August 12, 2003

WHEAT: Projected U.S. 2003/04 ending stocks of wheat are down 94 million bushels from last month due to smaller production and increased use. Total wheat production is forecast at 2.292 billion bushels, down 19 million bushels from last month due to smaller winter and spring wheat crops. Projected imports are down 10 million bushels from last month, while exports are up 75 million due to reduced competition. The reduced food use reflects downward adjustments for 2001/02 and 2002/03 linked to recently revised mill grind estimates released by the Bureau of Census for calendar year 2002. The projected 2003/04 price range is up 30 cents on each end to \$3.10 to \$3.70 per bushel.

Projected 2003/04 global wheat production and stocks are down sharply from last month. Foreign production is down almost 10 million tons from last month and is 32 million tons below last year. Compared to last month, projected production is down 5 million tons in the EU, 3 million tons in Canada, 2.7 million tons in Eastern Europe, and 1 million tons in Ukraine. Despite reductions in domestic use and stocks, the lower EU crop results in a 3.5-million-ton drop in EU exports to 10.5 million tons, the lowest number on record. Canada's domestic use and exports are also reduced, but most of the adjustment to the lower production is reflected in smaller ending stocks. The smaller East European crops result in increased imports but lower exports, domestic use, and stocks. The smaller Ukraine crop is offset by larger prospective imports. Global imports are down from last month due to larger production and reduced imports by Brazil, Iran, and North Africa, and reduced import expectations for China and the EU. Projected U.S. and Russian exports are raised due to the reduced competition from Canada and the EU. Most of the reduction in projected 2003/04 global ending stocks is in the major foreign exporting countries, especially Canada and the EU.

COARSE GRAINS: This month's outlook for 2003/04 U.S. feed grains is for lower crops, reduced use, and lower stocks. The first survey-based forecast of 2003 corn production is down 206 million bushels from last month's projected crop, which was based on trend yields adjusted for crop conditions. Projected feed and residual use of corn is up 25 million bushels due to a sharply lower sorghum crop, but is offset by a reduction in industrial use of corn. Projected corn exports are down 50 million bushels due to increased competition. The first survey-based yield forecast for sorghum is sharply below the trend yield used last month, due

to very hot and dry conditions in many of the major sorghum producing regions. The smaller sorghum crop is reflected in reduced domestic use, exports, and ending stocks. The projected price range for corn is up 10 cents on each end from last month to \$2.00 to \$2.40 per bushel.

Global 2003/04 coarse grain supply and use projections are down from last month, largely due to smaller U.S., EU, and Eastern Europe crops. The smaller EU coarse grain crops result in reduced domestic use, stocks, and exports (rye and oats) but larger projected imports (sorghum and corn). The smaller Eastern Europe crops result in larger imports but smaller domestic use, stocks, and exports. Much of the reduction in projected East European exports will be corn. Larger Brazilian corn and Chinese exports will offset the drop in U.S. and Eastern Europe exports.

RICE: USDA's first survey-based forecast of the 2003/04 U.S. rice crop is 195.1 million cwt, up slightly from last month's projection but down nearly 16 million cwt from 2002/03. The U.S. 2003/04 average yield is forecast at 6,577 pounds per acre, up 5 pounds per acre from last month, but only 1 pound per acre below record 2002/03. Long-grain production is forecast at 144.7 million cwt while combined medium- and short-grain production is projected at 50.4 million cwt, both nearly the same as last month. U.S. rice exports for 2003/04 are projected at 87 million cwt, unchanged from last month, but 34 million cwt below revised record 2002/03. Combined milled and brown rice exports are projected at 50 million cwt (rough-equivalent basis) while rough rice exports are projected at 37 million cwt, both unchanged from last month. Ending stocks are projected at 17.6 million cwt, nearly the same as last month, but down nearly 3 million cwt from 2002/03. The season-average farm price is projected at \$6.50 to \$7.00 per cwt, up 25 cents on both ends from a month earlier, and up from a revised \$4.20 per cwt in 2002/03.

Global 2003/04 rice production is projected at 390.6 million tons, 3.5 million tons below last month, but nearly 11 million tons above 2002/03. Projected production is lowered for China, India, Bangladesh, Japan, and the Philippines, while Brazil's crop is increased. World ending stocks for 2003/04 are projected at 85.1 million tons, 3.4 million tons below last month and 21.4 million tons below 2002/03. These are the lowest ending stocks since 1983/84. World consumption and trade for 2003/04 are nearly unchanged from a month ago.

