Approved by the World Agricultural Outlook Board

March 9, 2016

WHEAT: There are no changes to this month's all wheat balance sheets. By class, Hard Red Winter wheat exports are raised 10 million bushels and Hard Red Spring wheat exports are lowered 10 million bushels.

Global 2015/16 wheat supplies are lowered 3.3 million tons primarily on decreased production. The largest production change is a 2.4-million-ton decrease for India on updated government statistics. Australia production is lowered 1.5 million tons reflecting the sharp reduction in harvested area by the Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES). The ABARES upward yield revision confirms USDA's earlier analysis of weather data and satellite imagery. Partly offsetting is a 0.5-million-ton increase for EU production. Global 2015/16 wheat production remains a record. World trade is lowered 0.4 million tons led by a 1.0-million-ton reduction for Australia on the smaller crop. Russia exports are lowered 0.5 million tons on a slow pace and reduced competitiveness to EU origins. Partly offsetting is a 0.5-million-ton increase for Argentina reflecting a very strong shipment pace.

World wheat consumption for 2015/16 is lowered 2.0 million tons to 709.4 million. India consumption is lowered 1.0 million tons reflecting the smaller crop. Consumption in Egypt and Iraq are each lowered 0.4 million tons, and the Philippines is lowered 0.3 million tons. With supplies declining faster than total use, ending stocks are lowered 1.3 million tons but remain record large.

COARSE GRAINS: Projected U.S. feed grain ending stocks for 2015/16 are unchanged this month with only small offsetting increases for barley imports and exports and no changes to supply and use projections for the other feed grains. The projected season-average farm price ranges are narrowed 5 cents on each end for corn, sorghum, and barley, leaving the midpoints of the ranges unchanged on the month. The midpoint for the projected corn price remains \$3.60 per bushel. The oats farm price range is projected 10 cents lower on the high end reducing the midpoint by 5 cents to \$2.15 per bushel based on the latest reported prices.

Corn food, seed, and industrial use is lowered slightly for 2014/15 reflecting a 9-million-bushel reduction in estimated corn used in ethanol production based on revisions to monthly data reported in the March 1 *Grain Crushings and Co-Products Production 2015 Summary*. An offsetting change is made to 2014/15 feed and residual use as trade and ending stocks are known.

Global coarse grain supplies for 2015/16 are projected 1.6 million tons lower. Much of the decline reflects lower corn beginning stocks for Brazil with 2014/15 exports raised this month. Global 2015/16 coarse grain production is lowered with reductions for South Africa and Philippines corn and India millet more than offsetting an increase for Indonesia corn. Corn

production is lowered 0.5 million tons for South Africa with a continuation of drought reducing area and yield prospects further. Philippines corn production and India millet production are each lowered 0.3 million tons on lower yields resulting from dryness. Indonesia corn production is raised 0.3 million tons with higher expected area reflecting both an increase to reported area for 2014/15 and indications that reduced rice planting will boost corn area in 2015/16.

Global coarse grain consumption for 2015/16 is raised 0.5 million tons with higher corn use for India and South Africa and increased barley feeding for China more than offsetting a reduction in corn use for Venezuela. Global 2015/16 coarse grain imports are raised. Corn imports are increased for South Africa, Philippines, and Mexico and barley imports are raised for China. Partly offsetting are small reductions in corn imports for Indonesia and Venezuela. Corn exports are raised for Indonesia and South Africa, with the increase for South Africa reflecting higher expected trade with neighboring countries where drought has also affected corn production. Global coarse grain ending stocks for 2015/16 are lowered with corn ending stocks down 1.8 million tons mostly reflecting smaller stocks in Brazil.

RICE: U.S. 2015/16 rice exports are lowered 2.0 million cwt this month to 100.0 million on reduced shipments of southern medium-grain rough rice, especially to Turkey. Rice ending stocks are raised 2.0 million cwt to 43.9 million. The all rice price is lowered \$0.10 at both ends of the range to \$12.40 to \$13.20 reflecting lower projected medium- and short-grain prices.

