Approved by the World Agricultural Outlook Board

December 10, 2004

WHEAT: Projected U.S. 2004/05 ending stocks of wheat are 15 million bushels lower than last month as a 25-million-bushel increase in exports is partially offset by a 10-million-bushel drop in food use. Exports are raised based on stronger-than-expected sales to date, higher global wheat imports, and lower exports from the EU-25. Relative to last month, HRW, HRS, and White wheat exports each increase 10 million bushels but SRW exports decline 5 million. Lower food use is based on the recent mill grind estimates released by the Bureau of the Census. HRS and Durum food use are both down 5 million bushels from last month. The projected price range is unchanged at \$3.20 to \$3.50 per bushel.

Projected 2004/05 global wheat production, use, and stocks are up slightly from last month. Global wheat production is raised 1.3 million tons to a record 618 million tons because of larger foreign production. Canada's crop is up 1.9 million tons, the EU-25's production is 0.8 million tons larger, and there are smaller increases for Bulgaria and Belarus. Partially offsetting, Australia's crop is 1 million tons lower and smaller reductions are projected for Syria, South Africa, and Tajikistan. Global consumption is raised fractionally from last month. Global imports are up slightly due primarily to larger imports by Pakistan (up 0.5 million tons). Global exports are up modestly with larger exports forecast for the United States and Bulgaria but smaller exports coming out of the EU-25 (down 0.5 million tons). Global ending stocks rise 0.6 million tons from last month. The largest stocks changes occur in Canada (up 1.4 million tons), Australia (down 1 million tons), the EU-25 (up 0.8 million tons), and the United States and Syria (each down 0.4 million tons).

COARSE GRAINS: Projected 2004/05 U.S. feed grain ending stocks are raised by 0.7 million tons from last month as smaller exports are partially offset by larger industrial and feed use. Projected corn exports are 50 million bushels lower than last month due to lower global corn imports, increased competition, and the weaker-than-expected pace of corn export sales to date. Projected corn feed and residual is unchanged. Projected use of corn to produce ethanol for fuel is up 55 million bushels but other industrial use of corn is

down 30 million bushels, resulting in a net increase of 25 million bushels in total food, seed, and industrial use. Corn stocks rise 25 million bushels. The projected price range is unchanged at \$1.70 to \$2.10 per bushel.

Relative to last month, projected grain sorghum exports decline 25 million bushels due to smaller imports by Mexico and the weaker-than-expected pace of export sales to date. Projected grain sorghum feed and residual rises 20 million bushels but food, seed, and industrial use is unchanged from last month. Grain sorghum ending stocks rise 5 million bushels. The projected price range is lowered by 5 cents on each end to \$1.50 to \$1.90 per bushel.

Global 2004/05 coarse grain supply, use, and stocks projections are up from last month. Global production is a record 989 million tons, up 4 million tons from last month and 9 percent larger than 2003/04. Larger crops are projected for Ukraine (up 1.4 million tons), Canada and Mexico (each up 0.9 million tons), and China (up 0.5 million tons), with smaller increases projected for several other countries. Crop reductions are projected for Russia (down 0.7 million tons) and Australia (down 0.3 million tons). Global consumption is raised 2 million tons, but global trade is down slightly from last month. Reduced imports are projected for Mexico (down 1 million tons), Vietnam, South Africa, and Canada. Larger imports by Libya, China, and Ecuador are partially offsetting. Smaller exports are projected for the United States, Russia, and Australia but larger exports are projected for Ukraine, the EU-25, and several other countries. Global coarse grain stocks rise 3 million tons from last month and are up 23 million tons from last year. Stocks rise in the United States, South Africa (up 0.7 million tons), and Canada (up 0.6 million tons), with smaller increases forecast for many other countries. Stocks decline in Russia, the EU-25, Mexico, and several other countries.

RICE: No changes are made to the U.S. 2004/05 rice supply and use projections. However, the season-average farm price is projected at a range of \$7.25 to \$7.55 per cwt, up 25 cents per cwt on the low end and an increase of 5 cents per cwt on the high end from a month ago. Farm prices have been strong the first four months of the marketing year according to monthly prices reported by NASS. Farm prices are expected to weaken some during the remainder of the marketing year because of record supplies. However, stronger global prices will limit the decline in U.S. farm prices.

