated smaller crop. Prices have already soared to near record levels, not seen since 2008. Reflecting tighter supplies, rapeseed crush is expected to shrink, reducing the output of oil and meal. Since much of that oil is used for biodiesel production, the food sector will have to augment smaller domestic supplies with larger imports, such as palm and sunflowerseed oils. Similarly, the feed sector will have to rely on greater imports of other protein meals, such as sunflowerseed and soybean meals. However, import demand for meals could be mitigated by larger imported supplies of feed quality wheat from Russia and Ukraine.

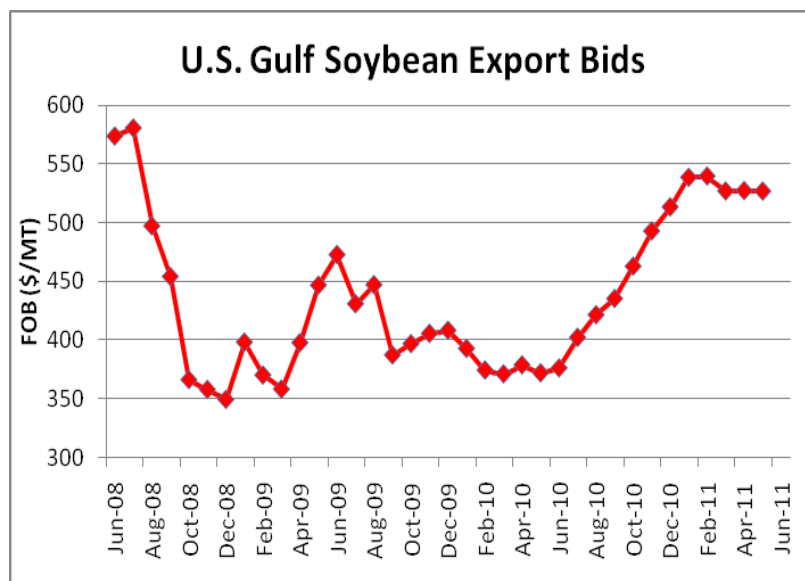

OVERVIEW

The 2011/12 global soybean production is marginally lowered. The U.S. crop remains unchanged although there are concerns over wet conditions and slow planting progress. Global trade is estimated to be strong driven by changing market dynamics in China. Global demand for soybean oil and meal will continue to expand. U.S. season average price is forecast at a record.

SOYBEAN PRICES

U.S. export bids, FOB Gulf, in May averaged \$527 per ton, the same level for the past three months, supported by limited old-crop supplies.

As of the week-ending May 26, U.S. soybean commitments (outstanding sales plus accumulated exports) to China totaled 25.6 million tons, compared to 22.1 million a year ago. Total commitments to the world are 41.6 million tons compared to 38.4 million for the same period last year.

2011/12 TRADE OUTLOOK

- US soybean exports are cut 0.5 million tons to 41.4 million on stronger competition with South American supplies.
- Brazil's soybean exports are up 0.5 million tons to 34.0 million reflecting record 2011 production and stronger fourth-quarter shipments that are expected to impact early-season U.S. sales.
- China's rapeseed imports are cut 0.3 million tons to 1.1 million in response to reduced exportable supplies in Canada.

TRADE CHANGES IN 2010/11

- U.S. soybean exports are cut 0.3 million tons to 41.9 million due to slower-than-expected shipment pace.
- Argentina's and Brazil's combined soybean exports are cut 0.9 million tons as strong product demand and slow sales to China shifts soybeans to domestic crush.
- China's soybean imports are cut 0.5 million tons to 54.0 million as processor stocks remain at high levels. Rapeseed imports are also cut 0.2 million tons as growing crush in Canada restricts availability of seed for export in favor of meal and oil.
- India's palm oil imports are cut 0.5 million tons to 6.5 million as imports fail to rebound with growing world palm oil production.
