February 9, 2007

WHEAT: U.S. wheat supply, use, and stocks projections for 2006/07 are unchanged this month. The season-average farm price is projected at \$4.20 to \$4.30 per bushel, up 5 cents on the lower end of the range and down 15 cents on the upper end from last month.

Global 2006/07 wheat production is projected 1.3 million tons higher this month, due to upward adjustments in FSU-12 that more than offset reductions in EU-25. The largest production changes are a 2.0-million-ton increase in Kazakhstan and a 0.7-million-ton decrease in EU-25. Global consumption is raised 1.8 million tons with increases in Canada, EU-25, and FSU-12. The increase in Canada reflects stronger feeding use as implied by recently released stock data. Consumption is lowered for Libya and Turkey and results in lower expected imports for these countries. Exports for Russia are raised 0.5 million tons as exports for EU-25 are lowered the same amount. Smaller changes in a number of other countries result in the small month-to-month increase in world exports. Global ending stocks for 2006/07 are lowered 1.0 million tons. Stocks are lowered for Canada and EU-25. Despite reductions for Russia, Ukraine, and Uzbekistan, stocks rise in FSU-12 as increases are projected for other member states, especially Kazakhstan.

COARSE GRAINS: U.S. supply, use, and stocks projections for 2006/07 corn, barley, and oats are unchanged this month. Corn exports are unchanged this month despite stronger competition from South America supplies as Mexico corn imports are increased. U.S. sorghum exports are lowered 5 million bushels based on slowing U.S. shipments and sales to Mexico even as corn shipments and sales remain strong. Projections for the corn and oats season-average farm prices are unchanged this month at \$3.00 to \$3.40 per bushel and \$1.75 to \$1.95 per bushel, respectively. The barley price range is lowered 10 cents on the top end to \$2.75 to \$2.95 per bushel reflecting prices received by producers to date. The sorghum price range is projected 10 cents higher on both ends of the range to \$3.10 to \$3.50 per bushel. Sorghum prices are forecast above corn prices this month as less sorghum forward contracting, compared with corn, has kept average prices received by producers higher for sorghum than for corn. Also boosting sorghum prices relative to corn are high feed grain prices in the Southern Plains where a substantial portion of the sorghum crop is produced and marketed.

Global 2006/07 coarse grain production is raised 4.8 million tons this month on improved prospects for corn crops in South America. Corn production for Argentina is raised 2 million tons to 21 million. Brazil corn production is raised 4 million tons to 46 million. Both increases are based on good growing season weather as reflected in recent area and yield indications. Supportive weather and higher prices also favor increased area for second-crop corn in Brazil.

Partly offsetting these increases is a 0.5-million-ton decrease for South Africa corn production. South Africa corn output is projected at 9.5 million tons on lower reported area and declining yield prospects as heat and dryness have stressed crops in the western Maize Triangle. Other coarse grain production changes include reductions for Australia sorghum; Ukraine barley, oats, and corn; and Turkey corn. Other production increases include Kazakhstan barley and India corn.

World coarse grain consumption is raised 3 million tons this month as improving supply prospects support stronger global use. Corn feed use for Brazil is revised higher for 2005/06 and projected higher for 2006/07 based on indications of stronger poultry and hog feeding demand. Global coarse grain exports are raised 2.8 million tons with the biggest increases for Argentina and Brazil corn. Corn imports for Mexico are raised 0.7 million tons this month based on the strong pace of shipments and sales from the United States. Canada corn imports, however, are lowered 0.3 million tons reflecting sharply higher wheat feeding. Global coarse grain ending stocks are raised 1.3 million tons with a 1.5-million-ton increase in corn stocks offset by slightly lower barley and sorghum stocks.