Global 2004/05 rice production and consumption are slightly lowered from last month, while imports, exports, and ending stocks are up marginally. The decrease in global rice production is due primarily to smaller crops projected for Thailand and Cambodia, partially offset by an increase for South Korea. Exports are raised for Vietnam and lowered for Australia. Imports are increased for Malaysia and some markets in Africa. World rice ending stocks for 2004/05 are projected at 71.8 million tons, up slightly from last month, but down 13.8 million tons from 2003/04 and the lowest stocks since 1983/84.

OILSEEDS: U.S. oilseed production for 2004/05 is projected at 96.9 million tons, up slightly from last month due to higher cottonseed production. U.S. soybean supply and use projections are unchanged, leaving ending stocks at 460 million bushels. Soybean oil production is increased 165 million pounds based on a higher projected extraction rate. Soybean oil exports and stocks are both raised, reflecting increased availability and lower prices.

The U.S. season-average soybean price range for 2004/05 is projected at \$4.60 to \$5.30 per bushel, compared with \$4.55 to \$5.35 per bushel last month. Soybean oil prices are forecast at 21 to 24 cents per pound, down 0.5 cent on both ends of the range. Soybean meal prices are forecast at \$145 to \$170 per short ton, down 5 dollars on the top end of the range.

Global oilseed production for 2004/05 is projected at 390.5 million tons, up 2 million tons from last month. Increased production of soybeans, cottonseed, peanuts, and rapeseed more than offsets reduced sunflowerseed production. China soybean production is forecast at a record 18 million tons, up 0.5 million tons from last month, reflecting higher projected yields. Canada rapeseed production is increased 0.7 million tons to 7.7 million tons, based on official Canadian data. Sunflowerseed production is reduced for Ukraine, the EU-25, and Moldova. Other changes include higher cottonseed production for India and Pakistan.

SUGAR: Projected U.S. sugar supply for 2004/05 is decreased 274,000 short tons, raw value, from last month. Cane sugar production is decreased 274,000 tons, based on processors' production projections submitted to the Farm Service Agency. Increased imports of sugar in syrups offset lower beginning stocks. Sugar use is unchanged, and ending stocks are lowered to 1.67 million tons from 1.94 million tons last month.

LIVESTOCK, POULTRY, AND DAIRY: *NOTE:* Due to uncertainties as to the length of the bans on trade in ruminants and ruminant products because of the discovery of BSE in the United States and Canada in 2003, forecasts for 2004 and 2005 assume a continuation of policies currently in place. Subsequent forecasts will reflect any announced changes.

Total U.S. meat production forecasts for 2004 and 2005 are lowered. Red meat production forecasts for 2004 are lowered as the pace of cattle and hog slaughter thus far in the fourth quarter has been slower than expected. Red meat production forecasts for 2005 are unchanged from last month, but first-half broiler and turkey production forecasts are lowered based on weaker hatchery data. The December *Quarterly Hogs and Pigs* report, to be released December 28, will provide further indications of hog producer intentions in 2005.

Meat trade forecasts are little changed from last month. Beef imports for 2004 are lowered slightly as shipments from New Zealand have been below expectations. Pork exports in late 2004 and early 2005 are raised, reflecting continued strength in Mexico and Asia. Poultry export forecasts are unchanged from last month.

Cattle and hog price forecasts are raised for 2004, reflecting continued strong demand and the slower-than-expected pace of marketings. Broiler prices have been weaker than expected and the price forecast in the fourth quarter is lowered. Most price forecasts for 2005 are unchanged but turkey prices are raised as forecast supplies are reduced.

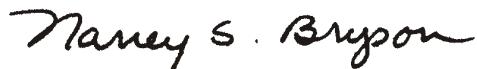

The milk production forecast for 2004/05 is lowered fractionally from last month. Prices of dairy products are expected to be firmer in 2004/05 than forecast last month. Class III and Class IV milk prices are raised as cheese and butter prices are expected to be higher than last month. The all milk price is raised to \$14.15 to \$14.85 per cwt for 2004/05. As a result of higher product prices, lower CCC removals are forecast for 2004/05.

COTTON: This month's 2004/05 U.S. estimates include slightly higher production, domestic mill use, and ending stocks. Production is raised in the Delta and Southeast, partially offset by a reduction for Texas. Domestic mill use is raised 100,000 bales to 6.2 million bales; recent months' mill use has been higher than previously anticipated due to continued strong denim fabric exports. The export estimate is unchanged. Ending stocks are raised 3 percent to 7.7 million bales.