OILSEEDS: U.S. oilseed stocks for 2003/04 are projected at 7.0 million tons, down 1.0 million tons from last month. U.S. oilseed production is projected at 87.5 million tons, down 0.4 million tons from last month based mainly on a smaller forecast soybean crop. The first survey-based forecast of U.S. soybean production, at 2,862 million bushels, is down 23 million bushels from last month's projection, which was based on trend yields. The forecast yield is 39.4 bushels per acre, up 1.6 bushels per acre from 2002/03. The survey-based production forecast for peanuts is increased from last month, while cottonseed production is down. Projected soybean exports are up 10 million bushels because of increased global protein meal demand. Soybean ending stocks for 2003/04 are projected at 220 million bushels, down 40 million bushels from last month.

For 2002/03, soybean ending stocks are down 10 million bushels from last month to 145 million bushels because of larger-than-expected exports late in the season.

The projected season-average soybean price for 2003/04 is raised 20 cents on each end of the range to \$4.55 to \$5.55 per bushel. Soybean meal prices are projected at \$155 to \$180 per short ton compared with \$145 to \$175 per short ton last month. Soybean oil prices are unchanged at 18.0 to 21.0 cents per pound.

Global oilseed production for 2003/04 is projected at a record 351.7 million tons, down 0.4 million tons from last month, but up 23.8 million tons from 2002/03. Foreign rapeseed production is lowered this month due to reduced yield prospects in Canada and Slovakia. Foreign sunflowerseed production is projected higher based on increased area for Russia. Other changes include increased soybean and cottonseed crops for India, and increased palm oil output for Malaysia and Indonesia. Global vegetable oil inventories are forecast at 7.2 million tons, up 0.4 million tons from 2002/03.

SUGAR: Projected U.S. sugar supply for fiscal year 2003/04 is increased 389,000 short tons, raw value, from last month. Production reflects processors' projections compiled by the Farm Service Agency. Beet sugar production is increased 209,000 tons and cane sugar is increased 181,000 tons from month-earlier projections by the Interagency Commodity Estimates Committee for sugar. On the use side, deliveries to manufacturers of sugar-containing products for re-export are increased 10,000 tons.

For 2002/03, production is nearly unchanged, with approximate offsets in the cane and beet sectors. Imports are nearly unchanged with lower tariff rate quota imports (due to higher shortfall) offsetting higher imports under the re-export program. On the use side, lower exports offset higher deliveries to manufacturers of sugar-containing products for re-export.

LIVESTOCK, POULTRY, AND DAIRY: Total U.S. meat production in 2003 and 2004 is forecast lower than last month. The greatest impact in both 2003 and 2004 is expected to result from USDA's recent announcement of conditions for resuming beef imports from Canada. Beef production forecasts are reduced as live cattle shipments from Canada for both immediate slaughter and placement in U.S. feedlots remain restricted. Although dry conditions in the United States are resulting in higher placements than forecast last month, steer and heifer slaughter is forecast lower in the latter part of the year as declines in slaughter cattle imports from Canada more than offset the higher placements. For 2004, beef production forecasts are reduced, reflecting continued restrictions on imports of cattle from Canada. The 2003 pork production forecast is increased slightly from last month as slaughter rates in the third quarter have been higher than expected. Broiler production forecasts are reduced due to lower-than-expected slaughter in June. Forecasts for subsequent quarters are unchanged for both pork and poultry.

Beef imports for 2003 and 2004 are changed as product flows from Canada adjust to the conditions for trade resumption. The import forecast for 2003 is reduced as shipments from Canada are limited to boneless cuts of meat from animals less than 30 months of age.

Although some gain is expected in those cuts as some stored product is shipped and market-ready cattle which would have been shipped to the United States are processed in Canada, the loss of trade in other beef products results in a reduction in the aggregate import forecast. For 2004, however, increased domestic feeding and slaughter of cattle in Canada and the subsequent export of cuts result in an increase in the beef import forecast. Beef exports for 2003 are raised due to higher shipments to Japan in advance of the increase in their beef tariff on August 1 and expected steady shipments to Canada. Forecasts of trade for other meats are unchanged from last month.

Cattle prices are forecast higher than last month as beef demand remains firm and reduced supplies of cattle from Canada are expected to support prices. Hog price forecasts for 2003 are higher than last month as third-quarter hog prices thus far have been higher than expected. Broiler price forecasts are unchanged from last month but turkey price forecasts for 2003 are lowered.

Dairy production forecasts for 2002/03 and 2003/04 are lowered from last month as milk-per-cow forecasts are reduced. Cheese prices have remained relatively strong and in the face of slower growth in milk production, Class price forecasts are raised from last month. The Class III price forecast is raised to \$10.50 to \$10.60 per cwt for 2002/03 and the Class IV price forecast is raised to \$10.00 to \$10.20 per cwt. Large stocks of butter and nonfat dry milk will likely limit gains in Class IV prices. The average all milk price forecast is raised to \$11.80 to \$11.90 per cwt. Price forecasts for 2003/04 are also raised as milk production forecasts are reduced. The Class III price forecast is increased to \$10.25 to \$11.15 per cwt and the Class IV price is forecast at \$9.65 to \$10.75 per cwt. The all milk price is forecast at \$11.60 to \$12.50 per cwt.