Global rice supplies for 2015/16 are raised 1.8 million tons primarily on increased production. The largest production change is a 3.0-million-ton increase for India on updated government statistics. This is partially offset by a 1.0-million-ton decrease for Indonesia on lower area, caused by a poor start to the rainy season. Global imports are raised 0.4 million tons led by a 0.3-million-ton increase for China and a 0.1-million-ton increase for Indonesia. The China increase is on the import pace to date and the Indonesia increase is on the smaller crop. Export changes are very small and mostly offsetting.

World rice consumption for 2015/16 is raised 0.6 million tons and remains a record. Consumption is up 0.9 million tons for India and 0.3 million tons for China, both on larger supplies. The largest offsetting reduction is 0.2 million tons for Indonesia on the smaller crop. With the increase in supplies exceeding the rise in consumption, global ending stocks are raised 1.2 million tons to 90.5 million.

OILSEEDS: U.S. soybean production is projected at 3,929 million bushels, down slightly from last month due to a revision to South Carolina production. U.S. soybean ending stocks for 2015/16 are projected at 460 million bushels, up 10 million from last month due to a lower crush. Soybean trade projections are unchanged. Crush is reduced 10 million bushels to 1,870 million reflecting a lower projection for soybean meal domestic disappearance. Soybean meal imports are raised slightly, partly offsetting lower meal production. Despite a lower crush, soybean oil ending stocks for 2015/16 are projected up 120 million pounds from last month to 2,185 million as higher beginning stocks and a lower export forecast more than offset lower production. Higher beginning stocks reflect a revision to soybean oil stocks for 2014/15 as reported in the March 1 *Oilseed Crushings 2015 Summary* report.

Soybean and soybean meal prices are reduced this month and the projected ranges are narrowed. The U.S. season-average soybean price for 2015/16 is projected at \$8.25 to

\$9.25 per bushel, down 5 cents at the midpoint. The soybean meal price is projected at \$270 to \$300 per short ton, down \$5 at the midpoint. Soybean oil prices are projected at 28.5 to 31.5 cents pound, unchanged from last month.

Global oilseed production for 2015/16 is projected at 526.9 million tons, down fractionally from last month. Global soybean production is projected at 320.2 million tons, down slightly from last month. Other oilseed production changes include reduced rapeseed production for Australia, higher peanut production for India, lower palm kernel production for Malaysia, and lower cottonseed production for India and Pakistan.

Global oilseed trade for 2015/16 is projected at 149.3 million tons, up 1.2 million mainly reflecting increased soybean exports for Brazil. The soybean import forecast for China is raised reflecting strong imports to date. Partially offsetting are reduced imports for the EU, Pakistan, and Mexico, where more imports of soybean meal are expected. Global oilseed crush is projected higher reflecting larger soybean crush in Argentina and China. The forecasts for peanut crush in India and rapeseed crush in the EU are also projected higher. Reduced forecasts for cottonseed crush in India, Pakistan, and the United States are partly offsetting.

Argentina soybean meal exports are raised with a larger crush forecast. Soybean meal imports are increased for the EU, Pakistan, Mexico, and South Korea. Global oilseed ending stocks are projected at 89.5 million tons, down 1.7 million from last month, mostly due to lower soybean ending stock projections for Argentina and Brazil. Global vegetable oil production is nearly unchanged this month as higher soybean oil and peanut oil production more than offset lower palm oil production in Malaysia. Global vegetable oil stocks are projected at 16.5 million tons, down marginally from last month.

SUGAR: U.S. sugar beginning stocks for 2015/16 are increased by 40,990 short tons, raw value (STRV) based on refiners' corrected data for 2014/15 as published in *Sweetener Market Data*.