The world 2004/05 estimates include sharply higher production and slightly higher consumption. Production is raised 2.3 million bales, including increases for India, Pakistan, the United States, Greece, Australia, and Zimbabwe. Consumption is raised in India, Mexico, Pakistan, the United States, and others. World trade is virtually unchanged. World ending stocks are raised 4 percent to 46.5 million bales.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 35.

APPROVED:

NANCY S. BRYSON
ACTING SECRETARY OF AGRICULTURE

The next issue of this report will be released 8:30 a.m. ET on January 12, 2005.

In 2005, the WASDE report will be released on Jan. 12, Feb. 9, Mar. 10, Apr. 8, May 12, June 10, July 12, Aug. 12, Sept. 12, Oct. 12, Nov. 10, and Dec. 9.

Stocks to use ratio	16.7	18.6	19.2	16.5

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" except imports (U.S. Customs Service, Census Bureau). 2/ Production for 2004/05 is based on processors' projections compiled by the Farm Service Agency. Other projections are based on analyses the Interagency Commodity Estimates Committee for sugar. 3/ Production by state for 2003/04 (projected 2004/05): FL 2,154 (1,693); HI 251 (274); LA 1,377 (1,391); TX 175 (179). 4/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2004/05, includes shortfall of 50,000 tons. 5/ Includes sugar under the re-export and polyhydric alcohol programs. 6/ Includes high-tier and other. 7/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed. 8/ Residual statistical discrepancies.

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton. 5/ Weighted average for August-October 2004. USDA is prohibited by law from publishing cotton price projections.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2004/05 is 41.8 percent.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ Generally reflects cotton lost or destroyed in the marketing channel; for Australia, Brazil, and the United States, reflects the difference between implicit stocks based on supply less total use and indicated ending stocks. 3/ Less than 5,000 bales.

4/ Includes Egypt and Syria in addition to the countries and regions listed.

5/ Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Cote d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Paraguay, South Africa, and Zimbabwe. 8/ Includes intra-EU trade. 9/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, Thailand, and Vietnam.

1/ Marketing year beginning October 1. 2/ Milk equivalent, milkfat basis.

3/ Includes commercial exports. 4/ Includes products exported under the Dairy Export Incentive Program. 5/ Milk of average test. Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 32-34 present a 23-year record of the differences between the December projection and the final estimate. Using world wheat production as an example, changes between the December projection and the final estimate have averaged 3.7 million tons (0.7%) ranging from -10.2 to 6.1 million tons. The December projection has been below the estimate 15 times and above 8 times.

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Wheat: William Tierney, Chairperson, WAOB

Frank Gomme, FAS; Tom Tice, FSA; Gary Vocke, ERS.

Rice: Andrew C. Aaronson, Chairperson, WAOB

Michelle Moore, FAS; Tom Tice, FSA; Nathan Childs, ERS.

Feed Grains: William Tierney, Chairperson, WAOB

Alan Riffkin, FAS; Philip W. Sronce, FSA; Allen Baker, ERS.

Oilseeds: Keith Menzie, Chairperson, WAOB

Pete Burr, FAS; Mark Ash, ERS; Philip W. Sronce, FSA.

Cotton: Carol Skelly, Chairperson, WAOB

John Wade, FAS; Scott Sanford, FSA; Mark Peters, AMS; Leslie Meyer, ERS.

Sugar: John Love, Chairperson, WAOB

Ron Lord, FAS; Daniel Colacicco, FSA; Stephen Haley, ERS.

Meat Animals: Shayle Shagam, Chairperson, WAOB

Wendell Dennis, FAS; Milton Madison, FSA; Warren Preston, AMS; Ron Gustafson, ERS.

Poultry: Shayle Shagam, Chairperson, WAOB

Catherine Smith, AMS; Todd Drennan, FAS; Milton Madison, FSA; David Harvey, ERS.

Dairy: Shayle Shagam, Chairperson, WAOB

Paul Kiendl, FAS; John R. Mengel, AMS; James Miller, ERS; Milton Madison, FSA.

Foreign Production Assessments. Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division of FAS, Allen Vandergriff, Director.

Related USDA Reports. The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See <http://www.usda.gov/oce/waob/related.htm> for an explanation of related reports.

Supply and Demand Database. The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.