COTTON: The U.S. forecasts for 2003/04 include higher production and lower domestic mill use, resulting in higher ending stocks relative to last month. NASS's first 2003 crop forecast is 17.1 million bales, 3 percent above last month's projection. Combined with lower beginning stocks, the total supply is marginally higher. Domestic mill use is reduced 200,000 bales, as rising textile inventories and mill closings indicate a more pessimistic outlook. Ending stocks of 4.3 million bales are 400,000 bales above last month.

The world 2003/04 forecasts include higher production and stocks compared with last month. Beginning stocks are raised about 650,000 bales as increases for China, Australia, Mexico, and India are partially offset by a reduction for the United States. World production includes increases for the United States and India, partially offset by a reduction for Australia. World consumption and trade are nearly unchanged. The consumption forecast includes a significant increase for China, which is offset by decreases in the United States, India, Taiwan, and others. World ending stocks are raised 4 percent from last month.

The world estimates for 2002/03 reflect recent data on production and trade, which have raised estimated world ending stocks. Production and exports are raised in Australia, and imports are raised for China and Mexico, but lowered for Taiwan. These changes are partially offset by increased exports, mainly for the United States.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 35.

APPROVED:

WILLIAM HAWKS (for)
SECRETARY OF AGRICULTURE

The next issue of this report will be released 8:30 a.m. ET on September 11, 2003.

The *World Agricultural Supply and Demand Estimates (WASDE)* report will be released 8:30 a.m. Eastern Time on the following dates in 2003: Sep. 11, Oct. 10, Nov. 12, Dec. 11.

Mark Your Calendar for Outlook Forum 2004

USDA will hold the 80th Agricultural Outlook Forum on February 19-20, 2004, in Arlington, Virginia. Details will be announced in the fall. To receive detailed information, send your address to agforum@oce.usda.gov or write to Outlook Forum 2004, USDA/WAOB, Mail Stop 3812 South Building, Washington, D.C. 20250-3812.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. 2/ Historical data are from FSA, "Sweetener Market Data" except imports from U.S. Customs Service. 3/ Production for 2002/03 and 2003/04 are based on processors' projections compiled by the Farm Service Agency. Other projections are based on analyses by the Interagency Commodity Estimates Committee for sugar. 4/ Production by state for 2002/03 (projected 2003/04): FL 2,127 (2,135); HI 288 (281); LA 1,382 (1,628); TX 189 (182); PR 0 (0). 5/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2002/03, available TRQs assume shortfall of 50,000 tons. For 2003/04, includes only the US commitment to the World Trade Organization to import a minimum quantity of raw and refined sugar, minus shortfall of 35,000 tons. The Secretary will establish the actual level of the TRQ at a later date. 6/ Includes sugar under the re-export and polyhydric alcohol programs. 7/ Includes high-tier and other. 8/ Mostly reexports. 9/ Transfer to sugar containing products for reexport, and for nonedible alcohol and feed. 10/ Residual statistical discrepancies.

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound. The 2002/03 price is a weighted average price for upland cotton for August-June. 5/ USDA is prohibited by law from publishing cotton price projections. *For July, planted area reported in June 30 Acreage. Projected harvested area based on 1991-2002 average acreage abandonment by State, excluding the high and low years. Projected yield based on 1991-2002 average yield by State, excluding the high and low years.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2003/04 is 22.8 percent.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ Generally reflects cotton lost or destroyed in the marketing channel; for Australia, Brazil, and the United States, reflects the difference between implicit stocks based on supply less total use and indicated ending stocks. 3/ Less than 5,000 bales.

4/ Includes Egypt and Syria in addition to the countries and regions listed.

5/ Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Cote d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Paraguay, South Africa, and Zimbabwe. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, Thailand, and Vietnam.

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and EU. 4/ India, China and Pakistan.

1/ Marketing year beginning October 1. 2/ Milk equivalent, milkfat basis.

3/ Includes commercial exports. 4/ Includes products exported under the Dairy Export Incentive Program. 5/ Milk of average test. Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 32-34 present a 22-year record of the differences between the August projection and the final estimate. Using world wheat production as an example, changes between the August projection and the final estimate have averaged 12.0 million tons (2.2%) ranging from -32.1 to 19.5 million tons. The August projection has been below the estimate 12 times and above 10 times.

Related USDA Reports The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See <http://www.usda.gov/oce/waob/related.htm> for an explanation of related reports.

Supply and Demand Database The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently. Data series go back to 1960/61 for many commodities. Users can download pre-defined tables, create custom queries, and import data into their own spreadsheets.

* * * * *

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
