February 8, 2002

WHEAT: U.S. 2001/02 supply, use, and stocks projections are unchanged from last month. Also, the projected price range is unchanged at \$2.75 to \$2.85 per bushel. Small adjustments in trade and domestic use estimates for the 1998/99 through 2000/01 marketing years are due to revised import and export estimates by the Bureau of the Census.

Projected world 2001/02 production and use are up minutely from last month, but ending stocks are down. A 1.5-million-ton increase in the Australian crop is largely offset by reduction of 0.8 million tons for Argentina and smaller declines for the EU and Kazakhstan. The larger crop increases Australia's export prospects by 1 million tons from last month, but an equal reduction is expected in Argentina's exports. Similarly, smaller projected exports for the EU are offset by gains for Ukraine. Global import projections are up marginally from last month as increased EU imports are only partially offset by small reductions in prospective purchases for a number of countries. Projected global 2001/02 ending stocks are down marginally, largely because of reductions for Ukraine, Kazakhstan, and several other countries of the former Soviet Union.

COARSE GRAINS: U.S. 2001/02 supply, use, and ending stocks projections for corn and the other feed grains are unchanged from last month, and the projected price range for corn is unchanged at \$1.85 to \$2.15 per bushel. However, based on prices to date, the sorghum price is down 5 cents per bushel while the oats price is up 5 cents. Similar to wheat, adjustments in trade and domestic use estimates for 1998/99 through 2000/01 are due to revisions in imports and exports by the Bureau of the Census.

Global coarse grains supply and use projections for 2001/02 are down marginally from last month. There are a number of largely offsetting changes that have little impact on trade. The South African corn crop is lowered 500,000 tons from last month as wet conditions prevented some intended area from being planted. Despite lower production prospects, forecast exports are unchanged as high internal prices limit domestic use. Projected global imports, exports, and ending stocks are little changed in aggregate from last month, although there are a number of largely offsetting changes.

RICE: Only slight changes are made to U.S. 2001/02 supply and use. U.S. imports for 2001/02 are raised 1.5 million cwt from last month to a record 12.5 million cwt, based on a higher-than-expected import pace through November. Domestic use for 2001/02 is

raised 1 million cwt to a record 123.1 million cwt, 8 percent above the revised 2000/01 level. Although total exports in 2001/02 are unchanged at 88 million cwt, minor revisions are made to rough and milled exports. Rough rice exports in 2001/02 are projected at 25 million cwt, up 1 million cwt from last month, while exports of milled rice (rough-equivalent basis) are lowered an equal amount. Ending stocks are projected at 42.9 million cwt, up slightly from last month, 51 percent above 2000/01, and the highest level since 1986/87. Slight changes are made to U.S. supply and use from 1998/99 to 2000/01 based on revised Census trade data. The projected season-average price for 2001/02 is unchanged at \$4.10 to \$4.40 per cwt.

Global production and consumption for 2001/02 are lowered slightly from last month, stocks are raised, and trade is nearly unchanged. The reduction in global production is due primarily to smaller crops projected for Thailand, Mexico, and Russia. The increase in ending stocks of less than 1 million tons is due primarily to a reduction in Thailand's consumption for marketing years 1999/2000 through 2001/02.

OILSEEDS: U.S. soybean exports for 2001/02 are projected at 1,020 million bushels, up 10 million bushels from last month, reflecting the rapid pace of shipments to date. U.S. soybean crush is increased 5 million bushels this month, despite an unchanged forecast of soybean meal production, because of a lower soybean meal extraction rate. Thus, soybean ending stocks for 2001/02 are reduced to 270 million bushels, 22 million bushels above last year. Soybean oil exports are projected at 2.4 billion pounds, off 100 million pounds from last month based on lower-than-anticipated sales to date and increased competition. Soybean oil ending stocks are raised about 100 million pounds to 2,535 million pounds as a small increase in domestic soybean oil use nearly offsets increased production resulting from larger crush. Slight changes are made to oilseeds and products supply and use for 1998/99 to 2000/01 due to import and export revisions by the Bureau of the Census.

The U.S. season-average soybean price for 2001/02 is narrowed 10 cents on each end to \$4.00 to \$4.60 per bushel. Soybean oil prices are projected at 14.50 to 16.00 cents per pound, down 0.5 cent on the top of the range. Soybean meal prices are unchanged at \$150 to \$165 per short ton.

Global oilseed production for 2001/02 is projected at a record 323.8 million tons, up 0.4 million tons from last month and 11.2 million tons above last year. Foreign oilseed production is up 0.4 million tons to a record 233.9 million tons, largely because of an increase in Philippine copra production. Foreign soybean production is increased slightly this month as larger production in China is partially offset by drought-related losses in Paraguay. Foreign soybean ending stocks are up 0.57 million tons as reduced global imports are reflected in smaller shipments from Brazil and Argentina. The import forecast for China is reduced 0.5 million tons to 13.5 million tons because of delays related to new import regulations.

SUGAR: Projected U.S. sugar production for fiscal year 2001/02 is unchanged from last month, at 7.925 million short tons, raw value. Imports not under the tariff rate quota are increased 45,000 tons based on the pace to date. Total use is decreased 60,000 tons as

lower refined sugar exports and deliveries for domestic food and beverages more than offset higher deliveries to manufacturers under the Sugar-containing Products Re-export Program. The season-ending stocks-to-use ratio is 12.7 percent, compared with 11.6 percent last month. Stocks held by the Commodity Credit Corporation are reduced 18,000 tons, mainly due to CCC sales for unrestricted use.

