

# Oilseeds: World Markets and Trade

## Palm and Soy Oil Use Expands at Expense of Other Oils

As global demand for vegetable oil grows, an increasing proportion of food use is being satisfied by palm and soy oil. These two oils now account for nearly two-thirds of food oil consumption.

Oil palm plantations have expanded over the past several years, especially in Indonesia and Malaysia. As a result, an ever-increasing quantity of palm oil is being supplied to the global market. Likewise, record 2014/15 soybean production in both the United States and South America ensures ample supplies and growing availability of soy oil. Meanwhile, significant declines in rapeseed, sunflowerseed, and cottonseed production are limiting supplies of these oils and encouraging a switch to palm and soy.

Price relationships among the various oils are also impacting purchasing decisions. Premiums for rapeseed, sunflowerseed, and cottonseed oils have increased in recent months reflecting tighter supplies. Consequently, price-sensitive buyers are switching to soy oil as a cheaper alternative soft oil. Palm oil remains the lowest-priced oil, though its discount to soy has narrowed in recent months.

## OVERVIEW

### 2015/16

Global soybean production is reduced this month as lower production in Canada and Ukraine is only partially offset by a higher U.S. production forecast. Trade is lowered this month due to a reduction in Ukraine's exportable supplies. However, global exports remain at a record level. Global stocks are reduced, reflecting a lower production and carry-over from last year forecast. The U.S. season-average farm price is unchanged.

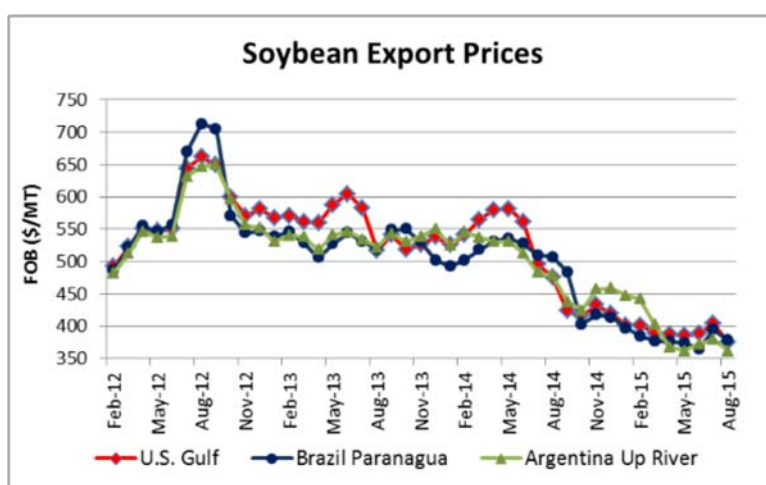

### 2014/15

Global soybean production is unchanged this month. Exports are raised on larger shipments from Brazil and Ukraine. Ending stocks are reduced in response to growing consumption and trade.

## SOYBEAN PRICES

U.S. export bids, FOB Gulf, in August averaged \$375/ton, down \$29 from last month, reflecting a higher-than-expected production estimate for the new crop.

As of the week ending September 3, U.S. 2014/15 soybean commitments (outstanding sales plus accumulated exports) to China totaled 29.6 million tons compared to 27.9 million a year ago. Total commitments to the world are 50.6 million tons, compared to 45.9 million for the same period last year.

As of the week ending September 3, U.S. 2015/16 soybean commitments (outstanding sales plus accumulated exports) to China totaled 6.1 million tons, compared to 13.3 million a year ago. Total commitments to the world are 16.1 million tons, compared to 24.0 million for the same period last year.

## 2014/15 TRADE OUTLOOK