U.S. sugar production for 2015/16 is projected at 8.827 million STRV, a decrease of 21,901. Florida cane sugar is decreased 27,492 STRV to 2.108 million. While Florida cane processors have produced only 1.084 million STRV through January due to difficult harvest conditions, no processor has forecast reduced sugarcane production, with all maintaining that the harvest will be extended by at least a month to meet all individual processor sugarcane production goals. The National Agricultural Statistics Service (NASS) forecasts Florida sugarcane for sugar at 16.974 million tons. Based on refiner projections, sucrose recovery will be lower by 2.5 percent due to the extended harvest. Cane sugar production levels for all other States are unchanged from last month. Beet sugar production is increased by a small 5,591 STRV to 5.016 million as reduced beet pile shrink is partially offset by lower expected sucrose recovery.

On March 7, 2016, the Office of the U.S. Trade Representative (USTR) provided notice of a reallocation of 85,533 metric tons, raw value (MTRV) of the 2015/16 raw sugar tariff-rate quota (TRQ) from countries unable to fill their original allocations to the other countries capable of filling. As a consequence, the raw sugar TRQ shortfall is revised downward from 99,208 STRV to 27,558, a reduction of 71,650. Imports from Mexico are reduced by 33,424 STRV to 1.299 million.

Exports to Mexico for 2015/16 are expected to be lower by 23,476 STRV. Also, since last month, U.S. cane sugar refiners have become more pessimistic about generating export alternatives after Mexico banned duty-free imports of U.S. sugar benefitting from the re-export import program. Sugar exports are, therefore, projected at 100,000 STRV. No other changes to sugar use were made. Ending stocks for 2015/16 are projected at 1.646 million STRV, implying an ending stocks-to-use ratio of 13.5 percent.

For the 2015/16 Mexico sugar supply and use balance, imports are decreased by 20,092 MT to match the decrease in U.S. exports to Mexico. Mexico exports are projected at 1.122 million MT, a decrease of 28,606 from last month. Exports to the United States are projected at 1.112 million MT, based on changes made in the March 2016 *WASDE* for the United States as per the Countervailing Duty (CVD) Suspension Agreement of December 19, 2014 ("Target Quantity of U.S. Sugar Needs").

LIVESTOCK, POULTRY, AND DAIRY: The 2016 forecast of total red meat and poultry production is raised from last month as higher forecast first-quarter broiler and turkey production more than offsets small reductions in beef and pork. First-quarter beef production is reduced on the pace of slaughter and lower carcass weights; pork production is reduced on slightly lighter carcass weights. Broiler and turkey production for the first quarter is raised as the pace of slaughter to date has been higher than expected. The egg production forecast is raised on increased table egg production as the sector continues to rebuild following last year's Highly Pathogenic Avian Influenza outbreaks. Historical poultry and egg production estimates are adjusted to reflect revisions in production data.

Beef import and export forecasts are unchanged from last month. The pork export forecast is lowered from last month on recent trade data. The pork import forecast is raised on expectations of relatively large exportable supplies in the EU and continued strength of the U.S. dollar. Broiler export and turkey export forecasts are lowered on slower-than-expected sales in January.

Annual cattle and hog prices for 2016 are unchanged from last month. Broiler prices are lowered on current prices and expected higher production. The turkey price forecast is unchanged but the range is narrowed. Egg prices are reduced on higher forecast production.

The milk production forecast for 2016 is lowered from last month as a smaller decline in the cowherd is more than offset by slower growth in milk per cow. Fat and skim-solids basis exports are reduced primarily on strong competition in international whey product markets, and exports of a number of other dairy products are facing increased competition. Imports are increased on both a fat and skim-solids basis. Continued strength of the U.S. dollar is expected to keep the United States as an attractive market for dairy products. Expectations of a relatively wide spread between U.S. and international butter prices will support increased butterfat imports while cheese imports will likely benefit from continued demand strength. Whey product exports are also likely to be pressured by large world supplies.