LIVESTOCK, POULTRY, AND DAIRY: Projected total meat production for 2002 is increased 150 million pounds from last month, reflecting higher beef production as cattle weights continue to increase. Dressed weights have increased steadily since the late 1990s and are expected to increase further in 2002 given the mild temperatures so far this winter and relatively cheap costs of gain. Furthermore, the February 1 *Cattle* report indicated that the rate of decline in cattle numbers has moderated, but little heifer retention was occurring. Thus feedlot placements may remain higher than previously forecast through mid-year. Projected production of other meats is unchanged from last month. Poultry production is estimated slightly higher for 2001 as December broiler and turkey slaughter were higher than expected.

Forecast U.S. meat exports in the last quarter of 2001 and the first half of 2002 are raised due to continued strength in a number of markets. Although exports of beef continue to suffer from BSE concerns in Japan, other markets in Asia and North America are stronger than previously expected. Pork exports are raised due to strength in Japan. Current bans on U.S. broiler meat are not expected to cause significant disruptions to exports in 2002.

Cattle prices in 2002 are reduced from last month's forecast. Increased beef supplies are expected to pressure cattle prices. Price forecasts for hogs and poultry are unchanged from last month.

Forecast milk production in 2001/02 is virtually unchanged from last month as a slower rate of decline in cow numbers is offset by a reduction in the rate of growth in milk per cow. Tight heifer supplies have prevented producers from responding to relatively good returns and increases in milk per cow have been limited by tight supplies of high-quality hay and the retention of low-producing cows. The forecast 2001/02 Class IV price is unchanged from last month but the Class III price forecast is lowered 5 cents. The all milk price forecast is lowered to \$13.05 to \$13.55 per cwt.

COTTON: This month's 2001/02 U.S. situation includes a sharp reduction in domestic mill use, higher exports, and increased ending stocks. U.S. exports are raised 200,000 bales to 10.0 million bales, reflecting continued strong export sales and shipments. Ending stocks are raised 200,000 bales to 8.8 million bales, nearly 51 percent of total offtake.

U.S. domestic mill use is reduced 400,000 bales from last month to 7.3 million bales, which would be 18 percent below the 2000/01 level. Bureau of the Census data indicate that during August-December 2001 domestic mill use fell more than 20 percent from the year-earlier level. In addition, data from the Step 2 program for upland cotton likewise suggest that January 2002 mill use fell more than 20 percent from a year earlier. These data, combined with reports of mill closures and financial difficulties, indicate that

problems in retail demand, together with a loss of market share by U.S. mills to textile imports, are ongoing. While economic recovery is likely to boost retail consumption later this season, its capacity to reverse the downward mill use trend now appears more limited than previously forecast.

This month's projections for 2001/02 world production, consumption, and ending stocks show marginal changes. Production is raised slightly as a higher estimated crop in Pakistan is mostly offset by a decrease for Turkey. Consumption increases for China, Turkey, Korea, and Russia are about offset by decreases in the United States and the European Union. World trade is raised about 2 percent, reflecting increases for the United States and Brazil. Ending stocks are about unchanged.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 5.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. 2/ Historical data are from FSA, "Sweetener Market Data" except imports from U.S. Customs Service. 3/ Projections for 2001/02 are based on the February Crop Production and analyses by Interagency Commodity Estimates Committee for sugar. 4/ Production by state for 2000/01 (projected 2001/02): FL 2,055 (1,990); HI 241 (270); LA 1,579 (1,610); TX 207 (150); PR 0 (5). 5/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. The 2001/02 available TRQs assume shortfall of 65,000 tons. 6/ Includes sugar under the re-export and polyhydric alcohol programs and other imports not under these programs. 7/ Mostly re-exports. 8/ Transfer to sugar-containing products for re-export, for nonedible alcohol, and feed. 9/ Includes residual statistical discrepancies and expected Commodity Credit Corporation sales to ethanol producers. 10/ For 2001/02, includes only sugar owned by CCC, as of February 6, 2002, net of expected sales to ethanol producers and transfers of sugar under the Payment-In-Kind Diversion Program. Season-ending CCC stocks will be a function of market and program developments.

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton.

5/ Weighted price for August-December 2001. USDA is prohibited by law from publishing cotton price projections.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2001/02 is 50.7 percent.

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported export and imports. Therefore, world supply may not equal world use.

3/ Argentina, Brazil and Paraguay. 4/ Japan, China, and EU, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, and India. 4/ Eastern Europe, China, EU, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Marketing year beginning October 1. 2/ Milk equivalent, milkfat basis.

3/ Includes commercial exports. 4/ Includes products exported under the Dairy Export Incentive Program. 5/ Basic Formula Price through Dec. 31, 1999; Class III price beginning Jan. 1, 2000 6/ Milk of average fat test. Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 31-33 present a 20-year record of the differences between the February projection and the final estimate. Using world wheat production as an example, changes between the February projection and the final estimate have averaged 2.5 million tons (0.5%) ranging from -7.3 to 6.8 million tons. The February projection has been below the estimate 15 times and above 5 times.

Approved by the World Agricultural Outlook Board

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