RICE: Only minor changes are made to the U.S. 2006/07 rice supply and use projections from a month ago. On the supply side, all rice imports are raised 0.5 million cwt to 18.5 million cwt with combined medium- and short-grain imports raised 1.0 million cwt while long-grain imports are lowered 0.5 million cwt. On the use side, all rice exports are unchanged at 102 million cwt. However, exports of rough rice are lowered 2 million cwt and entirely offset by an increase in the exports of milled and brown rice (on a rough-equivalent basis). Ending stocks are raised slightly to 30.4 million cwt with long-grain stocks projected at 21.6 million cwt, and combined medium- and short-grain stocks projected at 7.9 million cwt. The season-average farm price range is lowered 5 cents per cwt on the low end and 15 cents on the high end to \$9.65 to \$9.85 per cwt, which compares to a revised \$7.65 per cwt in 2005/06.

Global 2006/07 rice production, trade, and ending stocks are raised from a month ago. The slight increase in global rice production is due mostly to a larger crop projected for Vietnam. Imports are raised slightly due to increases for EU-25 and the United States, while imports for Russia are reduced slightly. China exports are raised from a month ago. World rice ending stocks for 2006/07 are projected at 78.9 million tons, up 1.1 million tons from last month, down 2.4 million tons from 2005/06, and the lowest stocks since 1983/84.

OILSEEDS: U.S. soybean exports for 2006/07 are projected at 1.1 billion bushels, down 20 million from last month, but still record high. This month's reduction is based on increased South America supply prospects and reduced global import demand. China projected soybean imports are reduced to 32 million tons, reflecting a slow start to the 2006/07 marketing year. With soybean crush unchanged, projected ending stocks for 2006/07 are increased to a record 595 million bushels.

U.S. soybean and soybean product price projections for 2006/07 are raised this month. The U.S. season-average soybean price range is projected at \$5.90 to \$6.50 per bushel, compared with \$5.75 to \$6.45 per bushel last month. Soybean meal prices are projected at \$180 to \$195 per short ton, up \$10 on both ends of the range. Soybean oil prices are projected at 27.5 to 29.5 cents per pound, up 1 cent on both ends of the range. Soybean oil prices remain

relatively high despite U.S. soybean oil stocks approaching record levels in November and December.

Global oilseed production for 2006/07 is projected at 397.2 million tons, up 1.8 million tons from last month. Global soybean production is projected at a record 228.4 million tons, up 1.6 million tons from last month. The Argentina crop is raised 1.5 million tons to 44 million tons based on slightly higher harvested area and improved yield prospects. Yields are projected at 2.79 tons per hectare, just below the record set in 2003. Soybean production is also raised for Russia and Ukraine. Other oilseed production changes include increased sunflowerseed production for Ukraine, higher cottonseed production for China, and reduced cottonseed production for several African countries.

Global oilseed stocks are projected at a record 63.8 million tons, up 0.9 million tons from last month. Increased soybean stocks in South America account for most of the change. Global vegetable oil stocks are also increased slightly, but remain near 30-year lows relative to use.

SUGAR: Projected 2006/07 U.S. sugar supply is decreased 156,000 short tons, raw value, from last month, due to lower production and imports. Production is decreased 17,000 tons, based on processor estimates compiled by the Farm Service Agency. Imports under the tariff rate quota are decreased 114,000 tons: 100,000 tons from Mexico based on reduced production potential and 14,000 tons from Costa Rica. Imports for re-export are reduced 25,000 tons based on a slower than expected pace to date. Total sugar use is reduced 50,000 tons, as lower deliveries for domestic food use more than offset higher exports; both changes are based on pace to date.

LIVESTOCK, POULTRY, AND DAIRY: Total U.S. meat production for 2006 is reduced fractionally from last month based on lower estimated fourth quarter slaughter. Forecast meat production for 2007 is lowered from last month mainly due to smaller beef and broiler output. The recent *Cattle* report indicated that there was little expansion of the cattle herd in 2006. Total cattle inventory was slightly higher on January 1, 2007, but the 2006 inventory was revised down. The 2006 calf crop was fractionally below the previous year. Assuming pasture conditions improve in the spring, relatively high grain prices will encourage cattle to remain on grass longer and slow feedlot placements. Thus, beef production forecasts for later in the year are reduced. Pork production forecasts are unchanged from last month. Broiler production for 2007 is reduced throughout the year. Recent broiler hatchery data point to production restraint through the first half of 2007. Turkey production forecasts are unchanged. Egg production forecasts are reduced for the first half of 2007.