The butter price forecast is raised as demand remains firm. Cheese and nonfat dry milk (NDM) prices are reduced as supplies are expected to be large and in the case of NDM, international prices will remain under pressure from large global supplies. The whey price

forecast is unchanged. The Class III price is lowered on the lower cheese price. The Class IV price is unchanged at the midpoint as the higher butter price offsets a lower NDM price; however, the range is narrowed. The all milk price forecast is lowered to \$14.95 to \$15.55 per cwt.

COTTON: The U.S. 2015/16 cotton supply and demand estimates are unchanged from last month. Marginal adjustments in harvested area and yield reflect NASS's resurvey of the South Carolina crop. The marketing year average price received by producers is now estimated to range from 58.0 to 60.0 cents per pound, with the midpoint of 59.0 cents reduced from the February estimate due to declining market prices.

With lower consumption partially offsetting lower production, global 2015/16 cotton ending stocks are revised down this month. Production is estimated lower in India and Pakistan, based on arrivals at gins, but higher in Australia. The 1.0-million-bale reduction in India's crop reflects an early withdrawal of monsoon rainfall combined with pest damage in the northern states. Consumption is reduced mainly in Pakistan, based on lower available supplies. World ending stocks are now projected at 103.3 million bales.

Approved by the Secretary of Agriculture and the Chairman of the World Agricultural Outlook Board, Seth D. Meyer, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

Avg. Farm Price (\$/cwt) 1/ 6/ 9/	19.20	18.30	16.10 - 16.90	16.00 - 16.80
California 10/	20.70	21.60	19.00 - 20.00	18.50 - 19.50
Other States 1/	15.70	14.40	11.70 - 12.30	11.40 - 12.00

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 2013/14-2.1; 2014/15-2.3; 2015/16-1.9. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in breakens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. The 2013/14 and 2014/15 milling yield is based on the Farm Service Agency (FSA) warehouse stored loan data for long, medium, and short grain rice. The 2015/16 milling yield is calculated using the previous five-year Olympic average- 2010/11-2014/15. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The medium/short-grain season-average- farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. For example, the average difference between the August WASDE SAFP forecast and the final price has averaged \$1.65 per cwt from 2008/09-2013/14, with a high of \$3.50 per cwt in 2008/09 and a low of \$0.60 per cwt in 2009/10. 10/ Marketing year beginning October 1.

1/ Fiscal years beginning Oct 1. Historical data are from FSA "Sweetener Market Data" (SMD). 2/ Production projections for 2014/15 and 2015/16 are based on Crop Production and processor projections where appropriate. 3/ For 2015/16, WTO raw sugar TRQ shortfall (28). For 2014/15, WTO raw sugar TRQ shortfall (69). 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ For 2013/14, other high-tier (5) and other (0). For 2014/15, other high-tier (15) and other (0). For 2015/16, other high-tier (15) and other (0). 6/Combines SMD deliveries for domestic human food use and SMD miscellaneous uses. 7/ Transfers to sugar-containing products for reexport, and for nonedible alcohol, feed, and ethanol.

Mexico Sugar Supply and Use and High Fructose Corn Syrup Imports 1/

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, Paraguay, and Uruguay. 4/ China, European Union, Japan, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, Vietnam, and Thailand).

All Milk 3/	20.05	23.97	17.08	17.08	15.30- 16.00	14.95- 15.55

1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Reliability of March Projections 1/

Note: Tables on pages 35-37 present a record of the March projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.6 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 1 percent. The average difference between the March projection and the final estimate is 2.4 million tons, ranging from 0 million to 8 million tons. The March projection has been below the estimate 25 times and above 9 times.

	Root mean square error	90 percent confidence interval	Differences between forecast and final estimate Years

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2014/15 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2014/15. Calendar years 1983 through 2014 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1983-2014.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/online>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of the Foreign Agricultural Service. PECAD is located at www.pecad.fas.usda.gov/.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

WASDE Notification System

Subscribers are notified through GovDelivery when the monthly *World Agricultural Supply and Demand Estimates (WASDE)* report is available.

Previous *WASDE* reports are available at
