

EXPORTACIÓN DE FRUTAS POR AVIÓN

ENERO/SEPTIEMBRE 2017

Si bien, como citamos en un informe anterior, el transporte marítimo por razones de costo beneficio, para los trayectos de larga distancia y por el volumen transportado, es el medio por excelencia en el comercio internacional.

En el caso de productos con superior precio unitario, de reducido volumen a transportar y la necesidad de obtenerlo en el menor tiempo posible, mayormente se utiliza el aéreo, ya que a pesar de tener un mayor valor de flete, es el medio más rápido para los envíos especialmente fuera del continente o de países no limítrofes.