Price forecasts for 2007 are unchanged for cattle and turkeys, but prices are higher for hogs, broilers, and eggs. Firm demand for pork is supporting hog prices higher than expected and price forecasts are raised to reflect continued demand conditions and additional support from higher broiler prices. As broiler meat supplies are forecast lower than last month, prices are forecast higher. Egg prices are forecast higher on slower expected production growth.

Beef, pork, and poultry trade forecasts for 2006 and 2007 are unchanged from last month.

The milk production forecasts for 2006 and 2007 are raised from last month. The recent *Milk*

Production and Cattle reports indicated that the dairy herd remains above last year and producers reported a slightly larger number of replacement dairy heifers. Thus, forecast cow numbers are increased from last month, but the increase will likely be tempered by the recently announced herd buyout by Cooperatives Working Together and higher feed costs. The 2007 forecast continues to assume a declining cow herd from the previous year, albeit at a slower pace than forecast last month. With a slight increase in milk per cow growth and higher overall cow numbers, the milk production forecast is increased 1.3 billion pounds from last month. Despite higher production, milk prices are forecast higher. Demand for dairy products remains firm, although the butter price is reduced slightly on expectations of ample supplies. Cheese price forecasts are slightly higher compared with last month as demand remains strong. However, nonfat dry milk (NDM) and whey price forecasts are raised sharply. Demand for NDM and whey for both domestic ingredient use and international sales support strong prices. Supplies of these products in international markets are expected to remain tight until at least the second half of the year when the next production season in Oceania begins. The all milk price forecast for 2007 is raised to \$14.35 to \$15.05.

COTTON: This month's 2006/07 U.S. cotton estimates include sharply lower exports and higher ending stocks. No changes are made to production or domestic mill use. The export forecast is reduced nearly 8 percent to 14.5 million bales due to a combination of lower total estimated imports by China and a lower expected U.S. share of the China market. Accordingly, ending stocks are raised 1.2 million bales to 8.3 million. The forecast stocks-to-use ratio of 43 percent is the largest since 1988/89.

The world 2006/07 estimates include marginally lower production and marginally higher consumption relative to last month. Production increases for China and Pakistan are more than offset by reductions for Australia, Mali, and others. Consumption is raised mainly in Turkey, partially offset by a reduction for Brazil. World trade is reduced about 1 percent, with imports lower for China and India, but higher for Turkey. Lower forecast U.S. exports are nearly offset by higher exports by India. Despite lower production and higher consumption, world stocks are raised 1.3 percent due mainly to an increase in the residual supply factor for China. China's continued sluggish import demand suggests that domestic supplies are higher than previously estimated.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

APPROVED BY:

CHARLES F. CONNER
ACTING SECRETARY OF AGRICULTURE

USDA's 83rd Annual Outlook Forum

**Agriculture at the Crossroads:
Energy, Farm & Rural Policy**

**Crystal Gateway Marriott Hotel
Arlington, Virginia
March 1-2, 2007**

USDA's 2007 Agricultural Outlook Forum explores renewable energy's future in biofuels, cellulosic, methane, and wind. The Forum's national conversation about agriculture centers on the fascinating opportunities and challenges of renewable energy in the next farm bill and beyond. The keynote address will be delivered by Secretary Johanns. Forum dinner speaker, Indiana Governor Mitch Daniels will explore "21st Century Economic Development – A Renewed Focus on Agriculture."

"Renewable Energy – Inroads to Agriculture," the Forum's plenary panel, includes Archer Daniels Midland President and CEO Patricia Woertz; Cargill Chairman and CEO Warren R. Staley; American Petroleum Institute President and Chairman Red Cavaney; and CHS, Inc. President and CEO John Johnson. Scott Kilman, of the *Wall Street Journal*, will moderate the panel.

Chief Economist Keith Collins provides an overview of U.S. agriculture's economic outlook, with individual USDA sessions to address major commodities. Deputy Under Secretary for Farm and Foreign Agricultural Services A. Ellen Terpstra will address international agricultural trade. Stanford University's Tim Josling and William Cline of the Peterson Institute for International Economics discuss trade with developing countries. Addressing agricultural exports is William C. Motes of Informa Economics. Our trading partners also bring viewpoints from Sweden, Brazil, Japan, Australia, New Zealand, Mexico, Belgium, and France.

