QuickStix™ Kit for C1MT in Soybean

Catalog # AS033

Part# 10526

Lot# 052874 Expiration Date: 10/31/2015

QuickStix Kit C1MT detects INTACTA RR2 PRO® technology when used to test soybean samples following the kit protocol.

Testing:

The above kit was tested and found to be within acceptable performance limits for all testing parameters. Assays were performed in accordance with the procedure outlined in the product insert. Test parameters are listed below.

Test parameters:

Test	Specification
Negative Results	The QuickStix Kit C1MT strip will be negative when testing soybean samples containing less than 5% of INTACTA RR2 PRO® technology. This ensures no detection of low level presence, adventitious presence and accidental contamination. The QuickStix Kit C1MT strip will be negative when testing RR1 or conventional soybean Negative Strip: no visible pink line in the test line area of the strip.
Positive Results	QuickStix Kit C1MT detects INTACTA RR2 PRO® technology when used to test soybean samples following the kit protocol. Positive Strip: a visible pink line in the test line area of the strip.