Registration is \$350. A full roster of speakers, program, and registration are available at www.usda.gov/oce/forum. Plenary session speeches are Webcast after 3 p.m. on March 1 at that site.

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Note: The World Agricultural Outlook Board reviews and approves the World Agricultural Supply and Demand Estimates (WASDE) report. The Board's analysts chair the Interagency Commodity Estimates Committees (ICECs) that prepare the monthly report.

Wheat: Jerry Norton, ICEC Chair, WAOB, *E-mail:* jnorton@oce.usda.gov
Gary Vocke, ERS; Levin Flake, FAS; Tom Tice, FSA.

Rice: Andrew C. Aaronson, ICEC Chair, WAOB, *E-mail:* aaaronson@oce.usda.gov

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" (SMD) except imports (U.S. Customs Service, Census Bureau). 2/ Projections for 2006/07 are based on processors' submissions compiled by the Farm Service Agency.

3/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2006/07, includes shortfall of 275,000 tons. 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ For 2005/06, high-tier (450) and other (56). For 2006/07, high-tier (50) and other (10). 6/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed.

7/ Includes SMD miscellaneous uses and the difference between SMD imports and WASDE imports.

U. S. Cotton Supply and Use 1/

Item			2006/07 Projections	
			2004/05	2005/06
			Est.	January February
=====				
Area	:		Million acres	
Planted	:	13.66	14.25	15.27
Harvested	:	13.06	13.80	12.73
	:			
=====				
Yield per harvested acre	:	855	831	819
	:			
=====				
Beginning stocks 2/	:	3.45	5.50	6.05

Ending stocks	:	5.50	6.05	7.10
	:			
Avg. farm price 4/	:	41.6	47.7	47.3 5/
=====				

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton.

5/ Average price for August-December 2006. USDA is prohibited by law from publishing cotton price projections.

Notes:

Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2006/07 is 43.6 percent.

A table including detail for upland and extra long staple (ELS) cotton will be posted by noon on WASDE report release days at:
<http://www.usda.gov/oce/commodity/wasde/index.htm>

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and Paraguay. 4/ Japan, China, and EU, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Simple average of monthly prices calculated by AMS from NASS weekly average dairy product prices for class price computations. Details may be found at http://www.ams.usda.gov/dyfmos/mib/fedordprc_dscrp.htm. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 35-37 present a 25-year record of the differences between the February projection and the final estimate. Using world wheat production as an example, changes between the February projection and the final estimate have averaged 2.3 million tons (0.4%) ranging from -7.3 to 6.8 million tons. The February projection has been below the estimate 18 times and above 7 times.

1/ Final estimate for 1981/82-2005/06 is defined as the first November estimate following the marketing year. 2/ May not total 25 if projection was the same as final estimate. 3/ Includes corn, sorghum, barley, oats, rye, millet, and mixed grain. 4/ Global soybean supply and use projections were initially released in June 2004. Therefore, an insufficient number of observations are available to provide meaningful reliability statistics for global soybean supply and use.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. 2/ Final estimate for 1981/82-2005/06 is defined as the first November estimate following the marketing year. 3/ May not total 25 for crops and 23 for animal production if projection was the same as the final estimate. 4/ Calendar years 1983 thru 2005 for meats, eggs, and milk. Final for animal products is defined as latest annual production estimate published by NASS.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/online>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of FAS. PECAD is located at www.pecad.fas.usda.gov/

Metric Conversion Factors

1 Hectare = 2.4710 Acres
1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

World Agricultural Supply and Demand Estimates

WASDE-443 - February 9, 2007

Electronic Access: Download the *WASDE* report <http://usda.mannlib.cornell.edu/>. Get a free e-mail subscription to the *WASDE* and other USDA crop reports at <http://usda.mannlib.cornell.edu>. Select the “Reports by E-Mail” bar to sign up.
